PARTS AND ACCESSOIRES FOR

**Jaguar E-Type V12  
Serie III  
1971-1974**

Ever since its first appearance at the 1961 Geneva motor show, the Jaguar E-Type has been instantly identifiable, all over the world, by its distinctive and highly individual styling. Enzo Ferrari called the E-Type „The most beautiful car ever made“. In 2004, Sports Car International magazine placed the E-Type at „Number One“ on their list of Top Sports Cars of the 1960s and as recently as March 2008, the Jaguar E-Type ranked First in a The Daily Telegraph online list of the world's „100 most beautiful cars“ of all time. 10 years after its debut the Mk III was introduced which featured a brand new 5.3 litre V12 Jaguar Engine to supplement the 4.2 litre „XK“ motor, making Jaguar, Ferrari and Lamborghini the only three manufacturers offering a V12 road car. To match the improved performance it fitted with ventilated disc brakes at the front and air scoops at the rear. The track was 9 inches wider which, combined with wider wheels and „Anti-Dive“ front suspension geometry, gave the car much better roadholding, particularly under braking. Lucas transistorised ignition and Adwest power assisted rack and pinion steering were now standard. The new version of the Roadster had a 2+2 wheelbase which made the car longer, roomier and increased the „Cubby Box“ luggage space. The „space“ in the fuel tank was also improved to 18 gallons (70 litres) capacity and the turning circle was improved to 36ft.

The V12 E-Type was at its best as a long-distance, high-speed Grand Tourer with automatic transmission and air-conditioning being two of the more popular options . There were few cars that could match its top speed and 120/130mph cruising ability, even amongst the exotica from Italy, and none at all the silence and smoothness of its V12 engine. Weighing only 80lb more than the cast-iron-block, 4.2-litre XK six, the new all-alloy, 5.3-litre V12 produced 272bhp, and although the weight had increased by about 20% the output of the silky smooth V12 engine was good enough for a top speed in excess of 140mph. Further good news was that the 0-100mph time of around 16 seconds made the V12 the fastest-accelerating E-Type ever.

The Mark III can be easily distinguished from its predecessors by a larger, chrome plated, cross-slatted radiator grill and flared wheel arches. The short wheelbase FHC body style was discontinued and the V12 was available only as a convertible or 2+2 coupé with both models now built on the longer-wheelbase floorplan. Cars for the US market were fitted with large projecting rubber bumper over-riders. On cars built 1973 these were only to be found on the front of the car, but in 1974 where fitted to both the front and rear all models to meet local 5 mph (8 km/h) impact regulations. Those on European models remained considerably smaller. US models also have side indicator repeats on the front and rear wings. There were also a limited number of six-cylinder Series 3 E-Types built and where featured in the initial sales literature. When leaving the factory the V12 Open Two Seater and V12 2+2 where originally fitted with Dunlop E70VR – 15 inch tyres on 15 x 6K wire or solid wheels.

We now have considerably more than 5000 parts available for the Jaguar E-Type Mk 3 and employ a number of dedicated Jaguar specialists who will be glad to help you find what you are looking for.

- **Orders accepted by:** Fax, e-mail, internet, post or telephone
- **Despatch:** Next day delivery for every order given until 16.00  
Next day courier possible
- **Warehouse:** More than 100.000 items on stock
- **No minimum order**
- **No costs for packaging**  
(except engines, gearboxes, glass, long exhausts)
- **Carriage charge only**
- **Payment:** All major credit cards or cash by delivery

## Table of contents

Introduction . . . . .	1
Copyright . . . . .	.II
Table of contents . . . . .	III

### Chapter 1 - Engine

1.1 Exchange engines . . . . .	2
1.2 Oil sump . . . . .	4
1.3 Crankshaft . . . . .	8
1.4 Cylinder block . . . . .	14
1.5 Cylinder head . . . . .	18
1.6 Oil filter and oil cooler . . . . .	24
1.7 Engine mounting . . . . .	26
1.8 Engine breather system . . . . .	28
1.9 Exhaust emission control system (air injection) . . . . .	30
1.10 Exhaust emission control system (late) . . . . .	34
1.11 Exhaust emission control system (thermostatic vacuum system, late) . . . . .	36
1.12 Exhaust emission control system (thermostatic vacuum system, from engine no. 7S4880 to 7S8443) . . . . .	38
1.13 Exhaust emission control system (thermostatic vacuum system, from engine no. 7S4664 to 7S14000 vehicles with manual gearbox USA and Canada models, from engine no. 7S8671 Europe, Sweden and Japan) . . . . .	40
1.14 Exhaust emission control system (thermostatic vacuum system, from engine no. 7S4664 to 7S14000 vehicles with automatic gearbox, Canada, USA and Japan, from 7S14001 automatic and manual gearbox Canada, USA and Japan) . . . . .	42

### Chapter 2 - Gearbox and overdrive

2.1 Manual gearbox - outer . . . . .	44
2.2 Manual gearbox - inner . . . . .	48
2.3 Automatic gearbox Borg Warner model 12 - outer . . . . .	52
2.4 Automatic gearbox Borg Warner model 12 - inner . . . . .	58
2.5 Automatic gearbox Borg Warner model 12 body valve, vacuum system . . . . .	64
2.6 Automatic gearbox Borg Warner model 12 gear selector lever . . . . .	66
2.7 Gearbox mounting . . . . .	70

### Chapter 3 - Clutch

3.1 Clutch . . . . .	72
3.2 Clutch hydraulics . . . . .	74

### Chapter 4 - Radiator and waterpump

4.1 Radiator . . . . .	78
4.2 Fan cowl and fan unit . . . . .	80
4.3 Waterpump . . . . .	82
4.4 Fan belt . . . . .	84
4.5 Thermostat . . . . .	86

### Chapter 5 - Engine controls

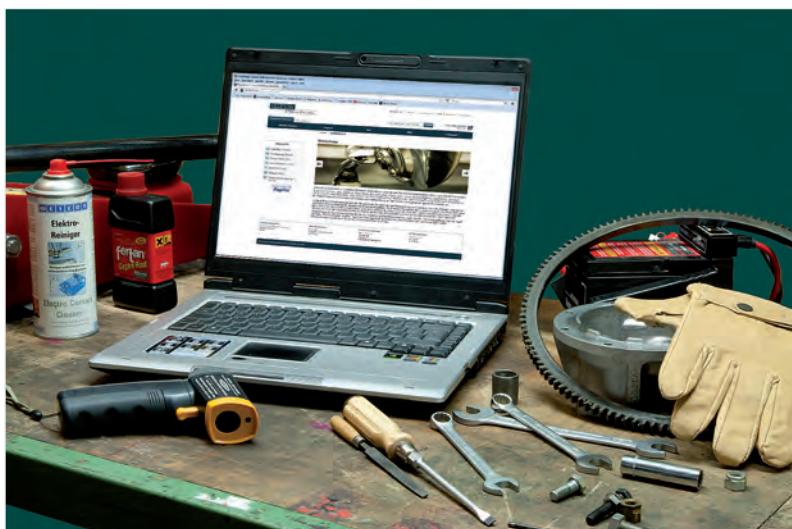

5.1 Accelerator pedal - LHD cars . . . . .	88
5.2 Accelerator pedal - RHD cars . . . . .	90
5.3 Throttle controls . . . . .	92
5.4 Choke controls . . . . .	96

### Chapter 6 - Carburetor and air filter

6.1 Zenith Stromberg 175CD carburettor and air filter . . . . .	98
6.2 Zenith Stromberg 175CD internal carburettor . . . . .	104

### Chapter 7 - Fuel pump and fuel tank

7.1 Fuel pump . . . . .	110
7.2 Fuel tank . . . . .	112
7.3 Fuel pipes and fuel filter - early type . . . . .	114
7.4 Fuel pipes and fuel filter - late type . . . . .	116
7.5 Carbon canister and fuel ventilation system . . . . .	118

**Chapter 8 - Front suspension**

8.1	Shock absorber and torsion bar.....	120
8.2	Wishbone and anti roll bar .....	122
8.3	Vertical link, stub axle and hub .....	128

**Chapter 9 - Manifold and exhaust system**

9.1	Manifold and exhaust system.....	130
9.2	Exhaust manifold .....	134
9.3	Exhaust system .....	138

**Chapter 10 - Steering**

10.1	Steering column and steering wheel.....	142
10.2	Power steering unit.....	144

**Chapter 11 - Rear suspension**

11.1	Hub, shock absorber and wishbone .....	146
11.2	Differential.....	152
11.3	Propshaft.....	156

**Chapter 12 - Brakes**

12.1	Brake servo and master cylinder .....	158
12.2	Brake vacuum tank and pipes .....	162
12.3	Front brakes.....	164
12.4	Rear brake including handbrake mechanism .....	166
12.5	Handbrake cable .....	170
12.6	Brake pipes LHD models.....	172
12.7	Brake pipes RHD models.....	174

**Chapter 13 - Road wheels and jack**

13.1	Road wheels .....	176
13.2	Jack and tools .....	178

**Chapter 14 - Electrics and heating**

14.1	Altenator Butec .....	180
14.2	Starter motor (to engine no. 7S3708).....	182
14.3	Starter motor (From engine no. 7S3709 to engine no. 7S4097).....	184
14.4	Starter motor (From engine no. 7S4098 to engine no. 7S7000)....	186
14.5	Starter motor (From engine no. 7S7001).....	188
14.6	Distributor, ignition coil and amplifier.....	190
14.7	Distributor, ignition coil and amplifier.....	192
14.8	Battery an battery cable .....	194
14.9	Internal electrics - fues box, relays and swiches.....	196
14.10	Wiring loom .....	198
14.11	Instruments .....	202
14.12	Switches and steering lock .....	204
14.13	Dashboard.....	208
14.14	Wiper Motor, wheel box and windscreen wiper .....	214
14.15	Windscreen washer system .....	216
14.16	Headlamps.....	218
14.17	Front and side lamps .....	222
14.18	Rear lamps, number plate lamps and reverse lamps..	224
14.19	Interior lamps.....	228
14.20	Bulbs .....	230

14.21	Heater, heater controls and heater hoses .....	234
14.22	Demister and demister controlz .....	38
14.23	Air conditioning: compressor.....	242
14.24	Air conditioning: condenser and receiver drier.....	244
14.25	Air conditioning: hydraulic pipes .....	246
14.26	Air conditioning: air conditioning unit.....	248

**Chapter 15 - Body panels and chassis parts**

15.1	Bodyshell, wings, doors and bonnet.....	250
15.2	Front frame and fittings.....	254
15.3	Front frame and fittings.....	258
15.4	Outer body panels - OTS.....	260
15.5	Outer body panels - FHC.....	262
15.6	Inner body repair panels, rear section - OTS .....	264
15.7	Inner body repair panels, rear section - FHC .....	266
15.8	Complete seal kits, grommets and blanking plugs .....	268

**Chapter 16 - Bumpers**

16.1	Front bumper, brackets and fittings .....	274
16.2	Rear bumper, brackets and fittings .....	278

**Chapter 17 - Radiator grille**

17.1	Radiator grille, bonnet grille and fixings .....	280
------	--	-----

**Chapter 18 - Fittings and external trim parts**

18.1	Bonnet and engine bay fittings .....	282
18.2	Chassis and boot lid fittings OTS .....	286
18.3	Chassis and back door fittings FHC .....	288
18.4	Door locks and handles.....	292
18.5	Door locks and handles.....	294
18.6	Door hinge and door seals .....	296
18.7	Mouldings and wing beadings - OTS.....	298
18.8	Mouldings and wing beadings - FHC.....	300

**Chapter 19 - Windscreen, side screens and glass**

19.1	Door glass and window regulator - OTS .....	302
19.2	Door glass and window regulator - FHC .....	304
19.3	Windscreen and interior mirror - OTS .....	306
19.4	Windscreen, interior driving mirror, side screen and rear screen - FHC .....	308
19.5	Door mirror and wing mirror .....	312

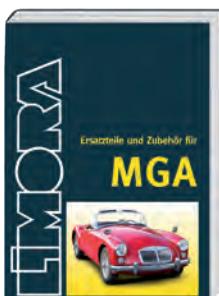

**Chapter 20 - Seats and interior trim**

20.1	Complete interior trim kits .....	314
20.2	Seats and seat covers .....	316
20.3	Rear seat FHC.....	320
20.4	Trim kits OTS .....	322
20.5	Trim kits FHC .....	326
20.6	Carpets .....	332

No	Part No	Description	Qty	Notes
1	<b>349195</b>	Engine reconditioned, lead free spec. Exchange .....	1	} all models customers old unit is required in advance

All our engines are developed for lead free applications. All engines are equipped with new pistons, piston pins, piston rings, main and big end bearings, small-end bushes, timing chain, gaskets, front oil seal and core plugs. Every cylinder head is inspected for cracks. Valve guides are measured for wear and either resized or renewed to conform to original tolerances. All non-conforming parts are replaced. All our engines are hot run under their own power in purpose-built test cells. Every engine is subjected to a series of checks and the results are recorded against each specific engine serial number. On all our engines we grant with professional installation 24-month guarantee in accordance with our general terms of trade.

#### Castrol Classic Engine oil - XL20W/50

Selecting the correct oil for your vehicle's engine, gearbox and axle, is essential in ensuring that peak running condition, minimum wear and maximum protection is maintained. The Castrol Classic oil range compromises monograde and multigrade lubricants of the correct viscosity on which your classic vehicles were designed to run. This has been achieved using latest technology and low detergent base oils to the correct viscosities originally specified by the manufacturer, 5 liters

Part no. 329066

#### Penrite Engine oil - Classic Light 20W-60

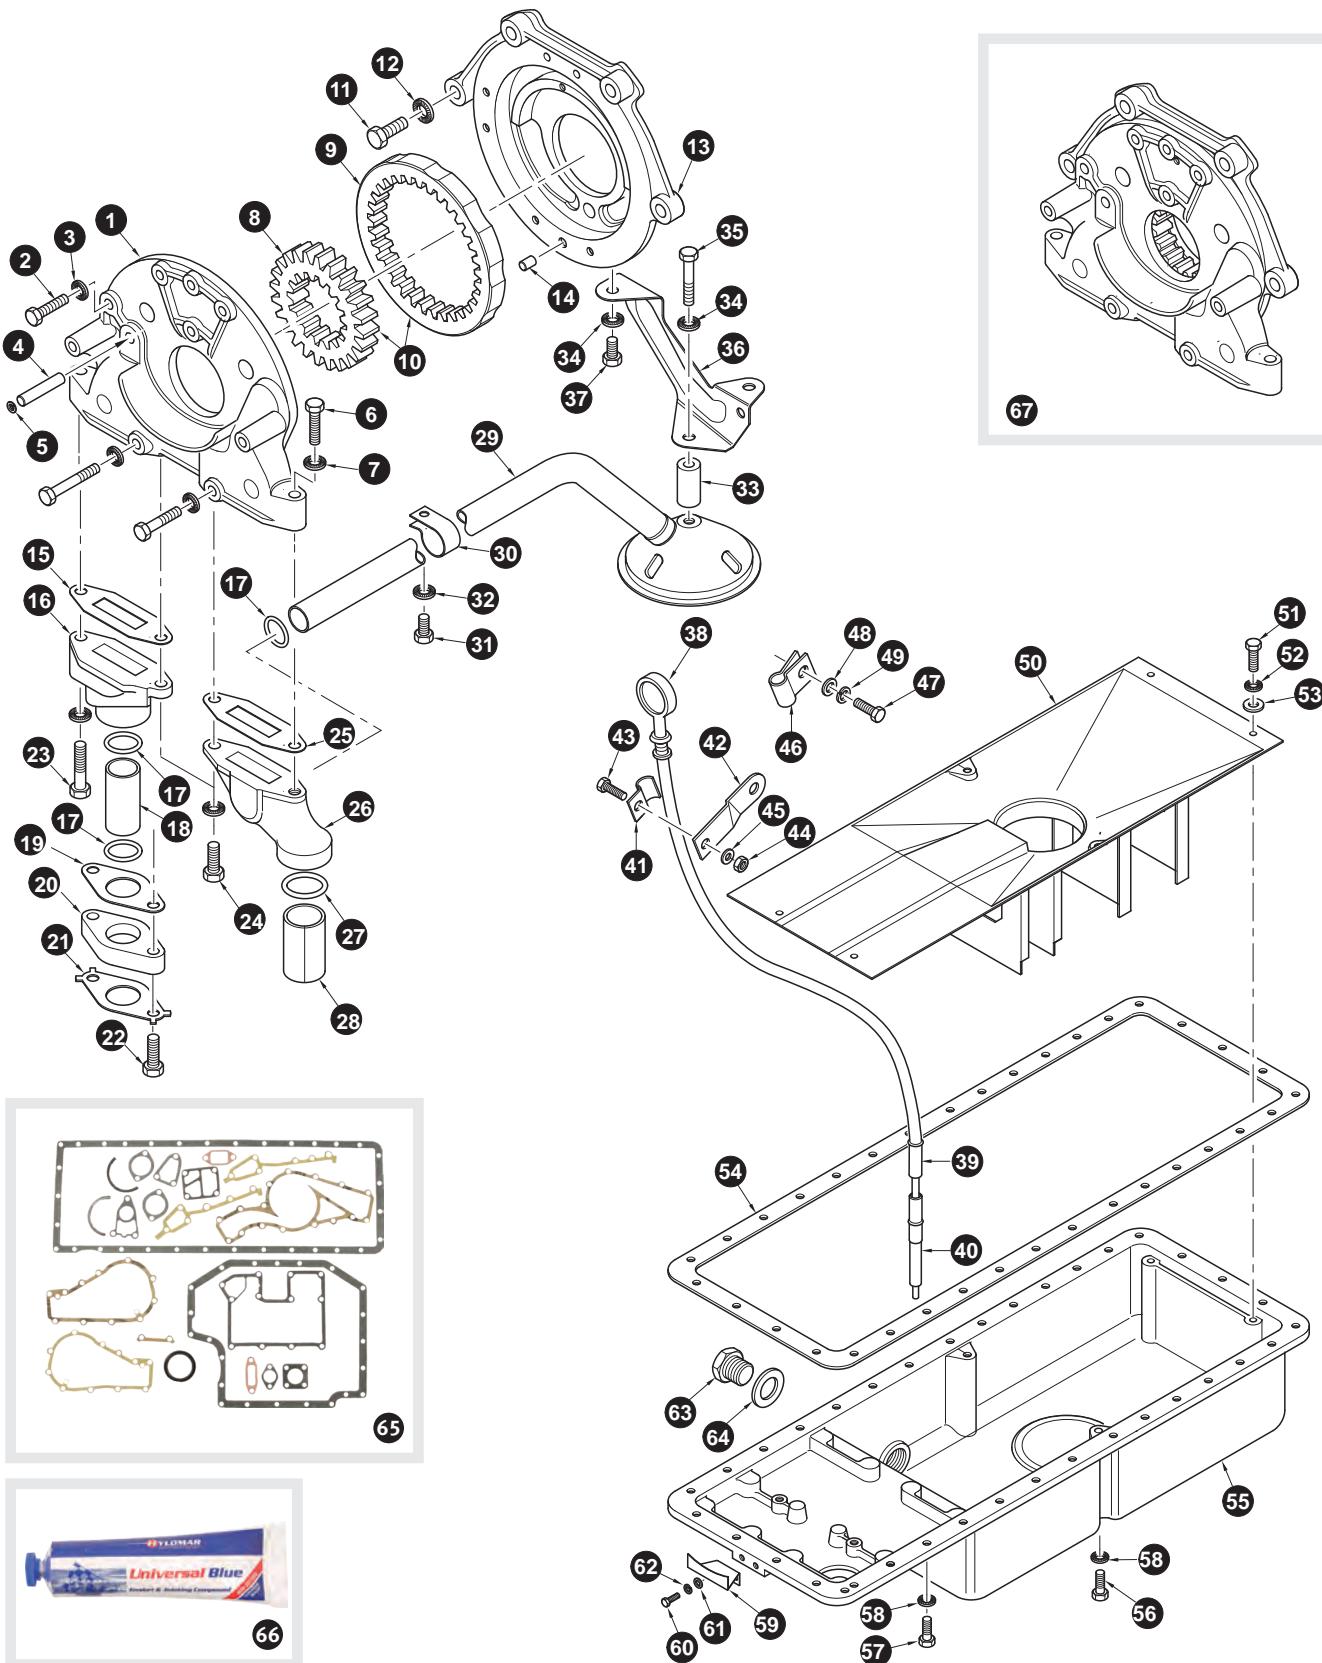

This premium oil offers a unique viscosity range, is non-friction modified, multigrades made in Australia specially for high temperatures, high speeds and high loads. Formulated for use in conventional engines operating under a high load environment. It provides better oil pressure and consumption control. A SAE20W/60 oil, which replaces originally recommended SAE30 and 20W/50 oils. This oil meets the requirements of API SM/CF, ACEA A3/B3, M2C 153G, VW 501.01., for vehicles post 1950. For use where SAE30 and 20W-50 oils were originally recommended, 5 liters

Part no. 22856

### Jaguar V12 oil pumps

Possibly the most important part of this massive motor. A 20% increase in performance compared to the original oil pump. Made from High Tech materials normally only found in todays modern aircraft. High precision CNC finish.

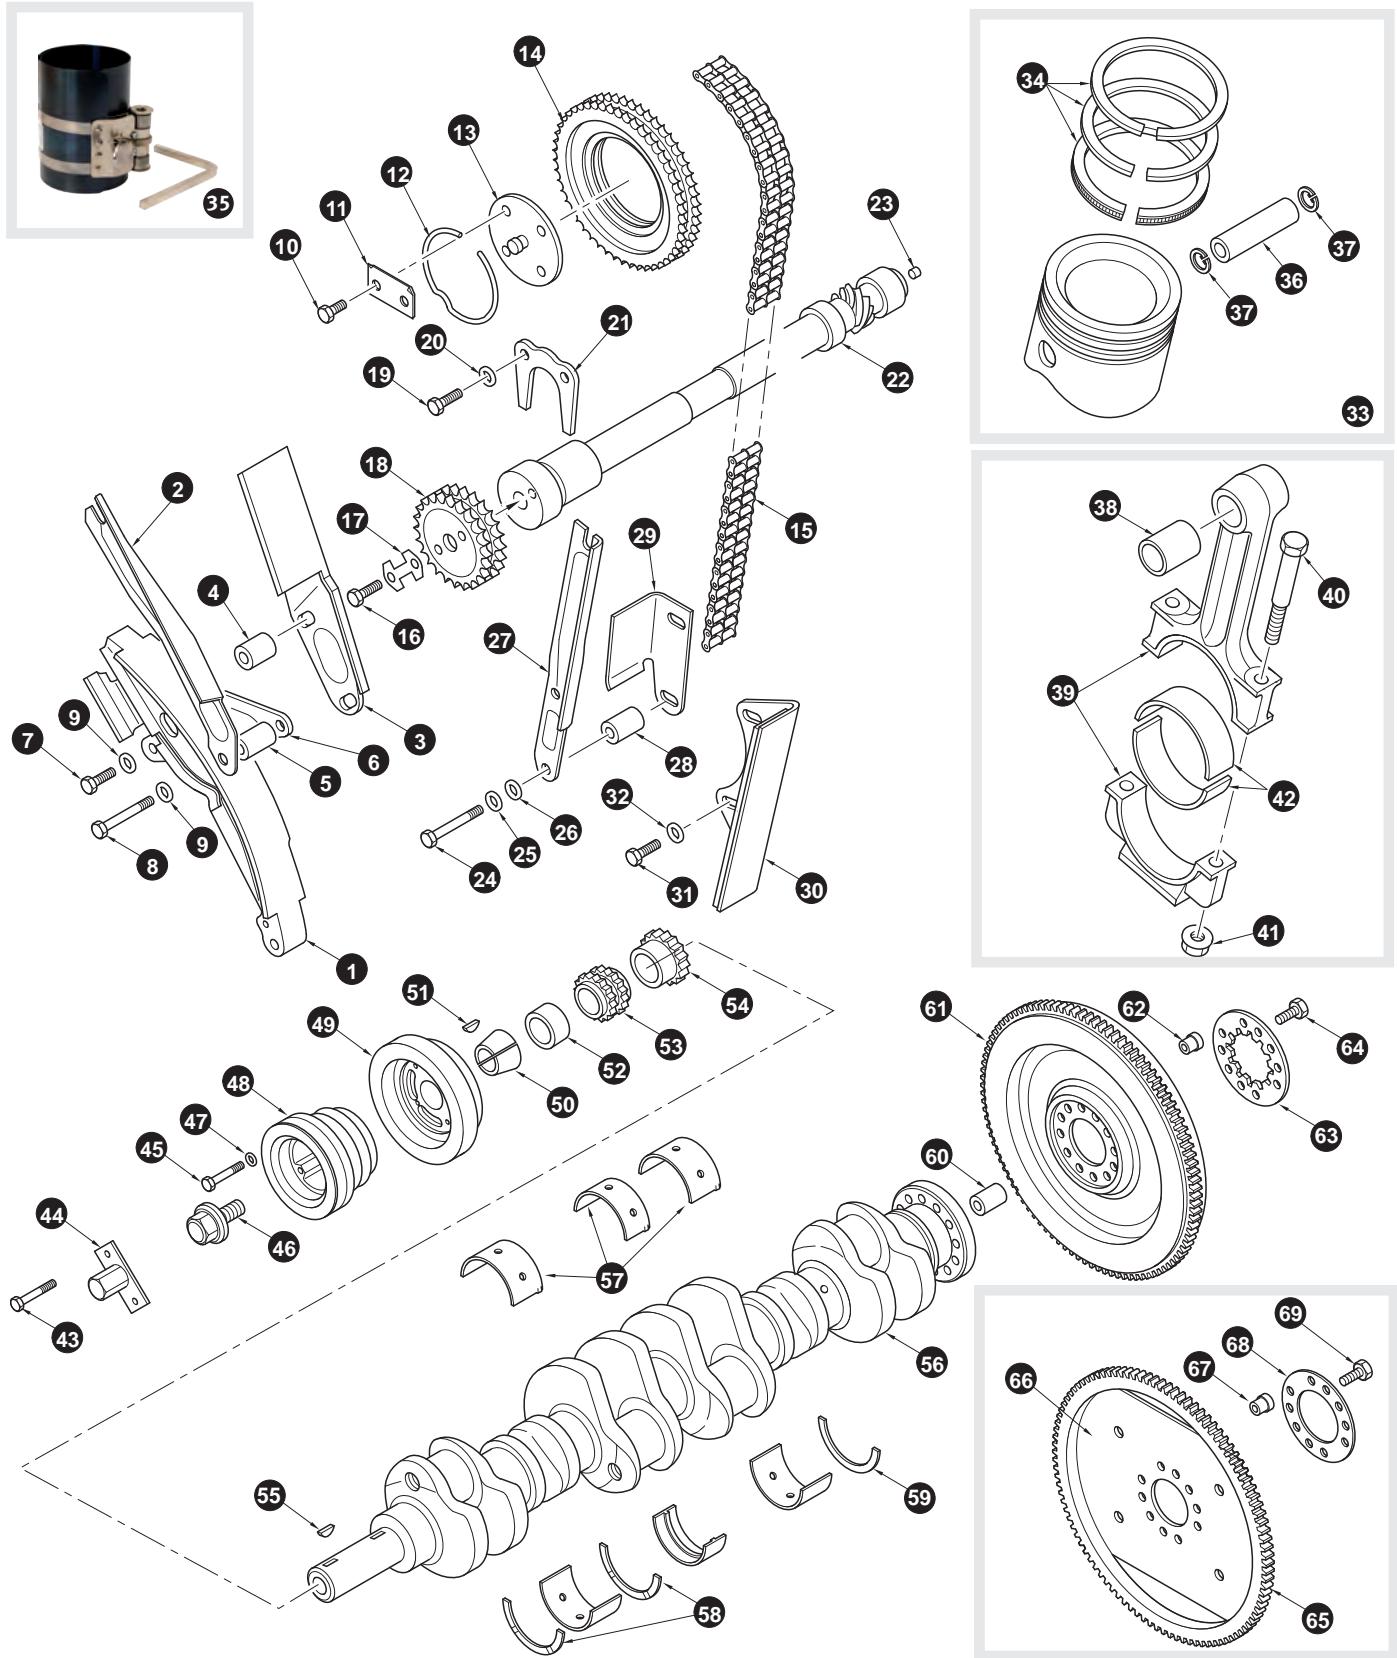

- Increased delivery volume
- Ample reserve.... even at the end of the long oil pipes.

Part no. 503781

## Flywheel

Our aluminium flywheels are made of the highest quality 6061 T6 aluminium. The material is fantastic for strength, heat dissipation and of course reduction in weight. The friction surface we use is an incredibly strong 1045 steel. The plates are milled to meet our high specifications. The flywheel can mate with any type of clutch material, including organic, kevlar, ceramic, metallic and sintered iron. We attach the replaceable friction surface with military grade aerospace fasteners. With these replaceable plates there is no need to replace the entire flywheel when the clutch or flywheel is at the end of its life, saving time and money. The ring gears we use are also made from 1050 steel and are heat treated for durability.

The gears are heated then pressed on and secured with grade 8 button screws. We were the first to utilize a stepped dowel system in most of our flywheel applications. This doweling method ensures that once the pressure plate is installed the dowels cannot be removed because they become locked into place. No steel flywheel can compete with the awesome serviceability, strength and superior design of our aluminium flywheels. If there was a better material out there, we would be using it.

Lightened aluminium type, with ring gear assembly

### Penrite Engine oil

This premium oil offers a unique viscosity range, is non-friction modified, multigrades made in Australia specially for high temperatures, high speeds and high loads. Formulated for use in conventional engines operating under a high load environment. It provides better oil pressure and consumption control. A SAE20W/60 oil, which replaces originally recommended SAE30 und 20W/50 oils. This oil meets the requirements of API SM/CF, ACEA A3/B3, M2C 153G, VW 501.01.

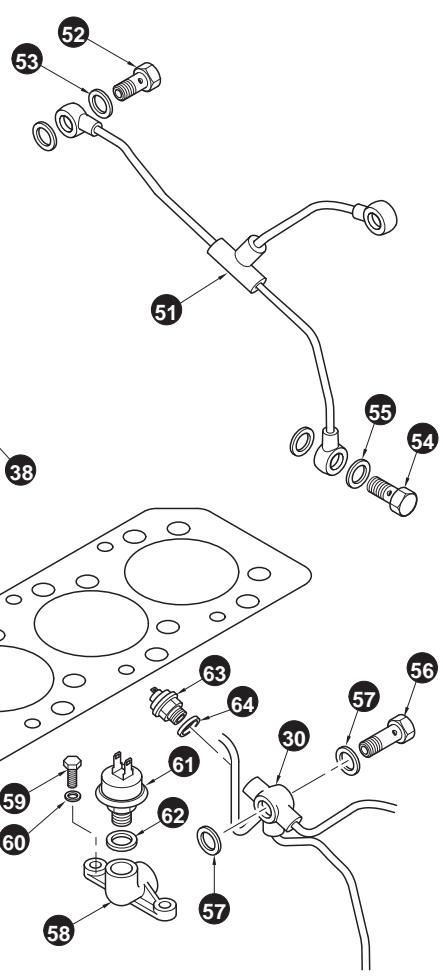

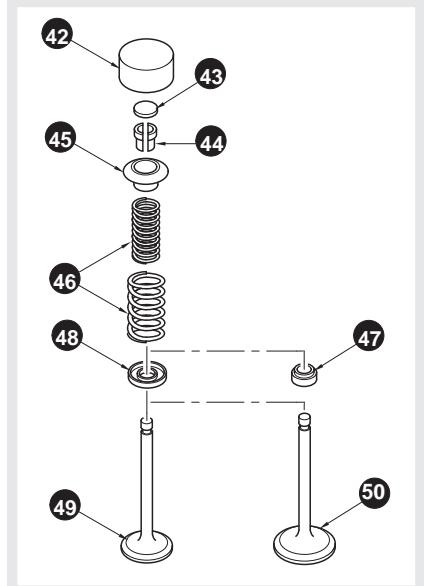

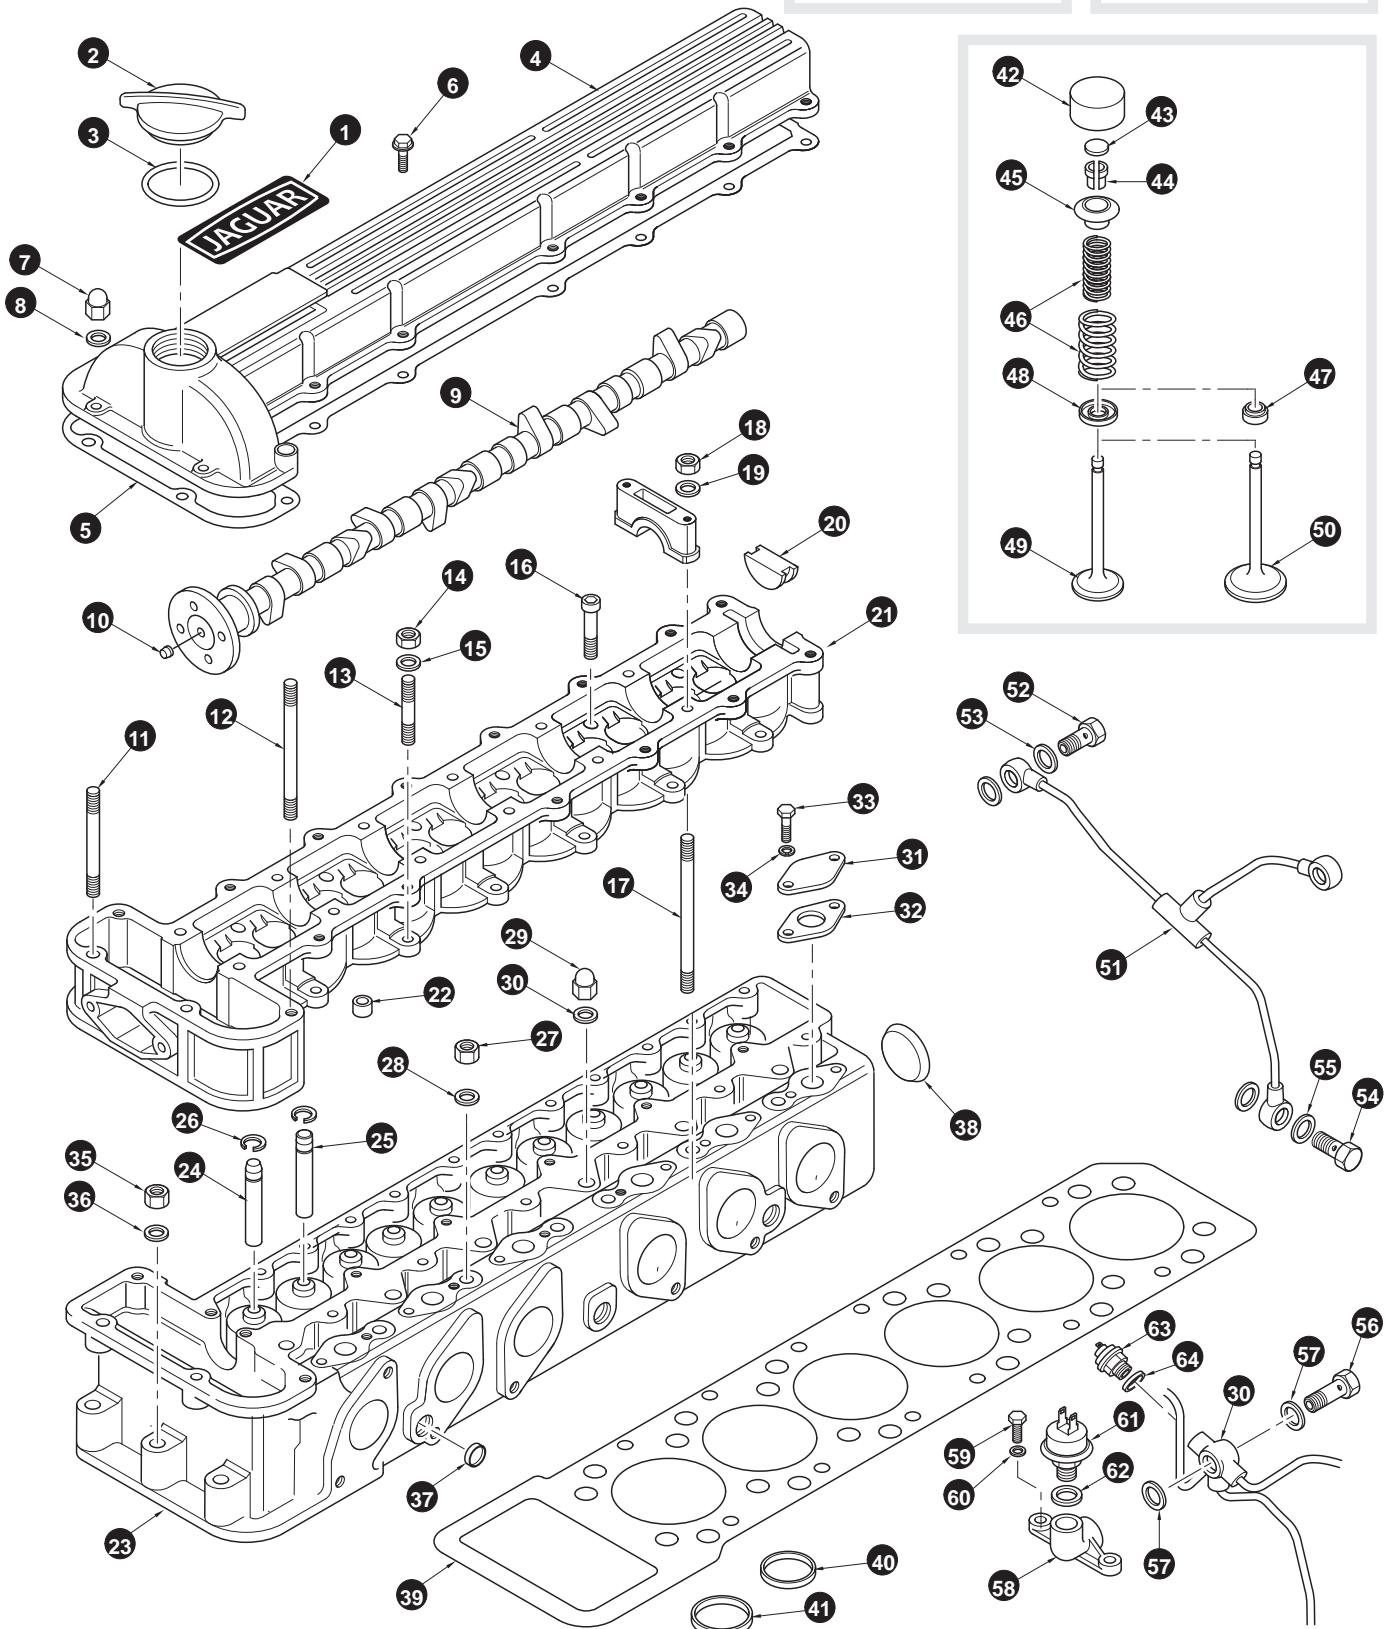

Classic Light 20W-60 - for vehicles post 1950. For use where SAE30 and 20W-50 oils were originally recommended, 5 liter

67	<b>202207</b>	Payen Cylinder head gasket set.....	1	

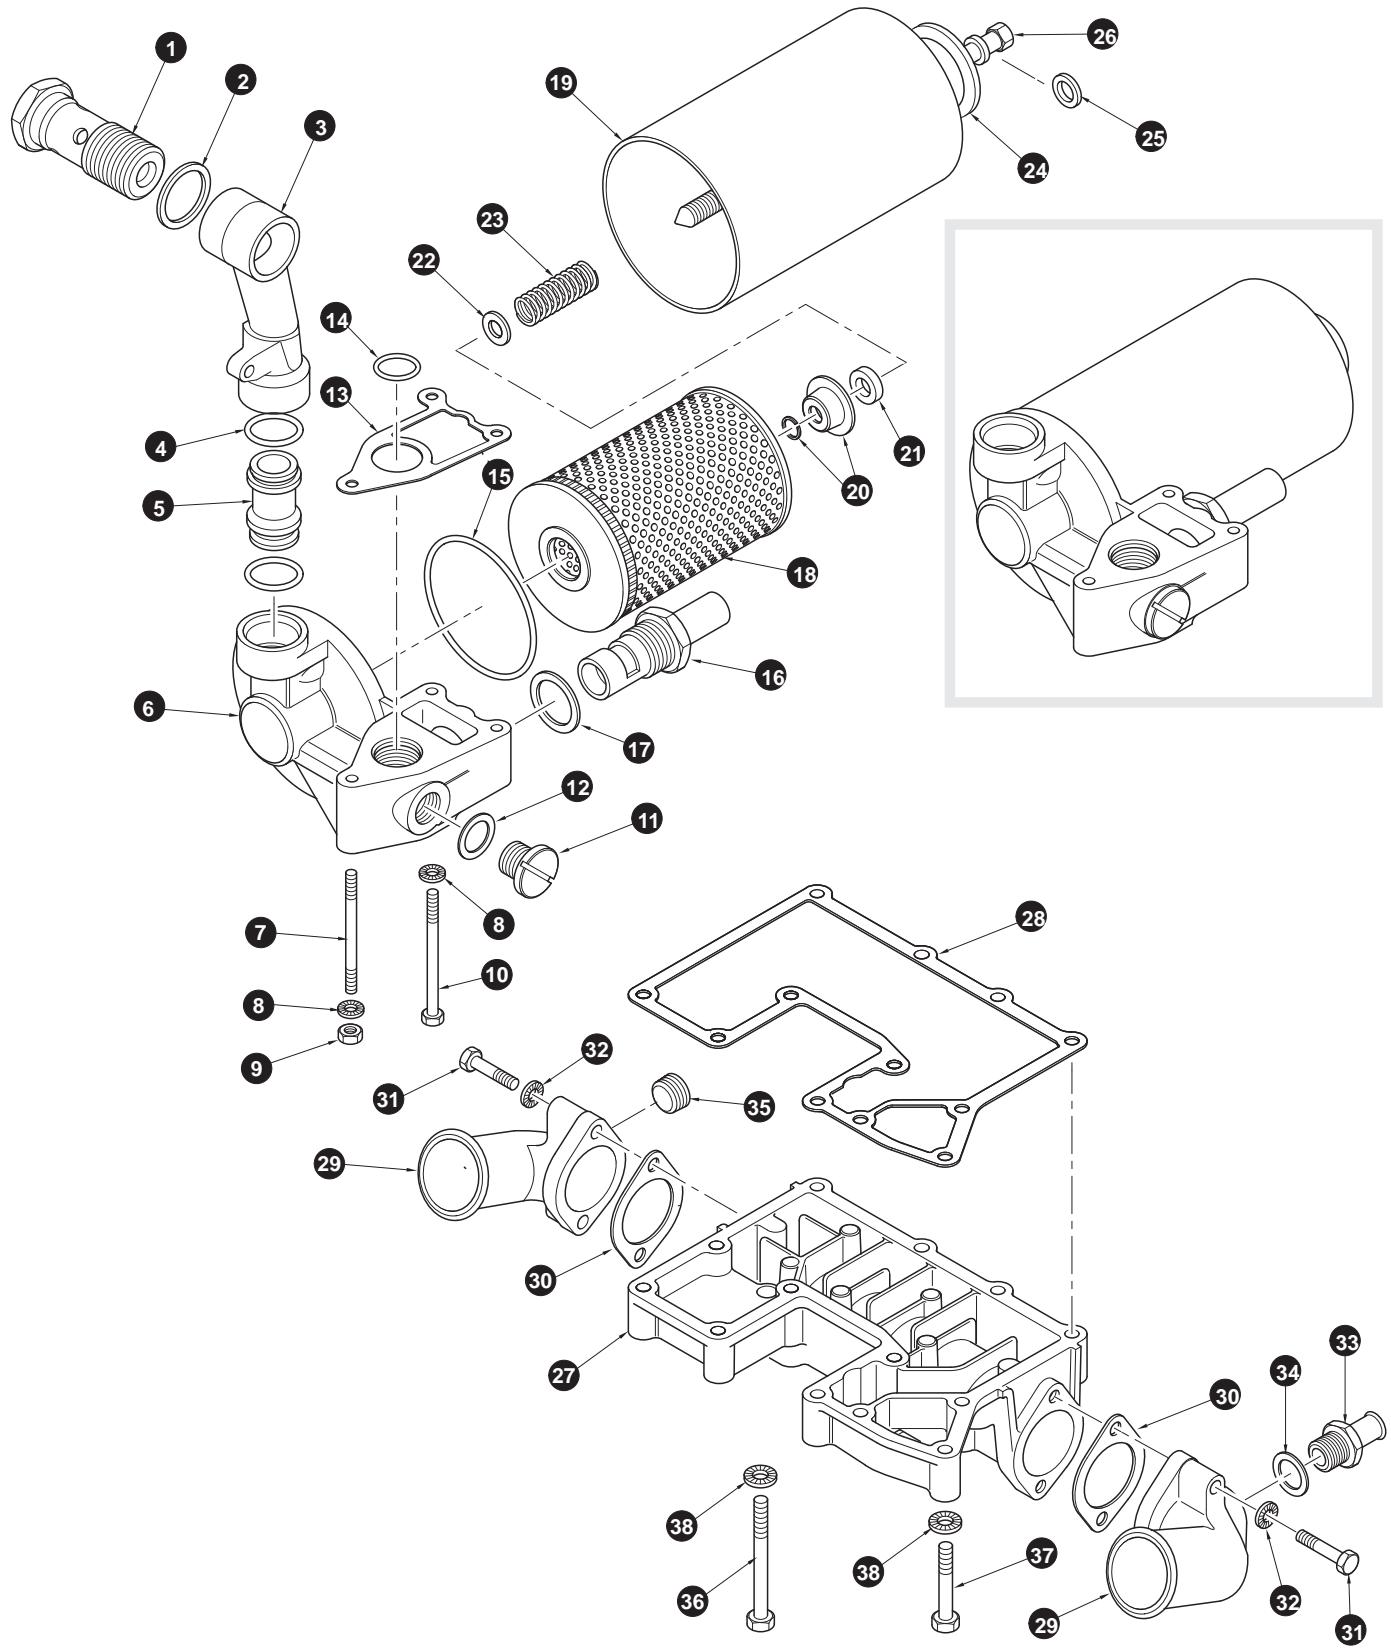

#### Tappet adjusting pads

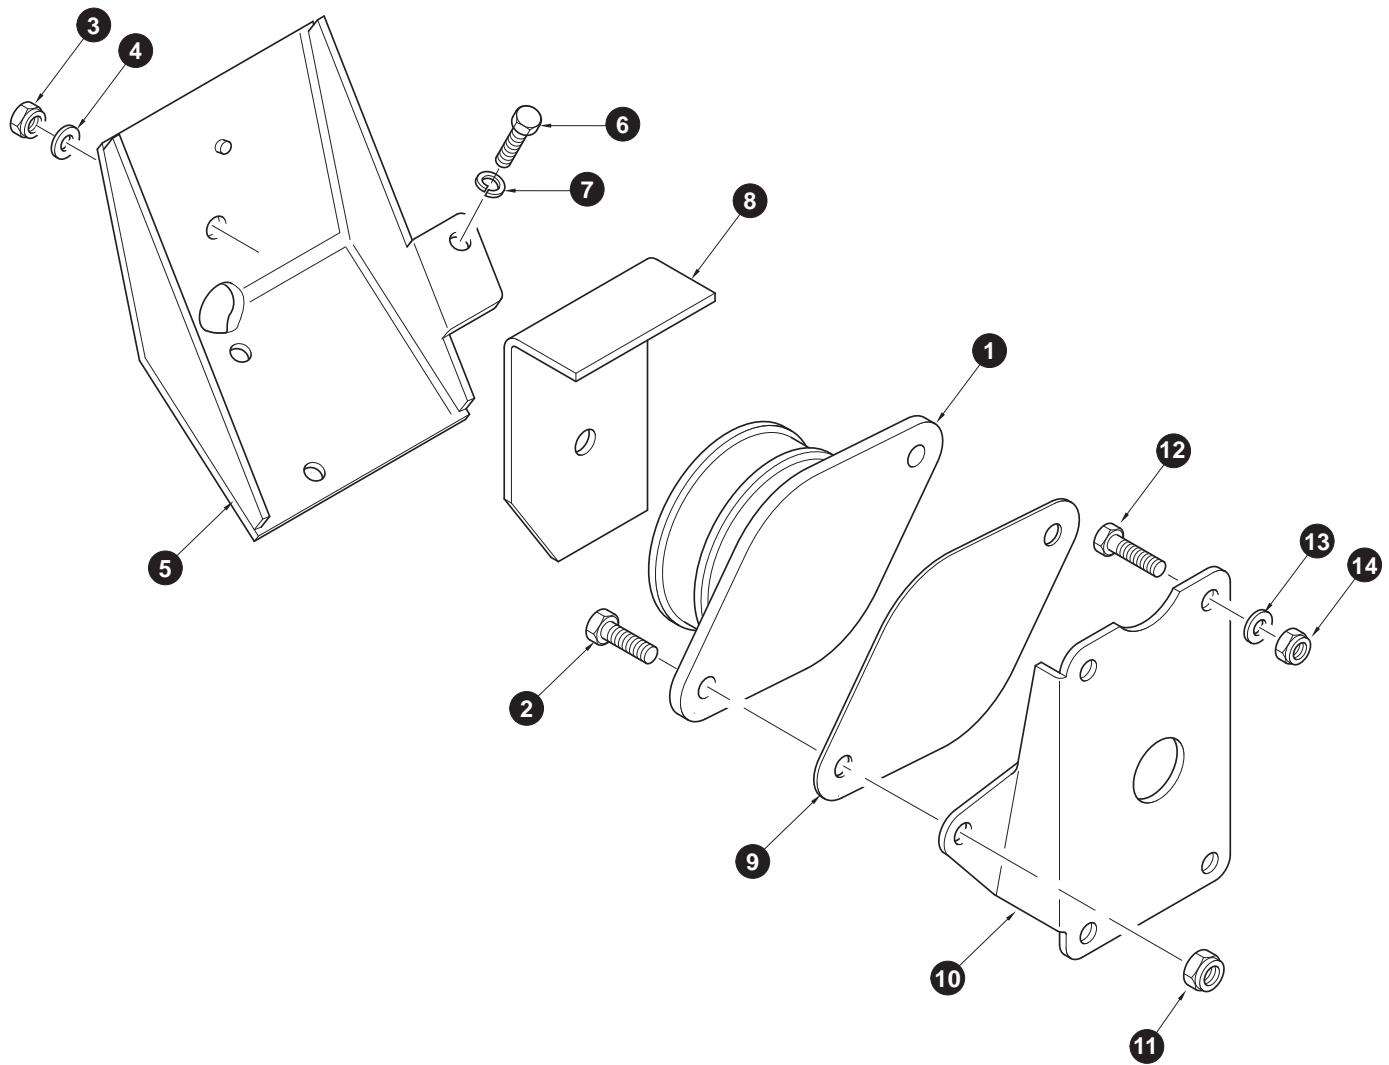

All neatly arranged in a compartment box are three each of shim sizes 0.085" to 0.092"; four each of sizes 0.093" to 0.103" and three each of sizes 0.104" to 0.124" - that's 124 shims at a retail value of more than 300 pounds! All shims made in Europe with either part number (standard A-Z range) or size (0.111" to 0.124") laser etched on shim.  
From 0.085 to 0.130"  
(from 2,16 mm to 3,30 mm).  
Supplied in sets of 124  
Part no. 490223

#### For the environmentally friendly oil change:

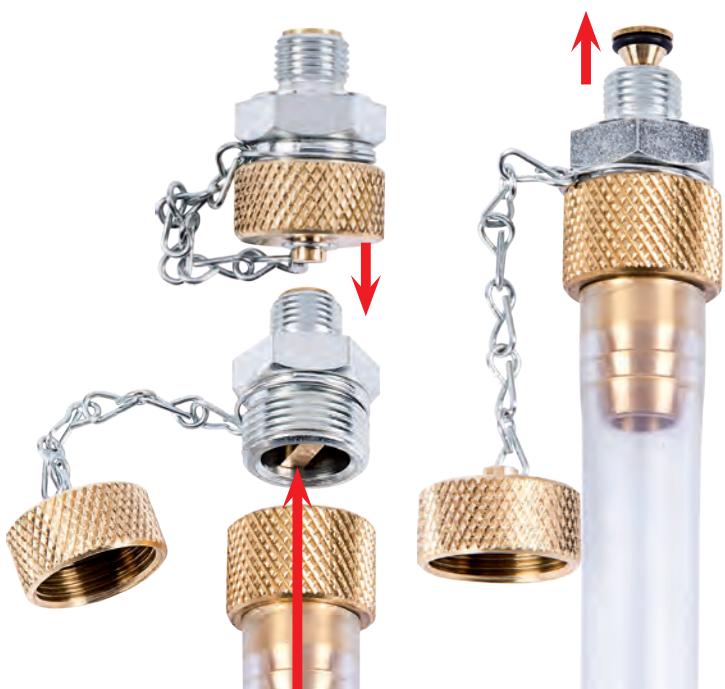

No more dirty or burnt fingers, no spatter, no spill, no contaminated soil - no bad conscience. We produce this high quality product from the finest materials in a medium sized workshop in Germany. The system is a simple but ingenious screw drain with hose connection. The shutter opens automatically and closes automatically when the drain hose is unscrewed. No more worries about ruined threads or forgetting to replace the cap. Even though you dont see this item very often it is still a classy feature.

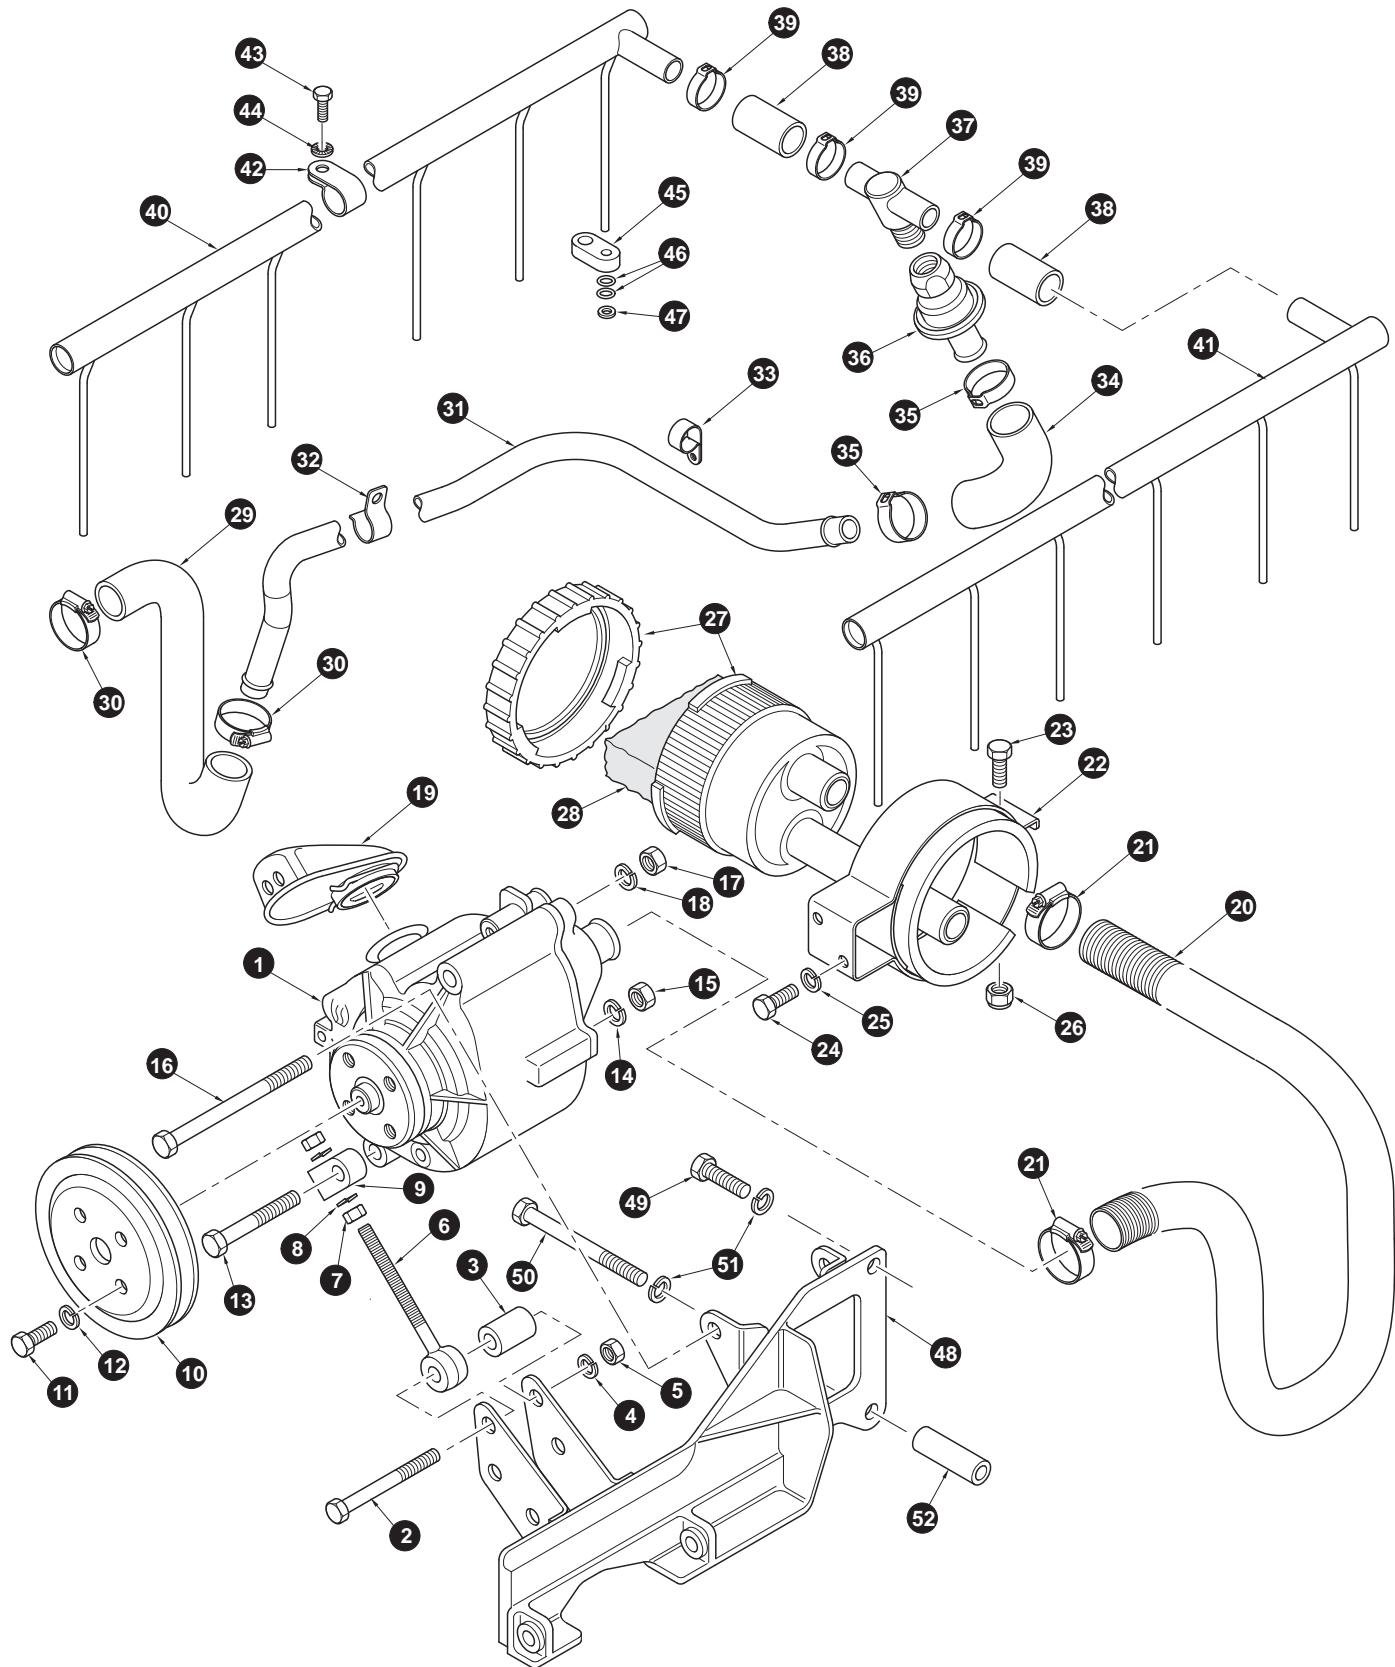

#### Oil drain valve

valve thread: 5/8" UNF, connector thread: M 26 x 1.5,  
steel..... Part no. 487914

#### Connector

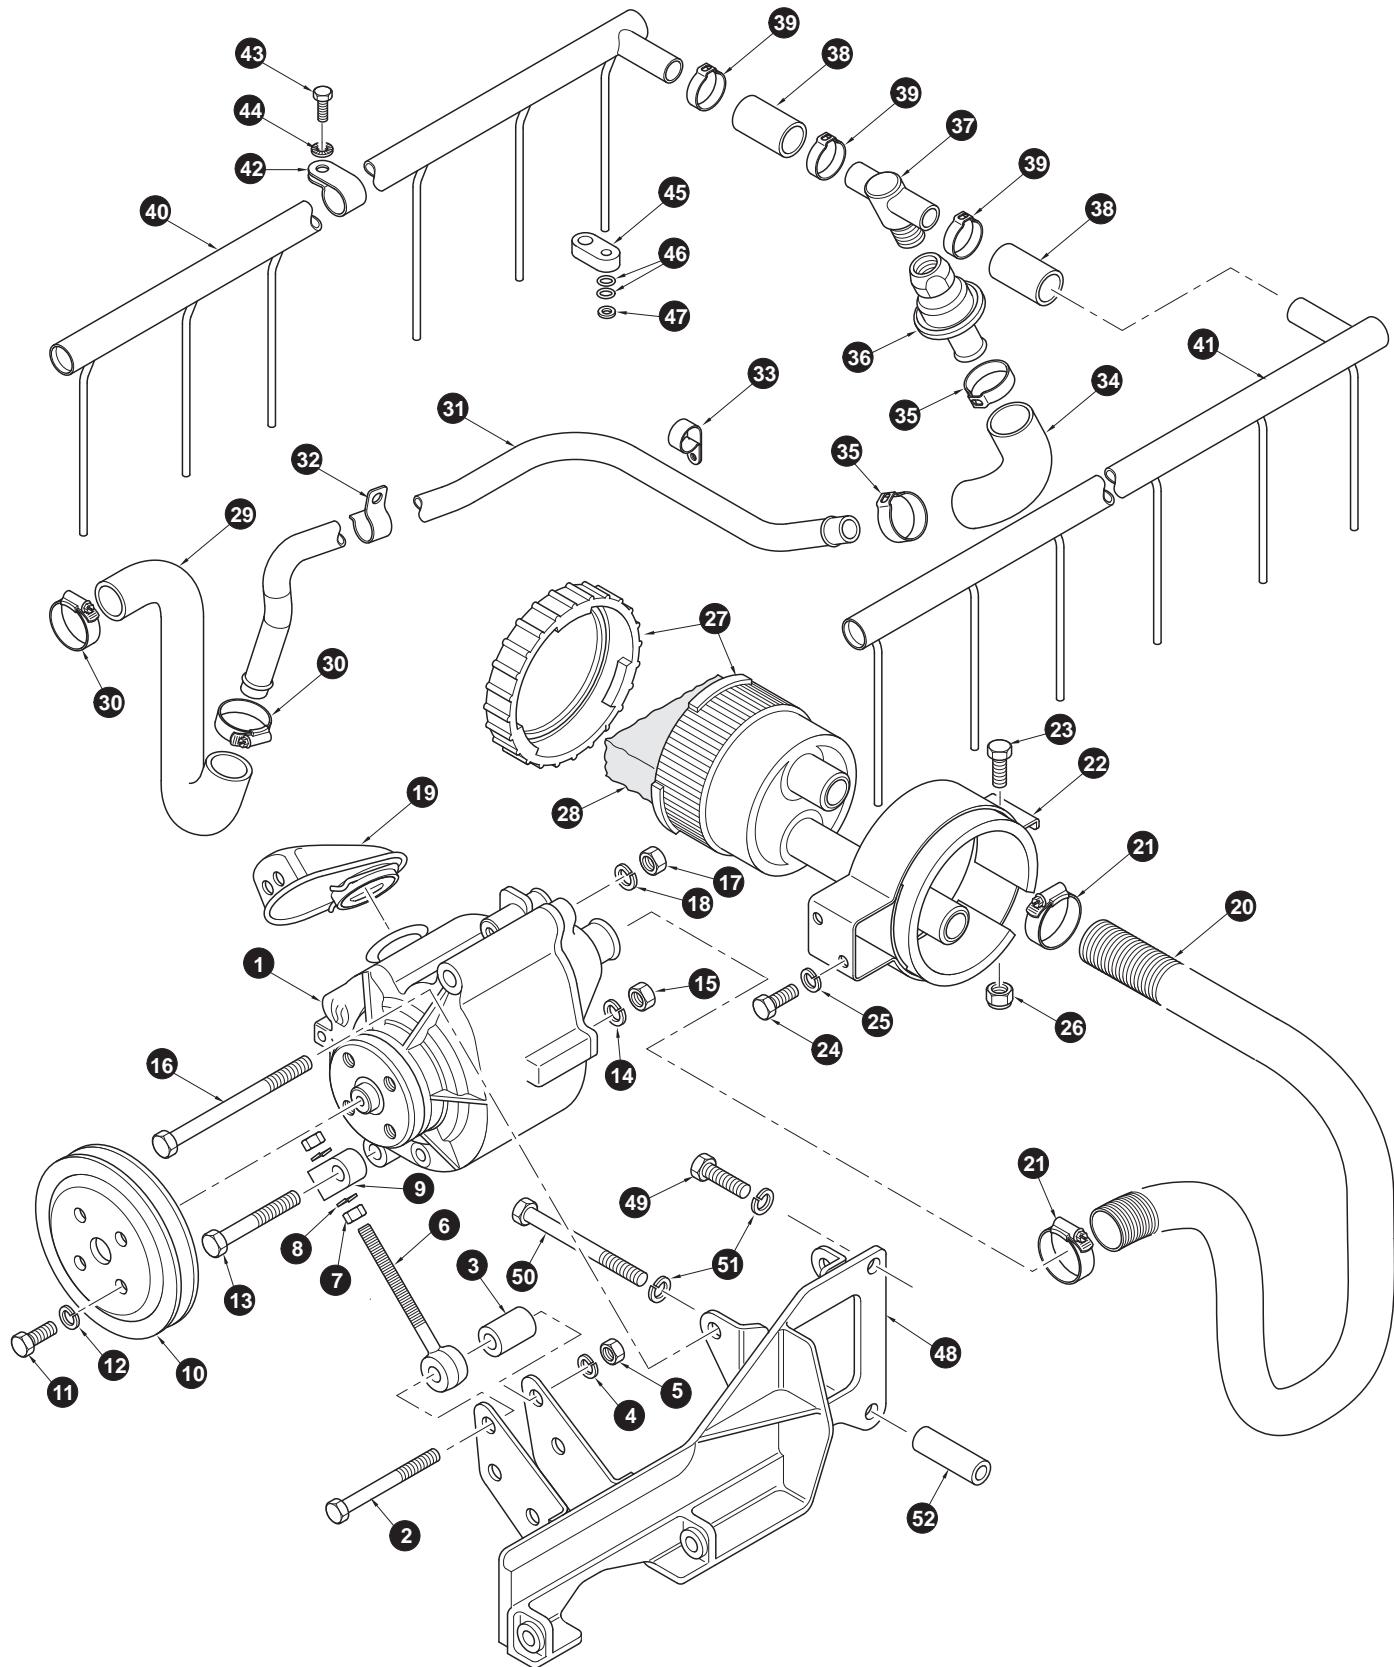

for oil drain valve with M26 x 1.5 thread - angle: 0°,  
hose length: 50 cm ..... Part no. 488094

#### Let your Big Cat roar with our very own Weber power conversion

For many years, this style of conversion has typically been difficult to fit and the quality of the components has been some what lacking. This has deterred many Jaguar owners from installing what is quite possibly the ultimate performance conversion for this engine, however....Now we have the answer!

This kit has been developed in conjunction with skilled Jaguar specialist engineers to ensure that fitting is as straightforward as possible, and that the quality of the manifolds and fittings is a match for the legendary quality of the Weber carburettors. Complete with full illustrated fitting instructions and our own Weber Tuning manual, this kit is supplied with six genuine Spanish Weber IDF carburettors and is available to suit both carburetted and injected versions of the V12 engine. Please note: Genuine Weber carburettors are cast with the WEBER logo and are stamped „Made in Spain“.

40 IDF type. Complete kit comprising six carburettors, inlet manifolds and linkages

### Penrite Gearbox oil 30

Many cars manufactured in the fifties and sixties specified engine oil (usually the same as that recommended in the engine) for use in the gearbox. Whilst it was convenient to offer this recommendation, no doubt a proper gear oil would have been a better alternative. This gear oil has been designed for this type of recommendation. Application:: Gearbox oil 30 can be used in vintage, veteran and classic gearboxes including those vehicles fitted with pre-selector gearboxes. Benefits: Do not contain friction modifiers so will not cause overdrives and preselector bands to slip. Do not contain EP additives so are compatible with synchro cones and other metal parts. Replaces originally recommended SAE 30 and 20W/50. Specification: API GL1.

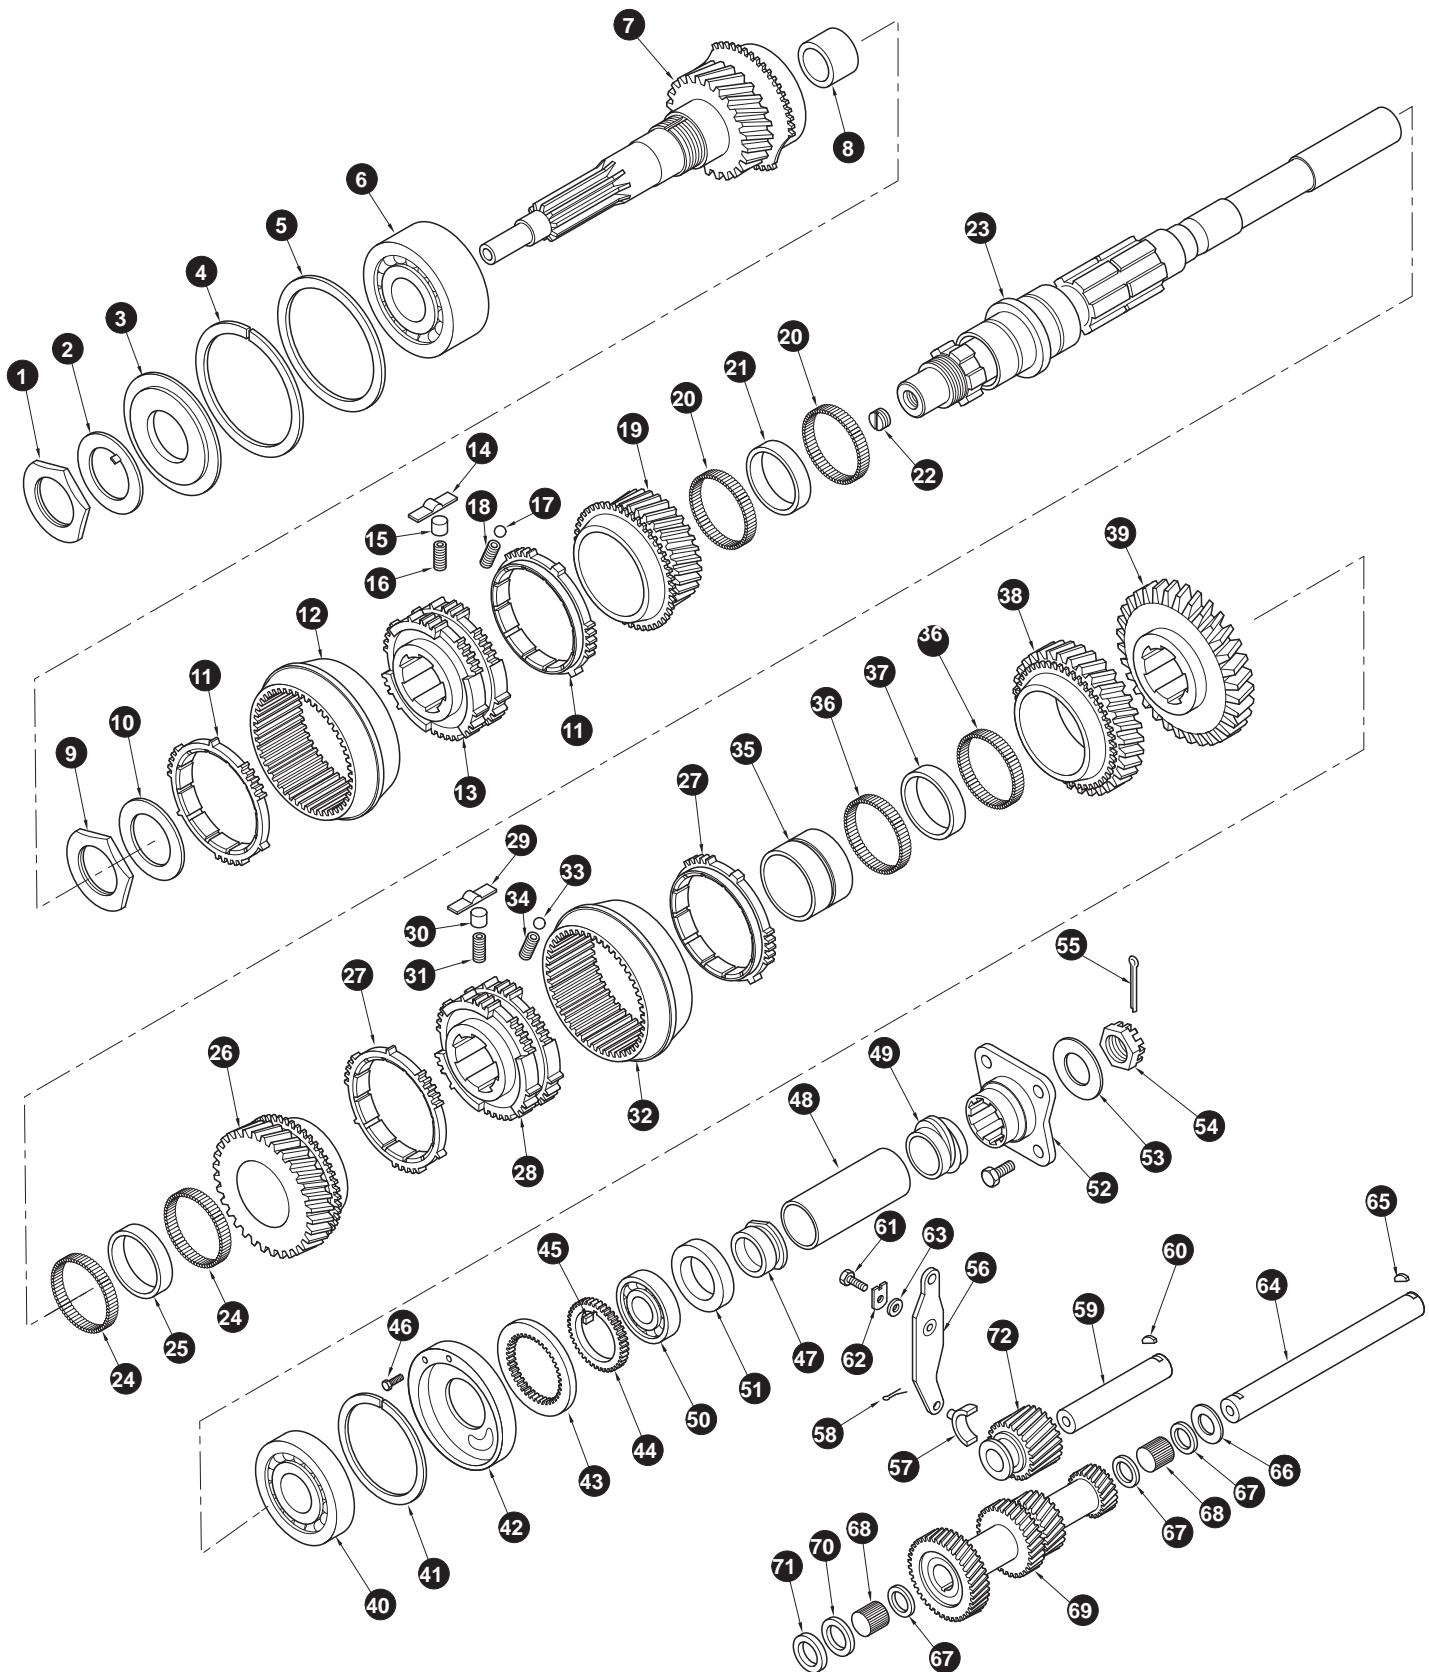

Replaces SAE30 and 20W/50. Specification: API GL1

### Castrol Automatic gearbox oil TQF

Castrol TQF is an automatic transmission fluid specially designed to meet the requirements of the Ford Specification SQM-2C-9010A. It has been formulated from carefully selected high quality mineral oils and incorporates various additives to prevent wear, oxidation and corrosion, 1 liter

Perfect oil for Borg Warner automatic transmission and power steering systems

#### Silicone spray

This spray was invented by the mold release technology. Formulated for use on metal and non-metal surfaces, leaves a dry lubricating film, prevents rubber cracking and drying, displaces moisture. Perfect protection for hood frames, door glass seals and much more...  
400 ml ..... Part no. 338785

#### Multi purpose oil

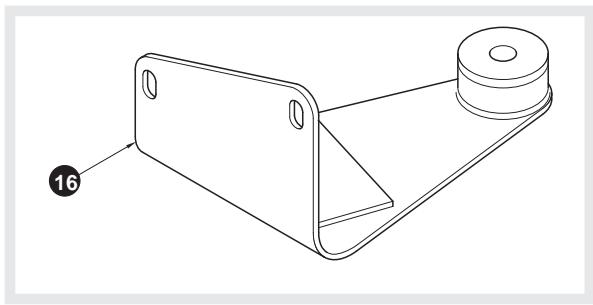

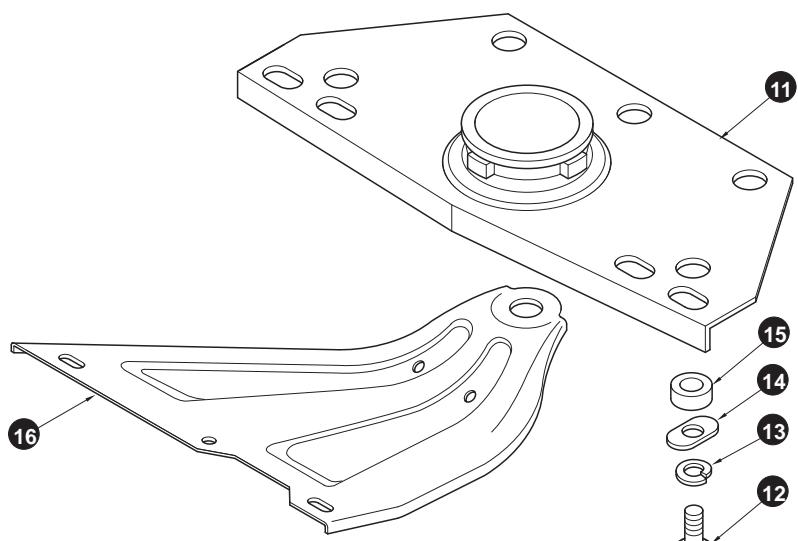

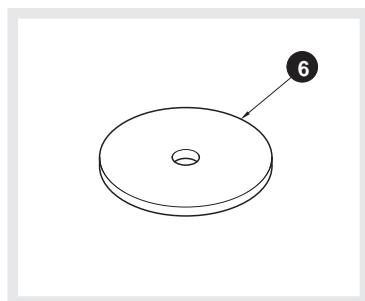

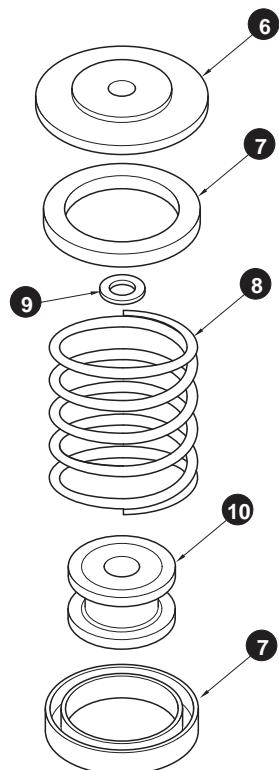

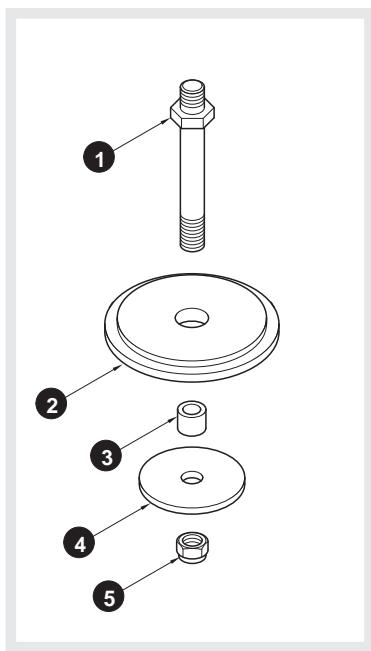

Eliminate scuff marks from tile floors, remove water spots and mildew on mirrors and windows, clean dirt marks and crayon from walls and floors, lubricate sticky cabinets and drawers, stop squeaks on door hinges and furniture.  
400 ml ..... Part no. 294716

#### White grease

Particularly creeping capable, even in heavily accessible places. Enduring lubrication preventing wear. Non-emulsifying, makes contact at once. High lubrication power.  
400 ml ..... Part no. 319050

### Electric fan

with thermostatic switch.

Technical data: Twin fan,

diameter 305 mms,

installation depth: 63 mm,

air flow rate: 3000 m3/h.

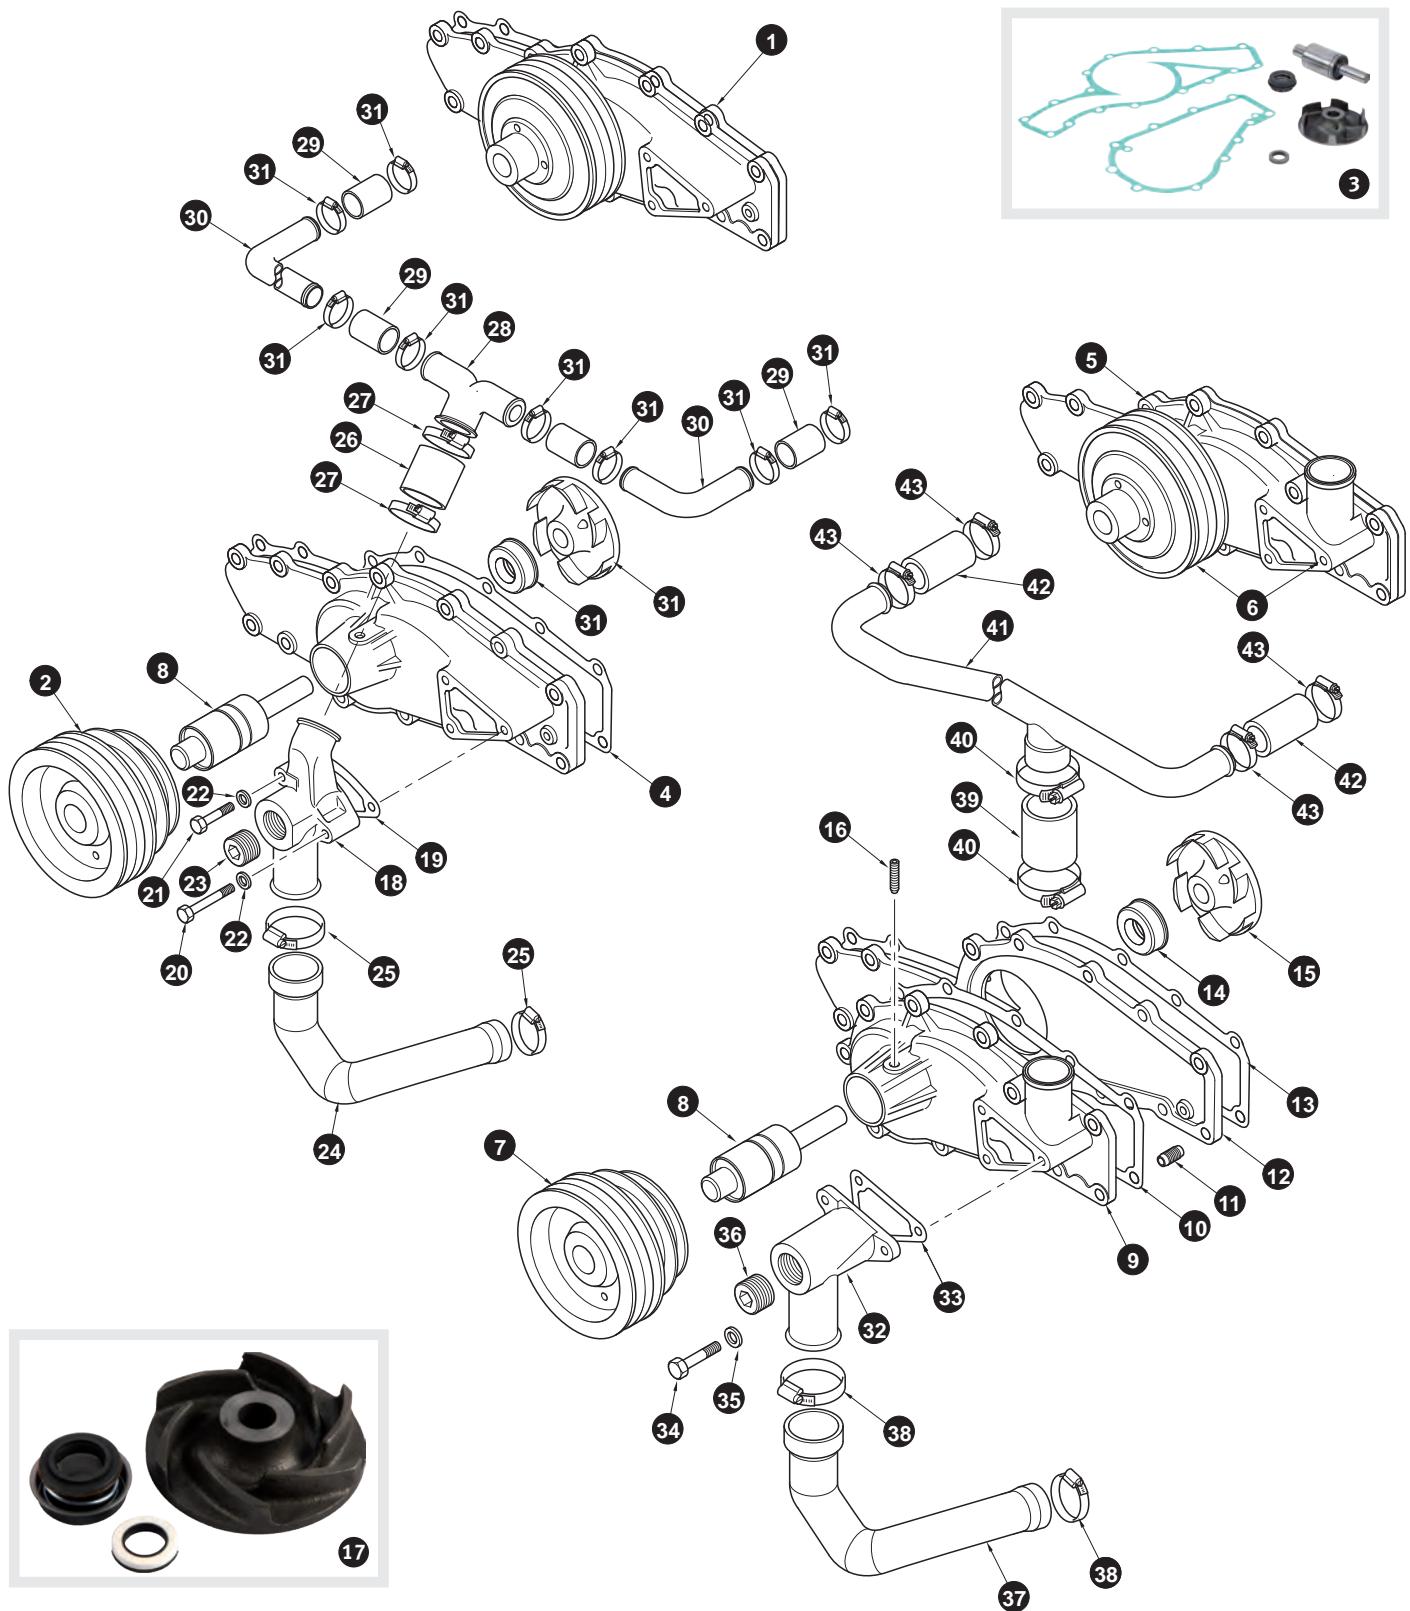

Fitted between grille and radiator.

Part No. 342041

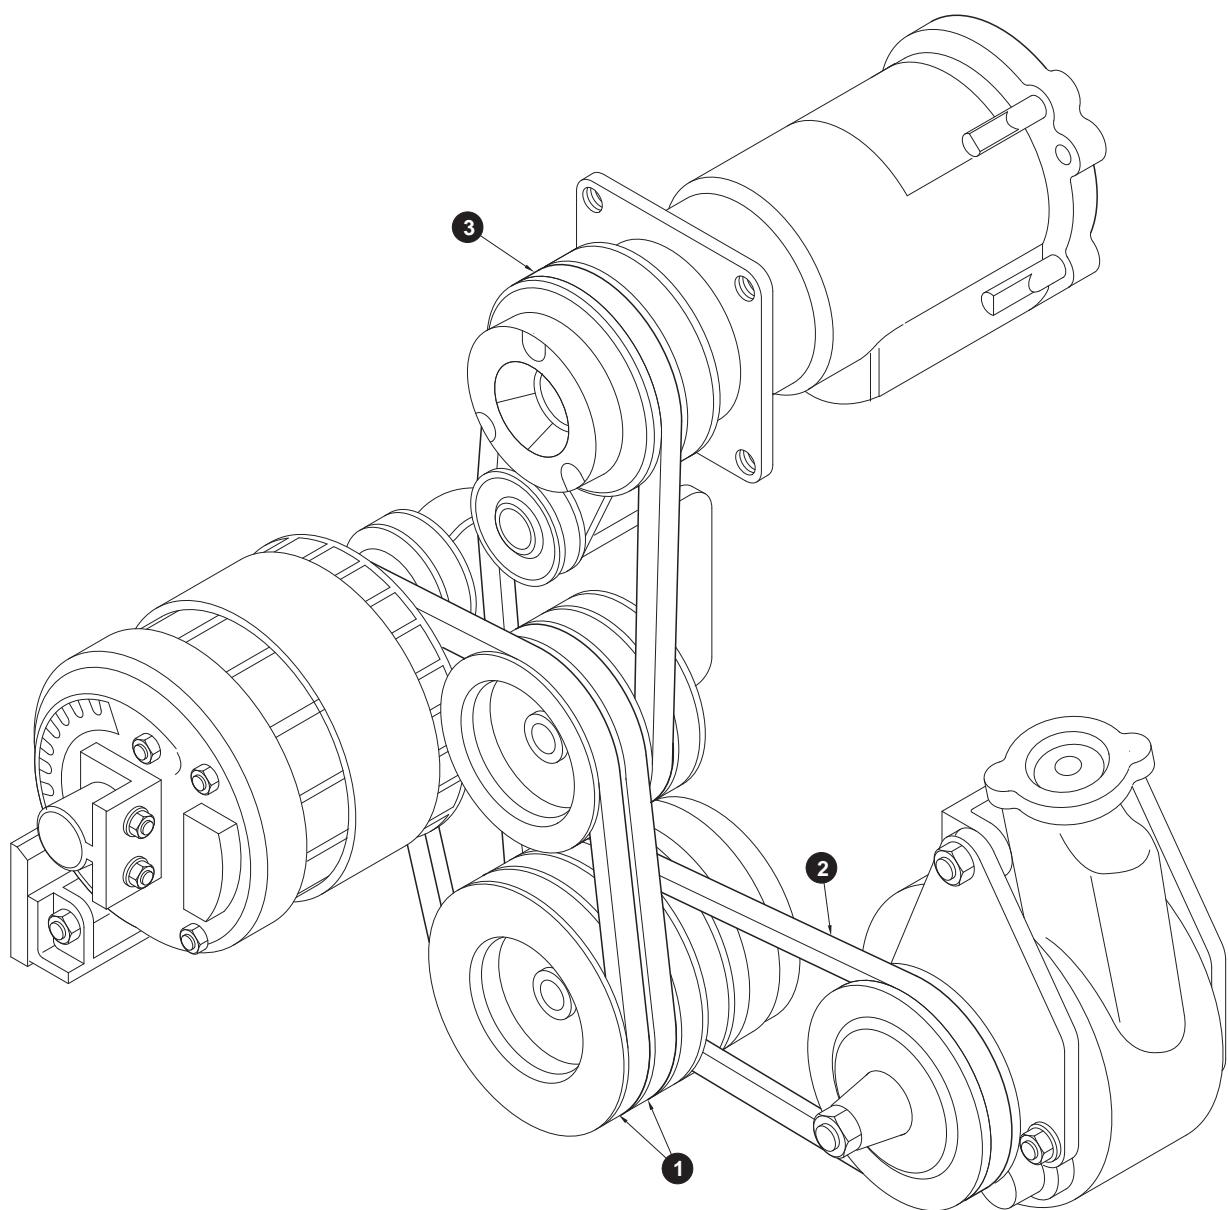

# 4.3

#### Air conditioning compressor „Cool cat“

A factory-new airconditioning compressor for classic Jaguars, Mercedes V8 and Opel Diplomat V8. Developed for us by a leading car airconditioning manufacturer. The over 50 years old construction of the wobble yoke is replaced by a high tech axial piston pump. Your advantages:

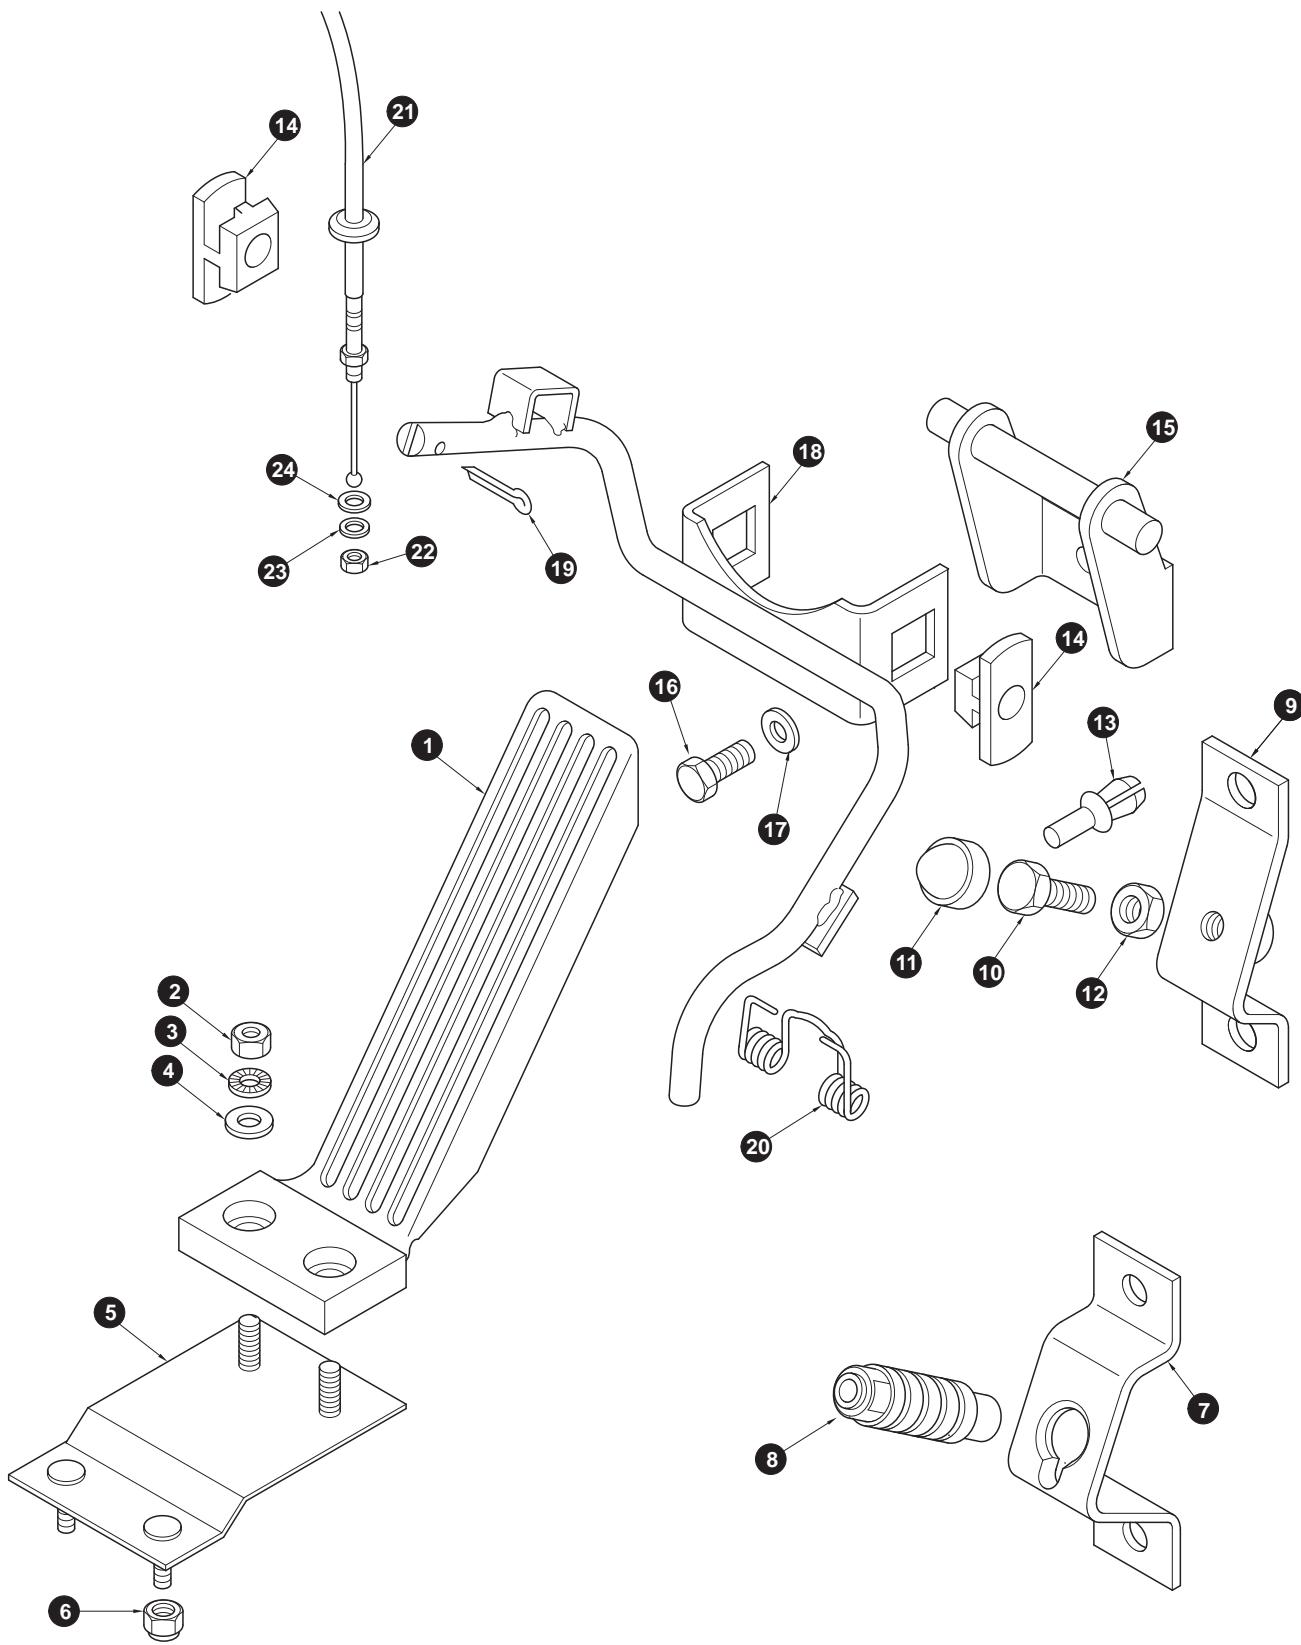

- only 5.9 kg instead of nearly 16 kg
- half the power consumption
- doubles the cooling efficiency
- simply replaces the old compressor
- no alteration required

#### Don't let leaks, drips and spills ruin your day!

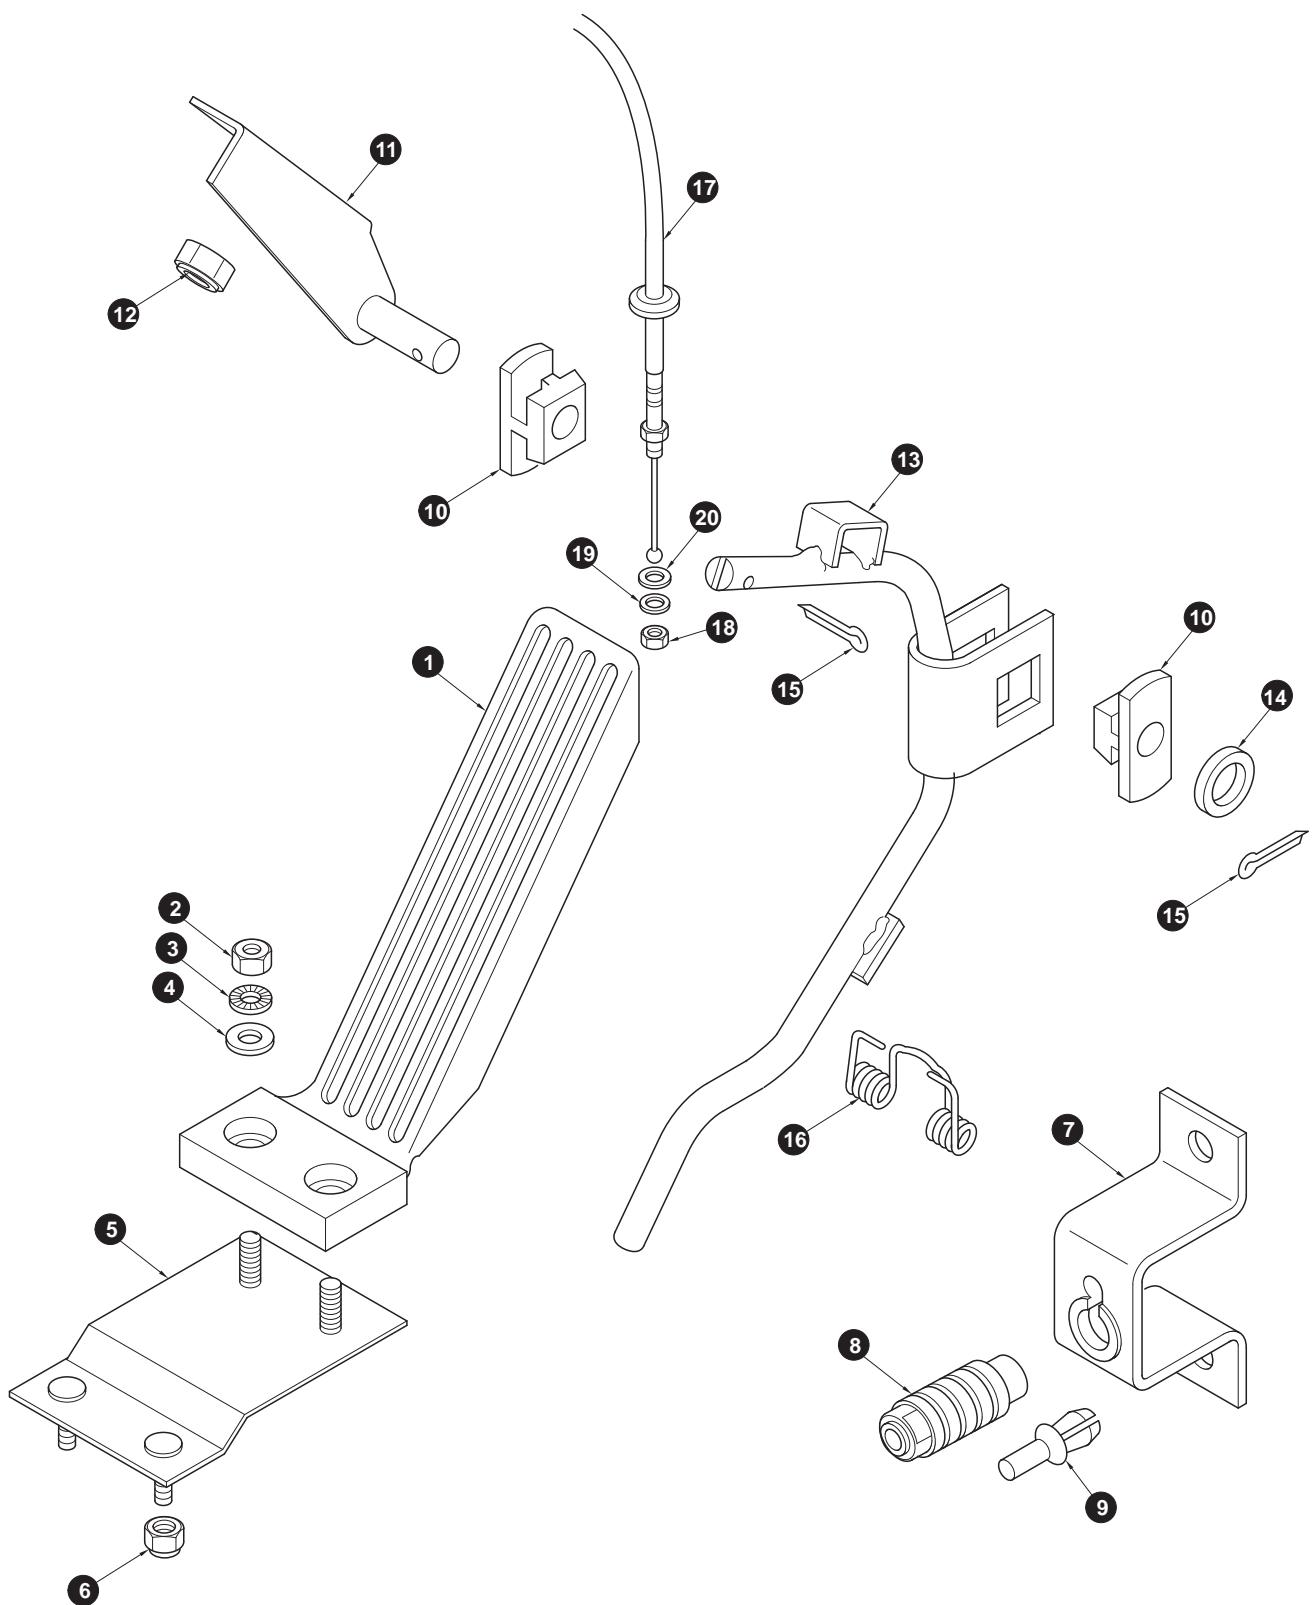

Our oil binding mat is a poly backed industrial rug that shields and protects garage floors and work surfaces by absorbing fluids without allowing them to penetrate the non-slip poly backing. Leaks, drips, spray and spills can cause damage and stain surfaces under all vehicles. Workbenches, shelves and walkways are also vulnerable to damage caused by spills and moisture. This mat protect surfaces and save hours of cleaning time. Absorbs up to 4 litres of liquid spills, drips and leaks. A highly absorbent top layer is backed by a thick layer of non-slip material that prevents liquids from seeping through to the floor.

Easily cuts to any shape for use in smaller spaces.

Dimension: 90 x 120 cm

#### Grease gun - New Patent!

Taut spring supplies necessary pressure! Feeds grease automatically! The stable construction with extra-long handle creates an extremely high pressure.

The grease will be pressed into every corner deep in the bearings. A new type of patent allows cartridge replacement without the annoying fat graffiti. The amount of grease which is still in the cartridge is always clear. New 2 handle system for 500 g cartridges, easy, mess free cartridge change, easy to gauge amount of grease remaining

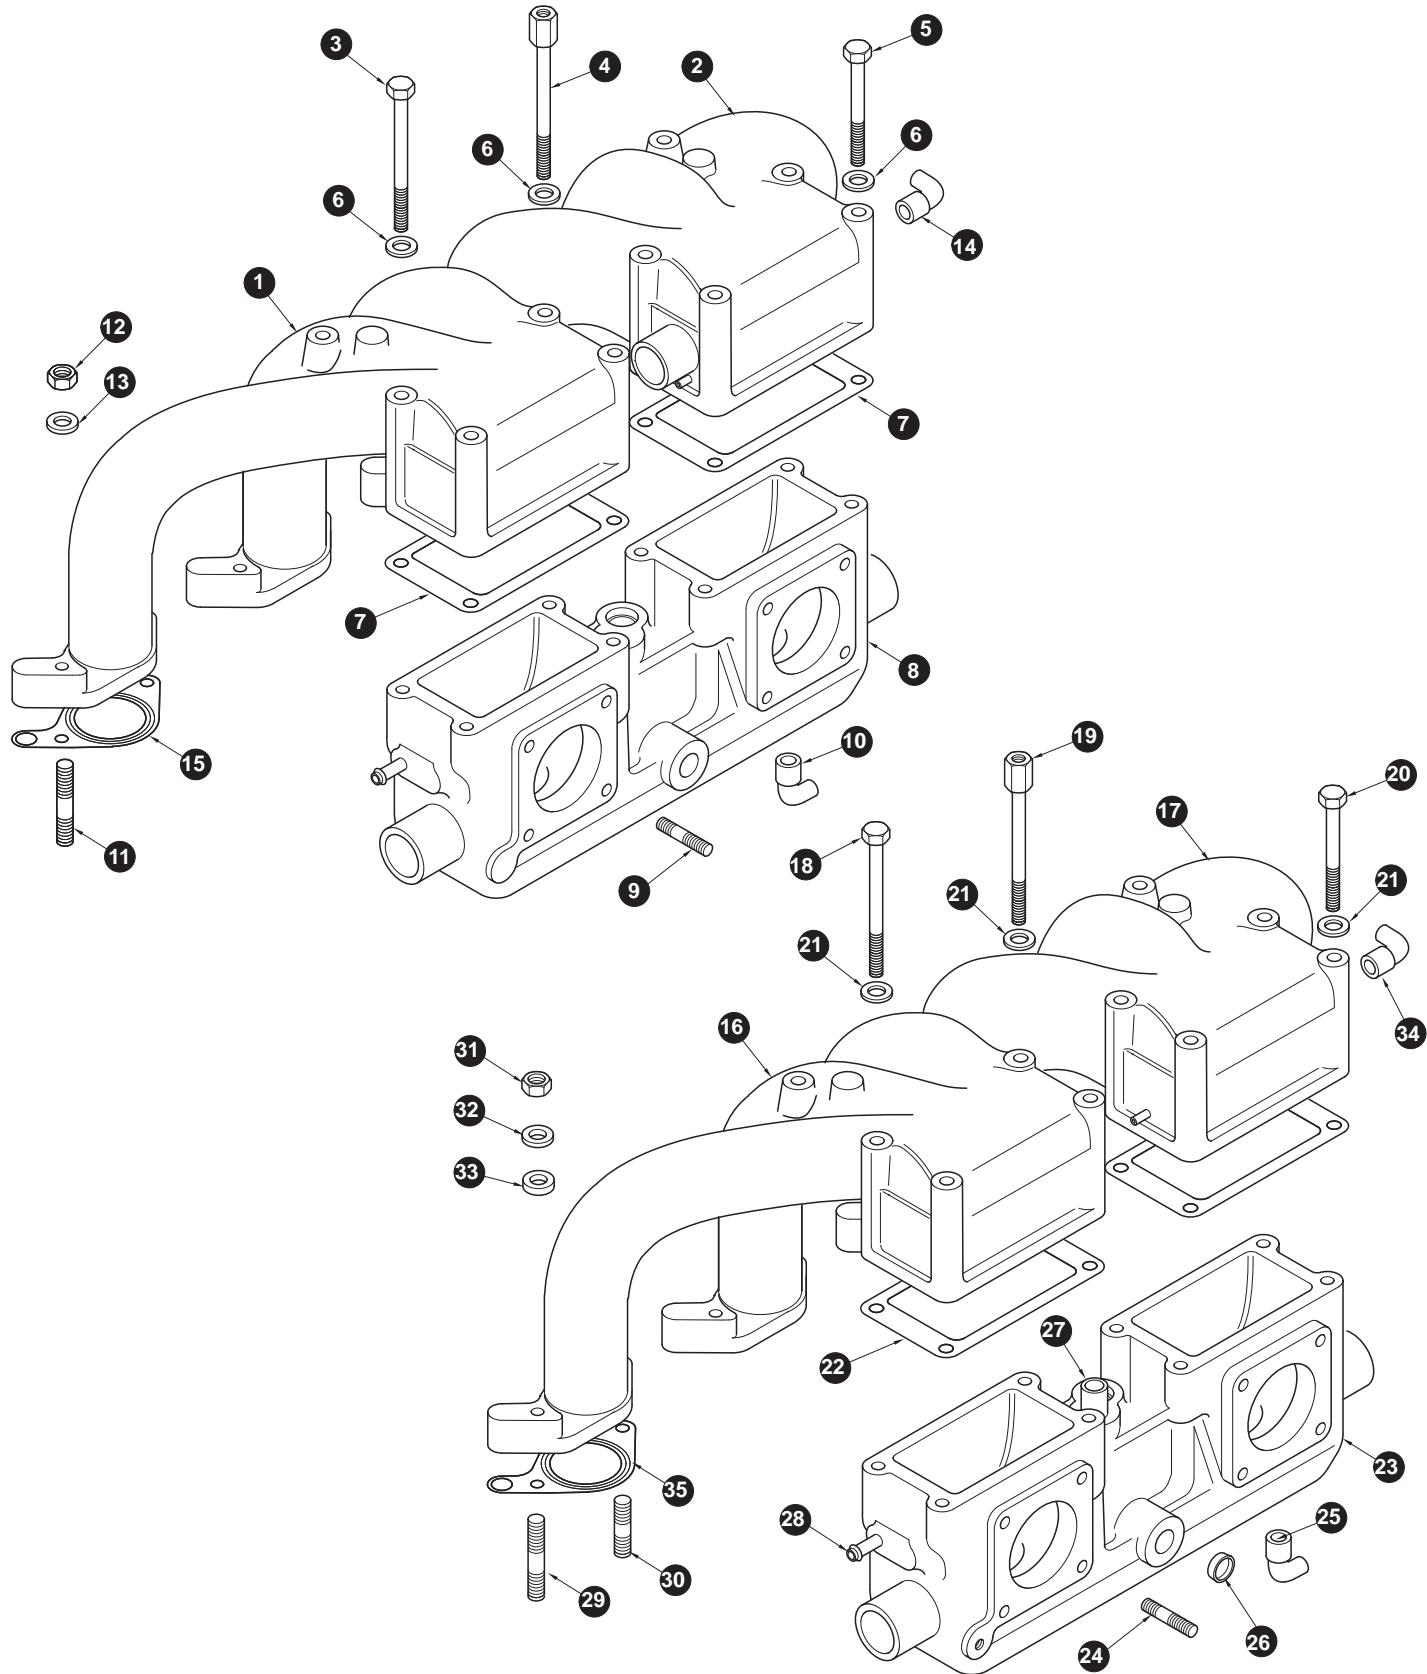

Part no. 220563

#### fitting 500 g cartridges

### Exhaust system

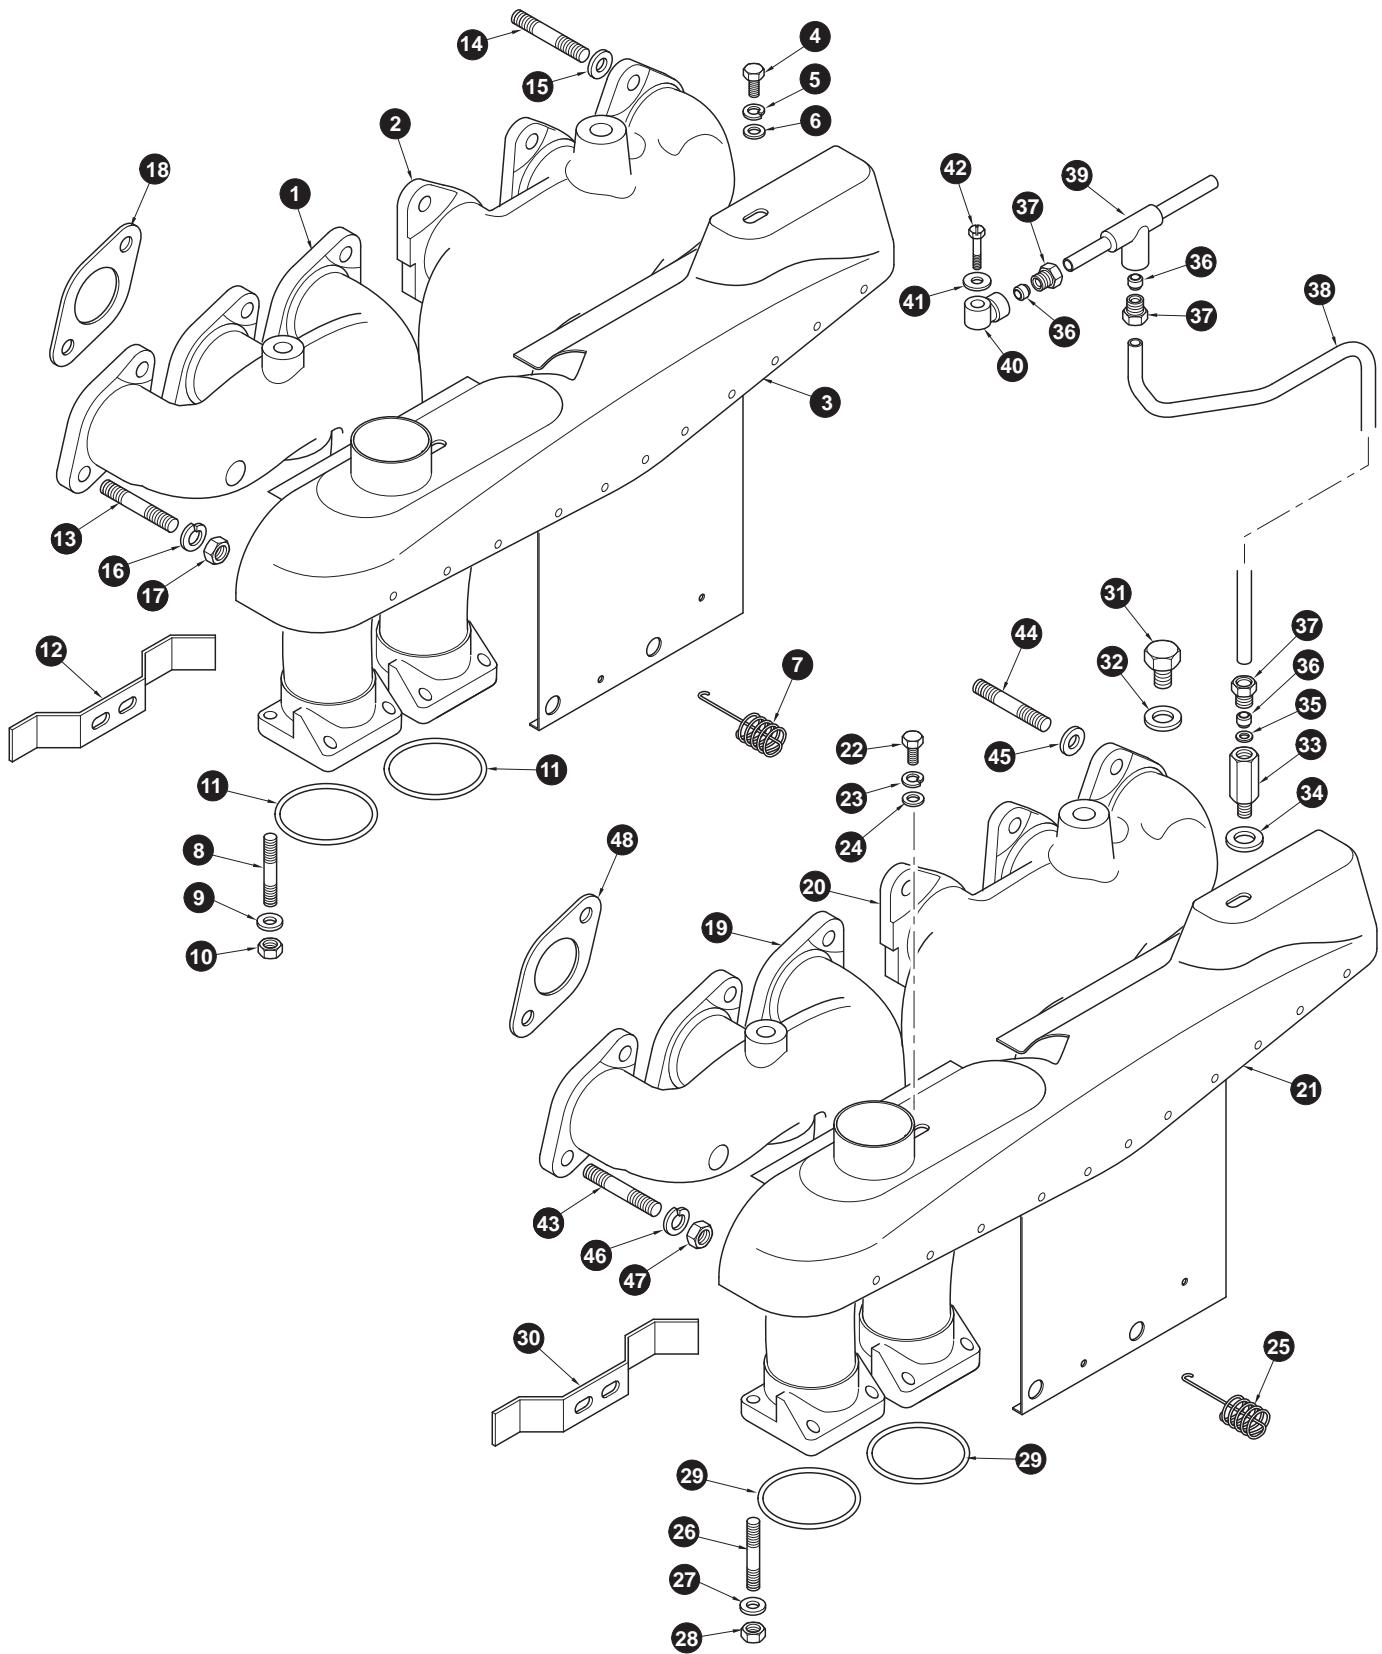

stainless steel. This exhaust comprises of the front box, under axle pipes, rear box to accommodate the quad outlet fan tail which is not included (fitting tubular manifold on page 137).

Part no. 287010

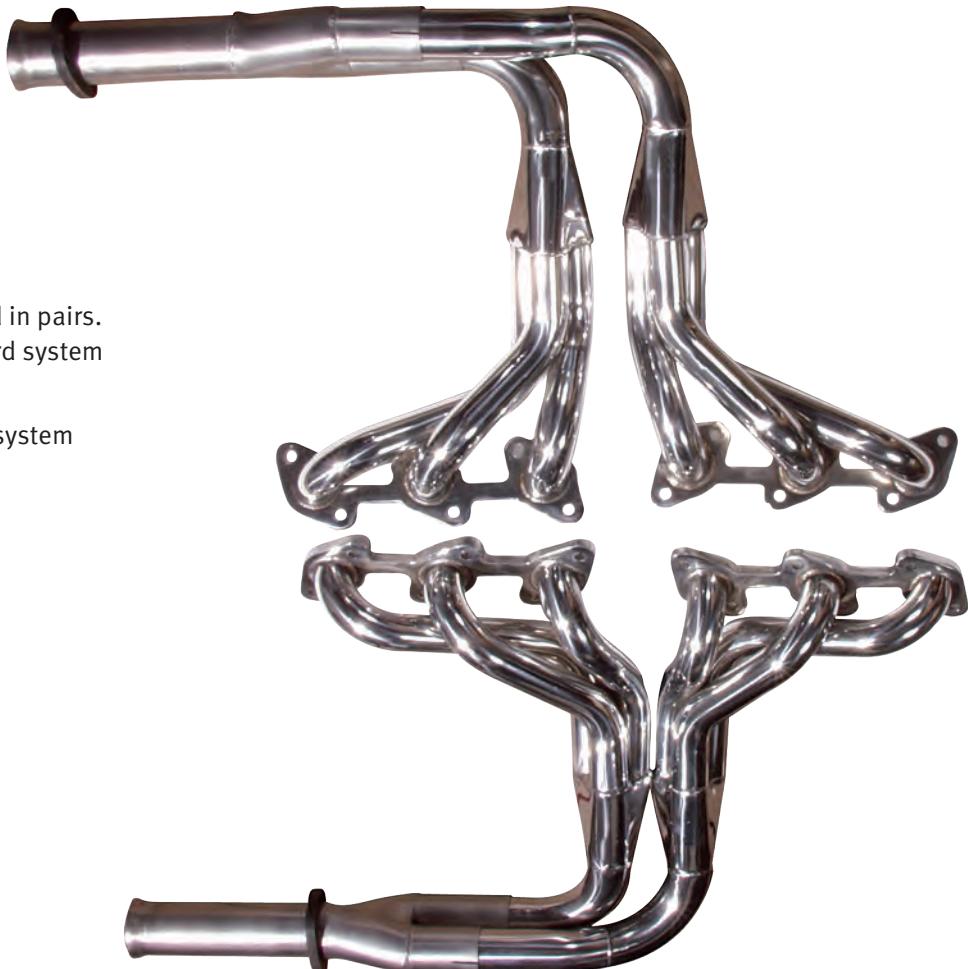

No	Part No	Description	Qty	Notes

### Polyurethane bushes

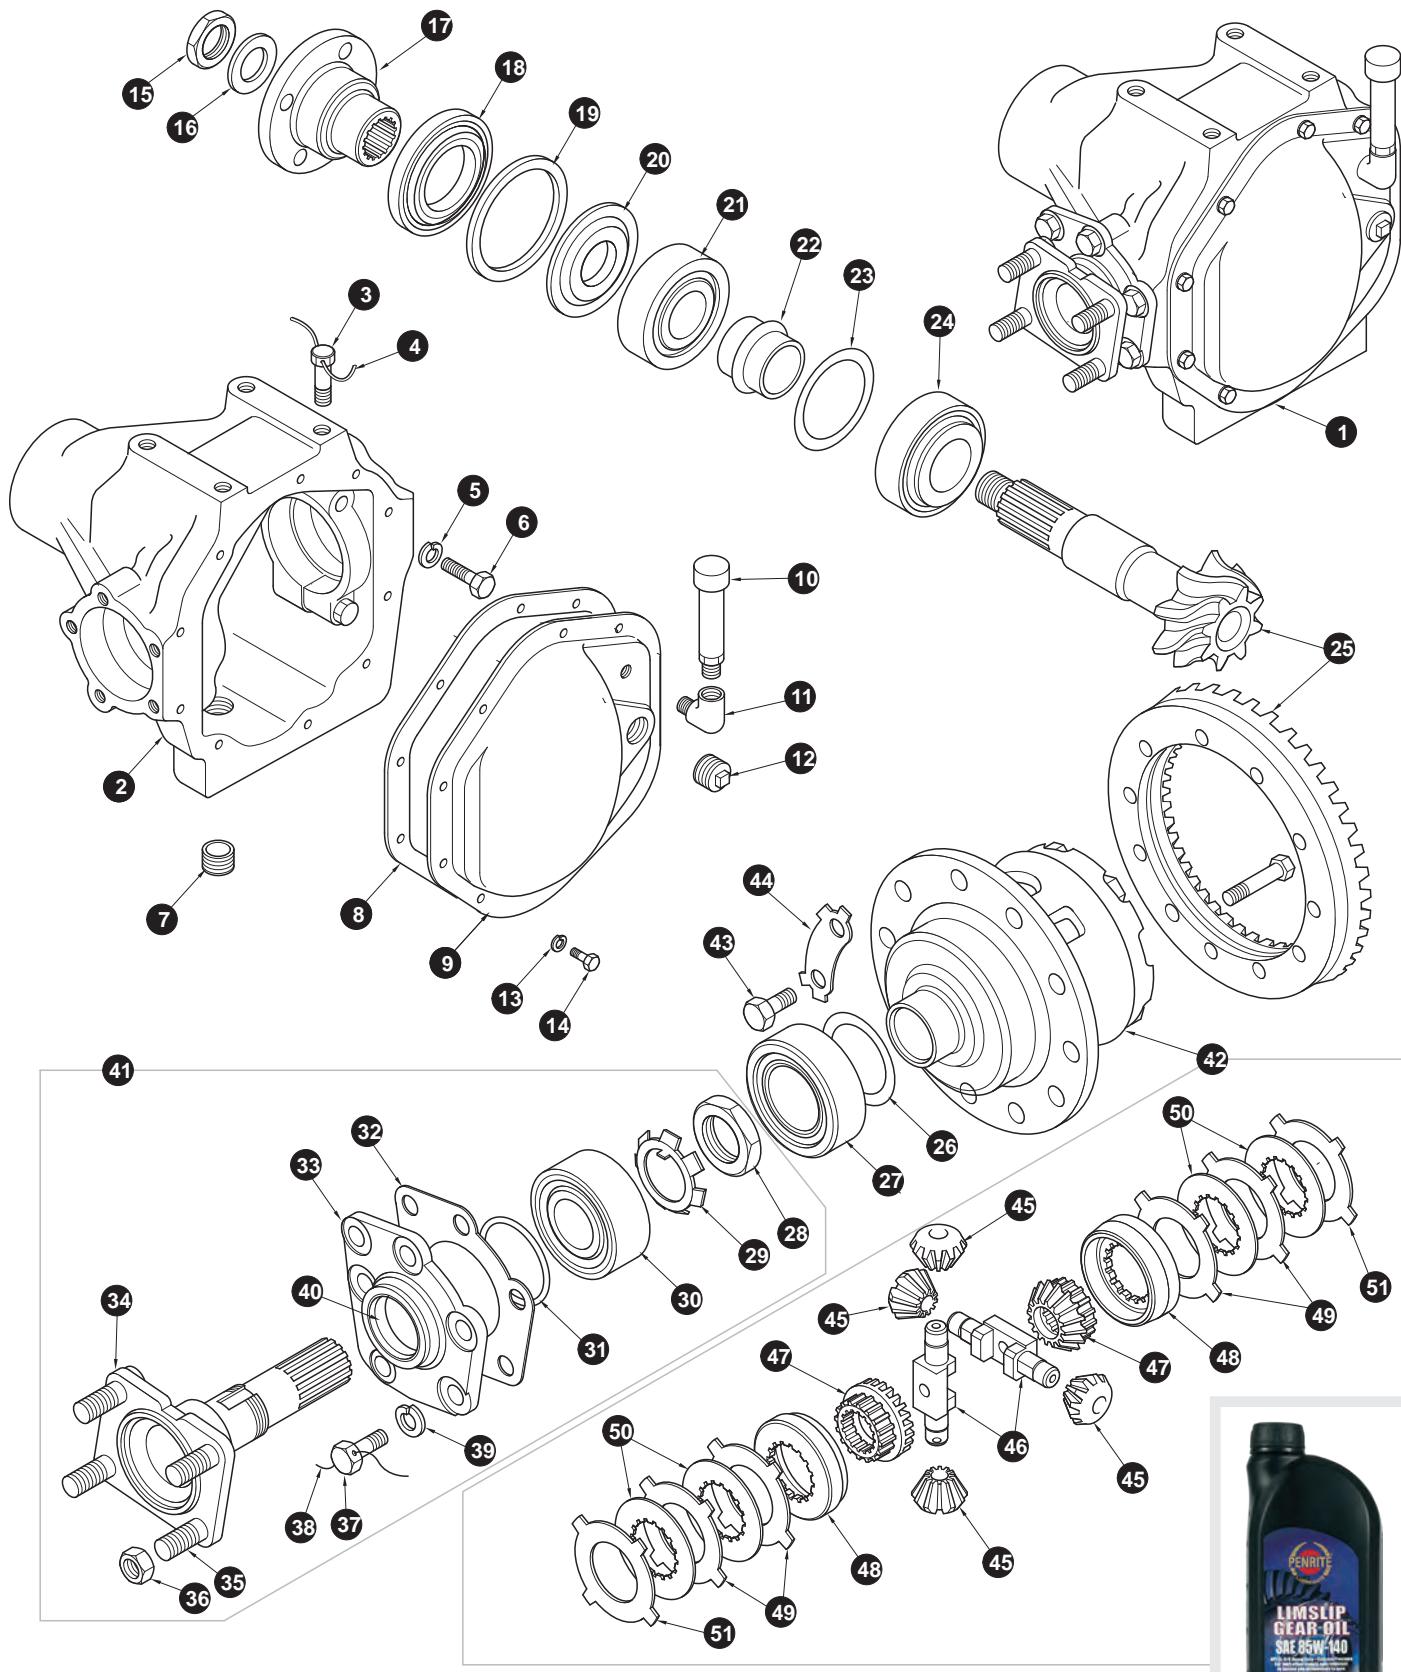

Polyurethane bushes and mountings give improved suspension support with a greater wear resistance compared to their rubber equivalents. They are naturally self-lubricating. A worthwhile addition to any car, the polyethylene bushes are supplied individually, with a steel sleeve where necessary.

- rear shock absorber upper and lower mounting,  
with inner sleeve ..... Part no. 317882
- rear radius arm, uprated ,comfort' type. Models with IRS axle  
front..... Part no. 312128
- rear ..... Part no. 317883

### Cover differential casing

Cast in LM25 aluminum, heat treated to TF and then CNC machined these are not only considerably strong and clamp the gasket well, they are also lighter.

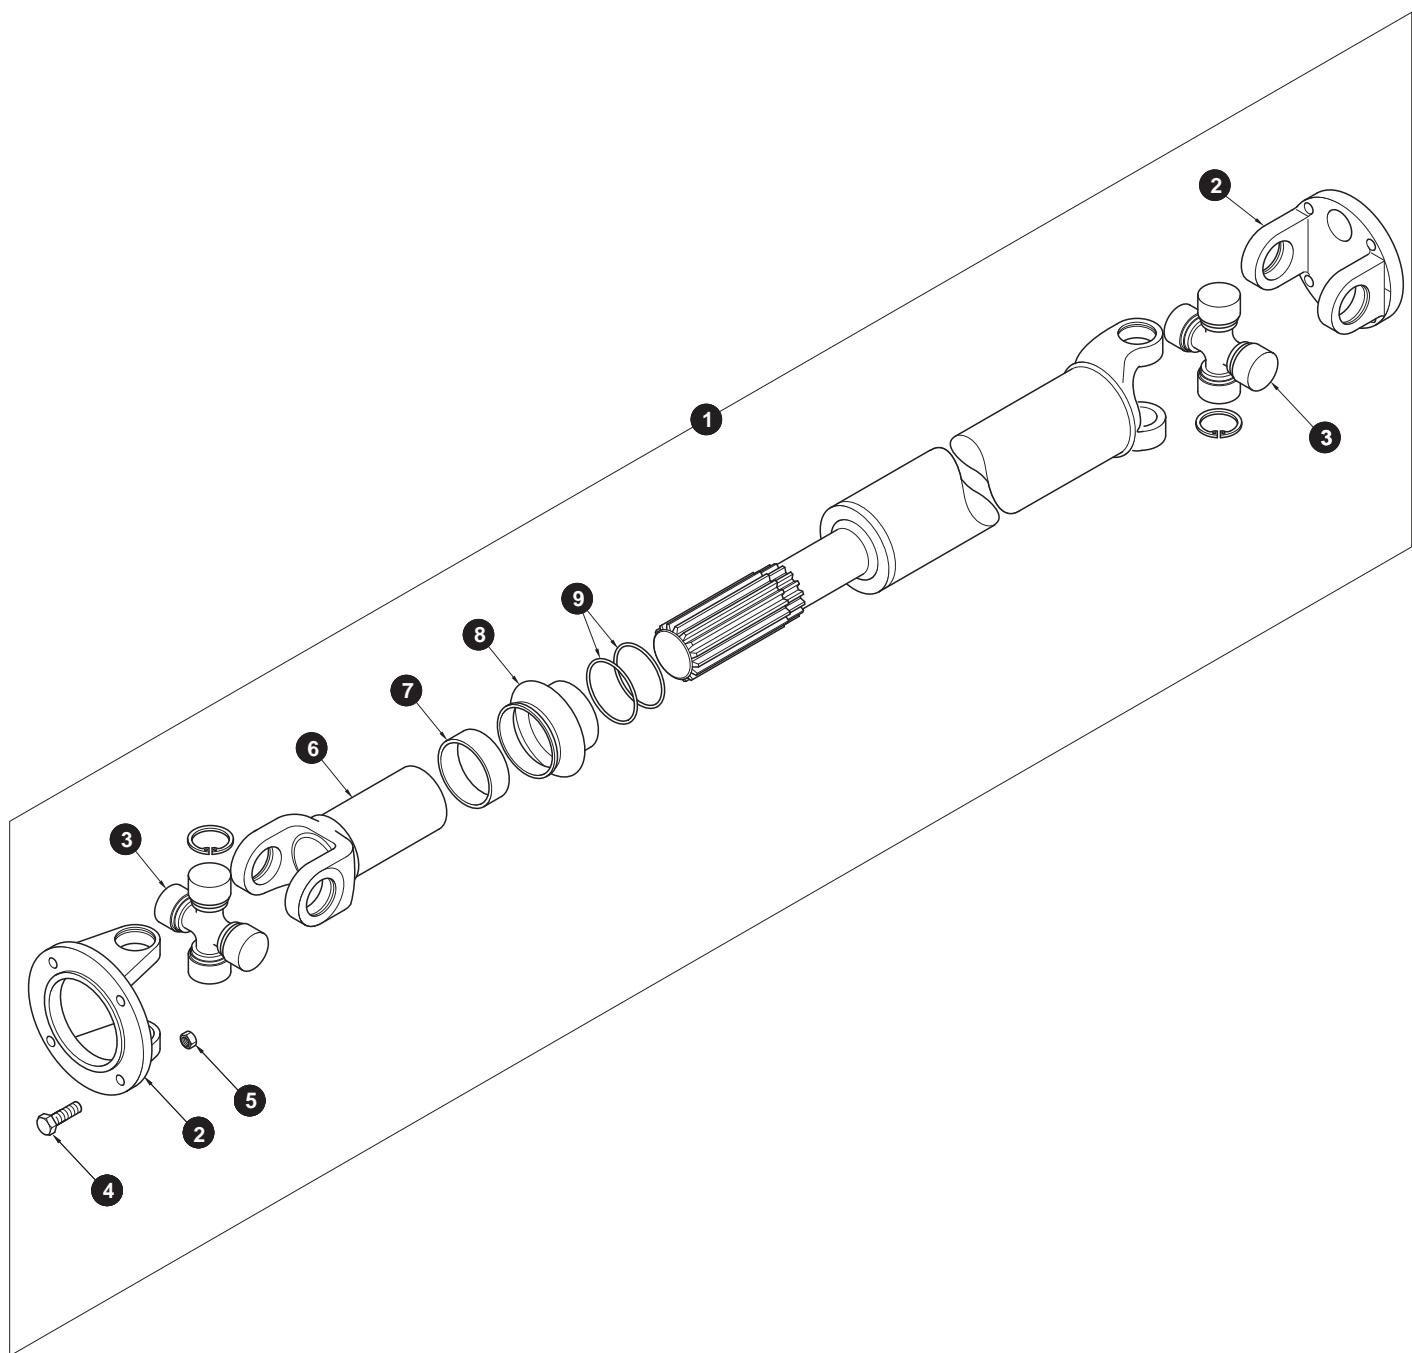

Part no. 277835

### Crown wheel & pinion

Forged from high grade chromium molybdenum steel, high precision tooging (swiss oerlikon system), tested (even the sound is checked) and finally shipped as matching sets, protected with an oil film. Crown wheel and pinion for the classical Jaguar IRS axle

**Laser-Tachometer**

digital gauge with Laser RPM pick up. With 5 digit LCD-display and a measuring range from 2.5 up to 99,999 RPM, Accuracy: +- 0.05%+1 RPM. The built in memory saves min. and max. RPM and the last measured value. With this special meter all rotating parts can be checked. Great diagnostic tool for gearbox, final drive and many other applications on automotive service and repair

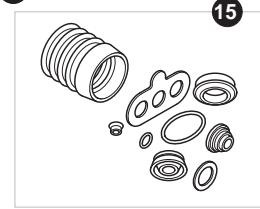

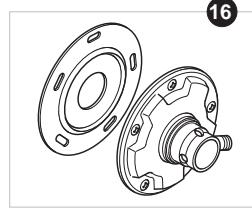

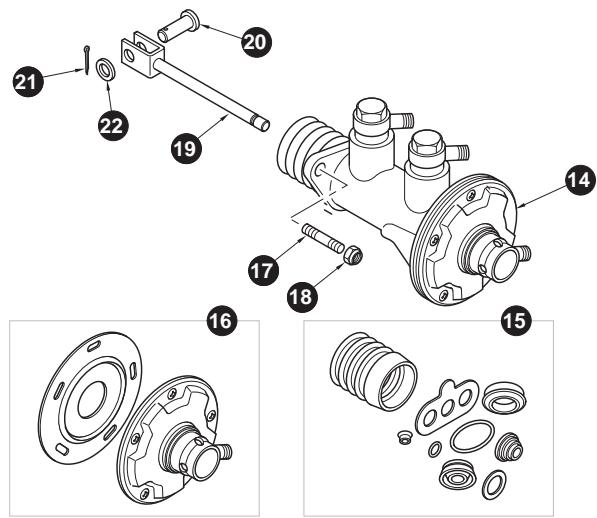

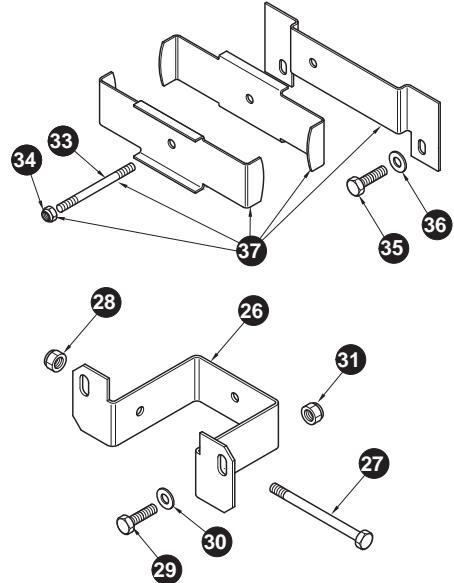

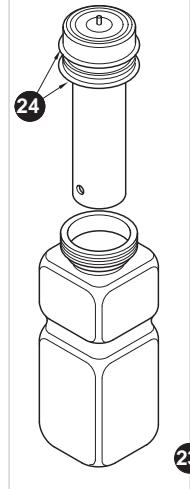

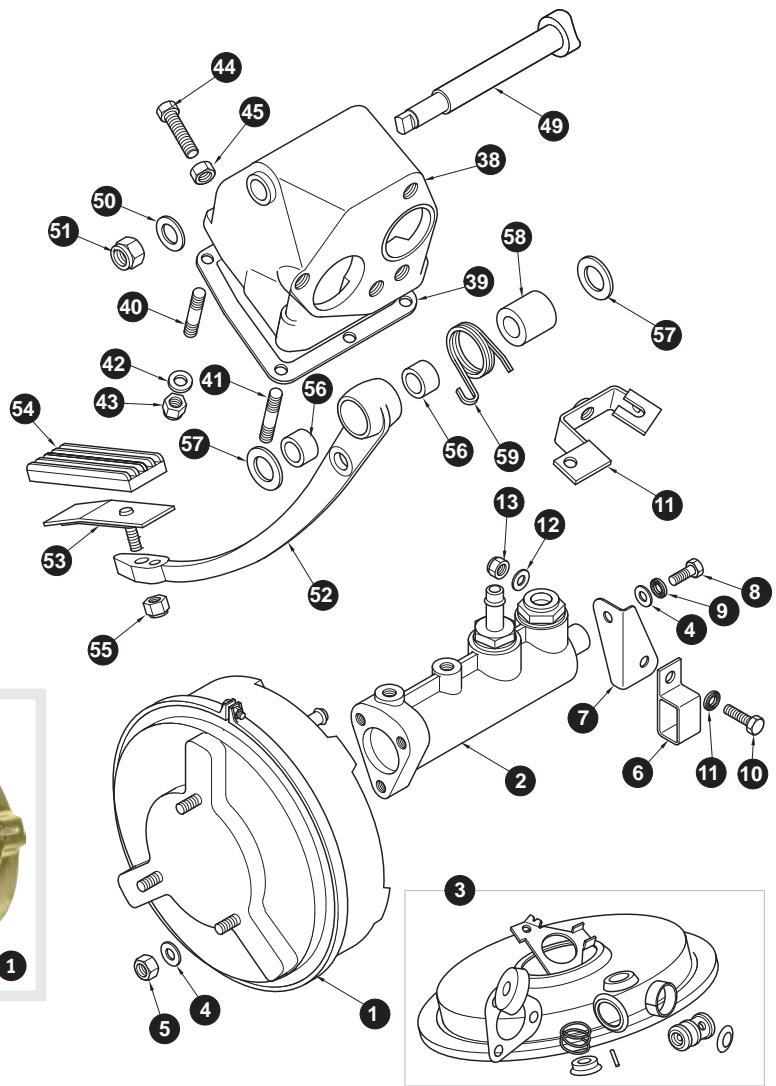

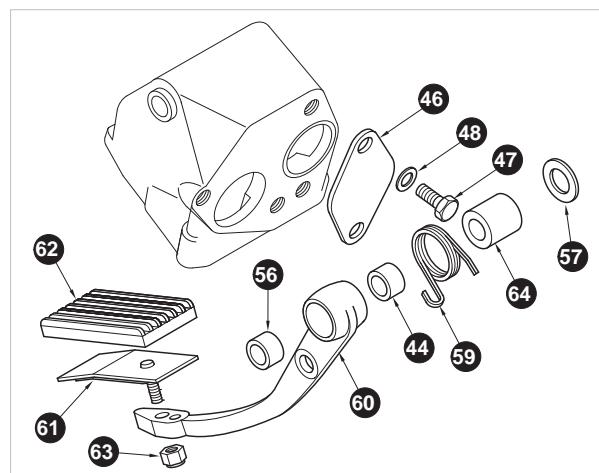

Part no. 221361

**Joint cleaning tool „Nippelfips“**

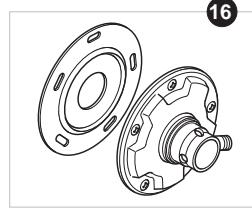

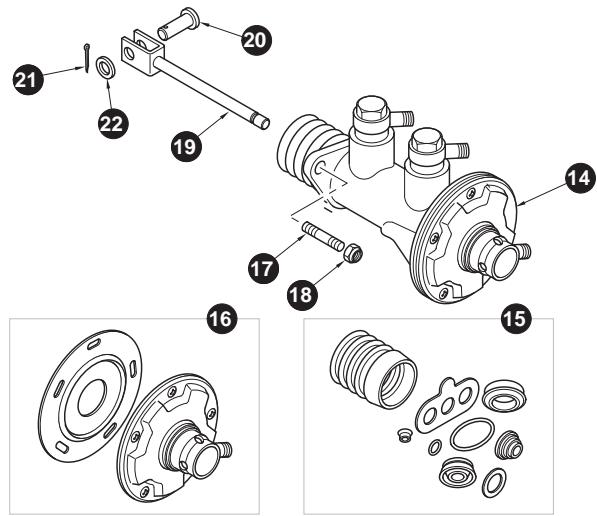

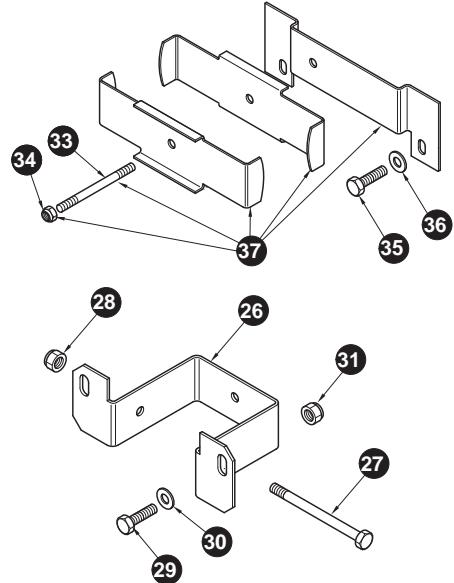

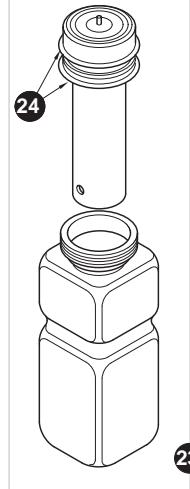

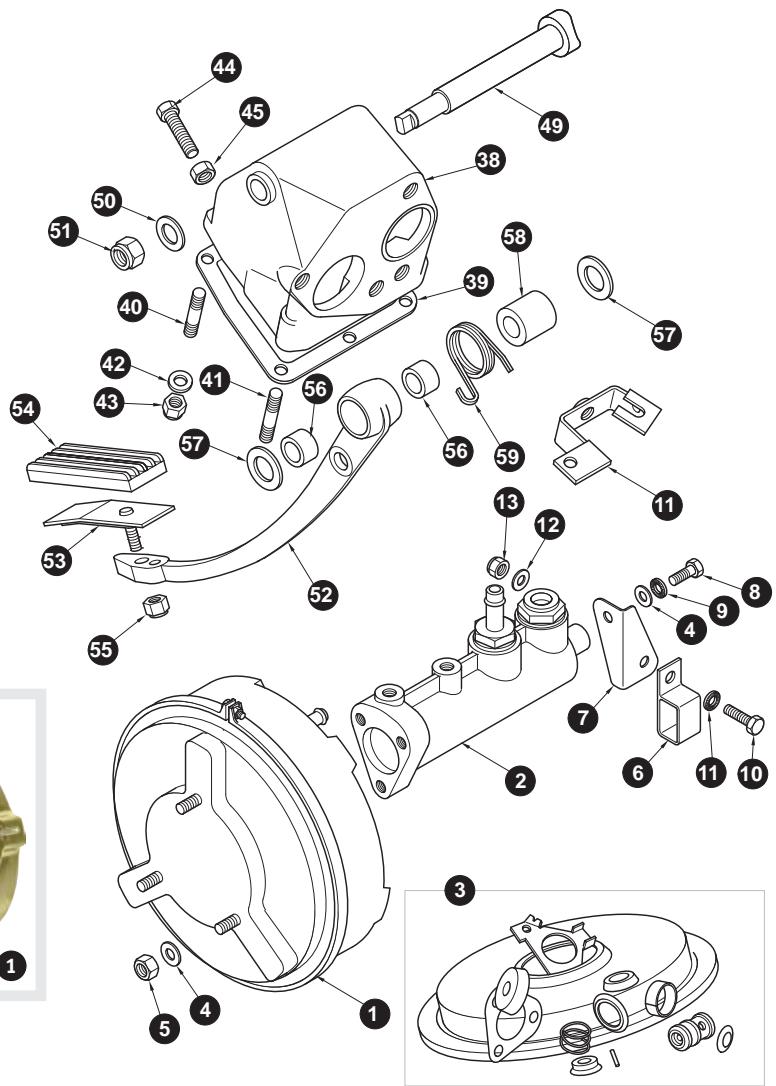

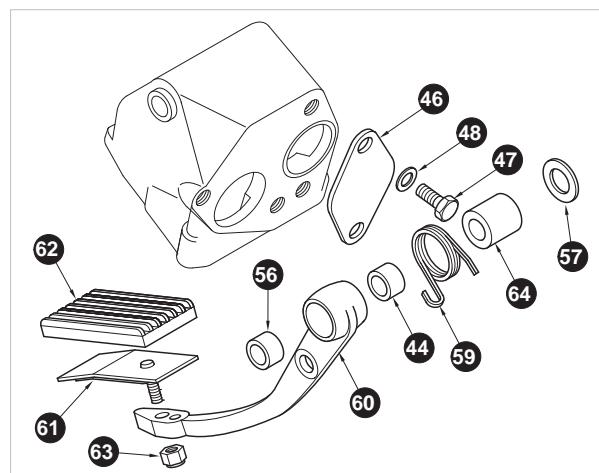

Saves grease joints, renovates King Pins. Quality 1144 steel construction with extension.  
Lifetime warranty.

Part No. 245095

### Brake bleeding set

This system sets the standard for affordable brake and clutch bleeding systems. Suitable for one man operation, uses the air pressure from a spare tyre to effortless bleed hydraulic systems.

Content: 1 x bottle, 1 x bottle cap assembly with tyre connector, 3 x hose set - 3.5 x 303 mm, 5.4 x 303 mm, 5.4 x 183 mm, 1 x 25 mm cap and seal for Lockheed systems, 1 x 27 mm cap and seal for VAG, 1 x 44/45 mm plastic cap and 2 seals for metal Girling and all ATE systems

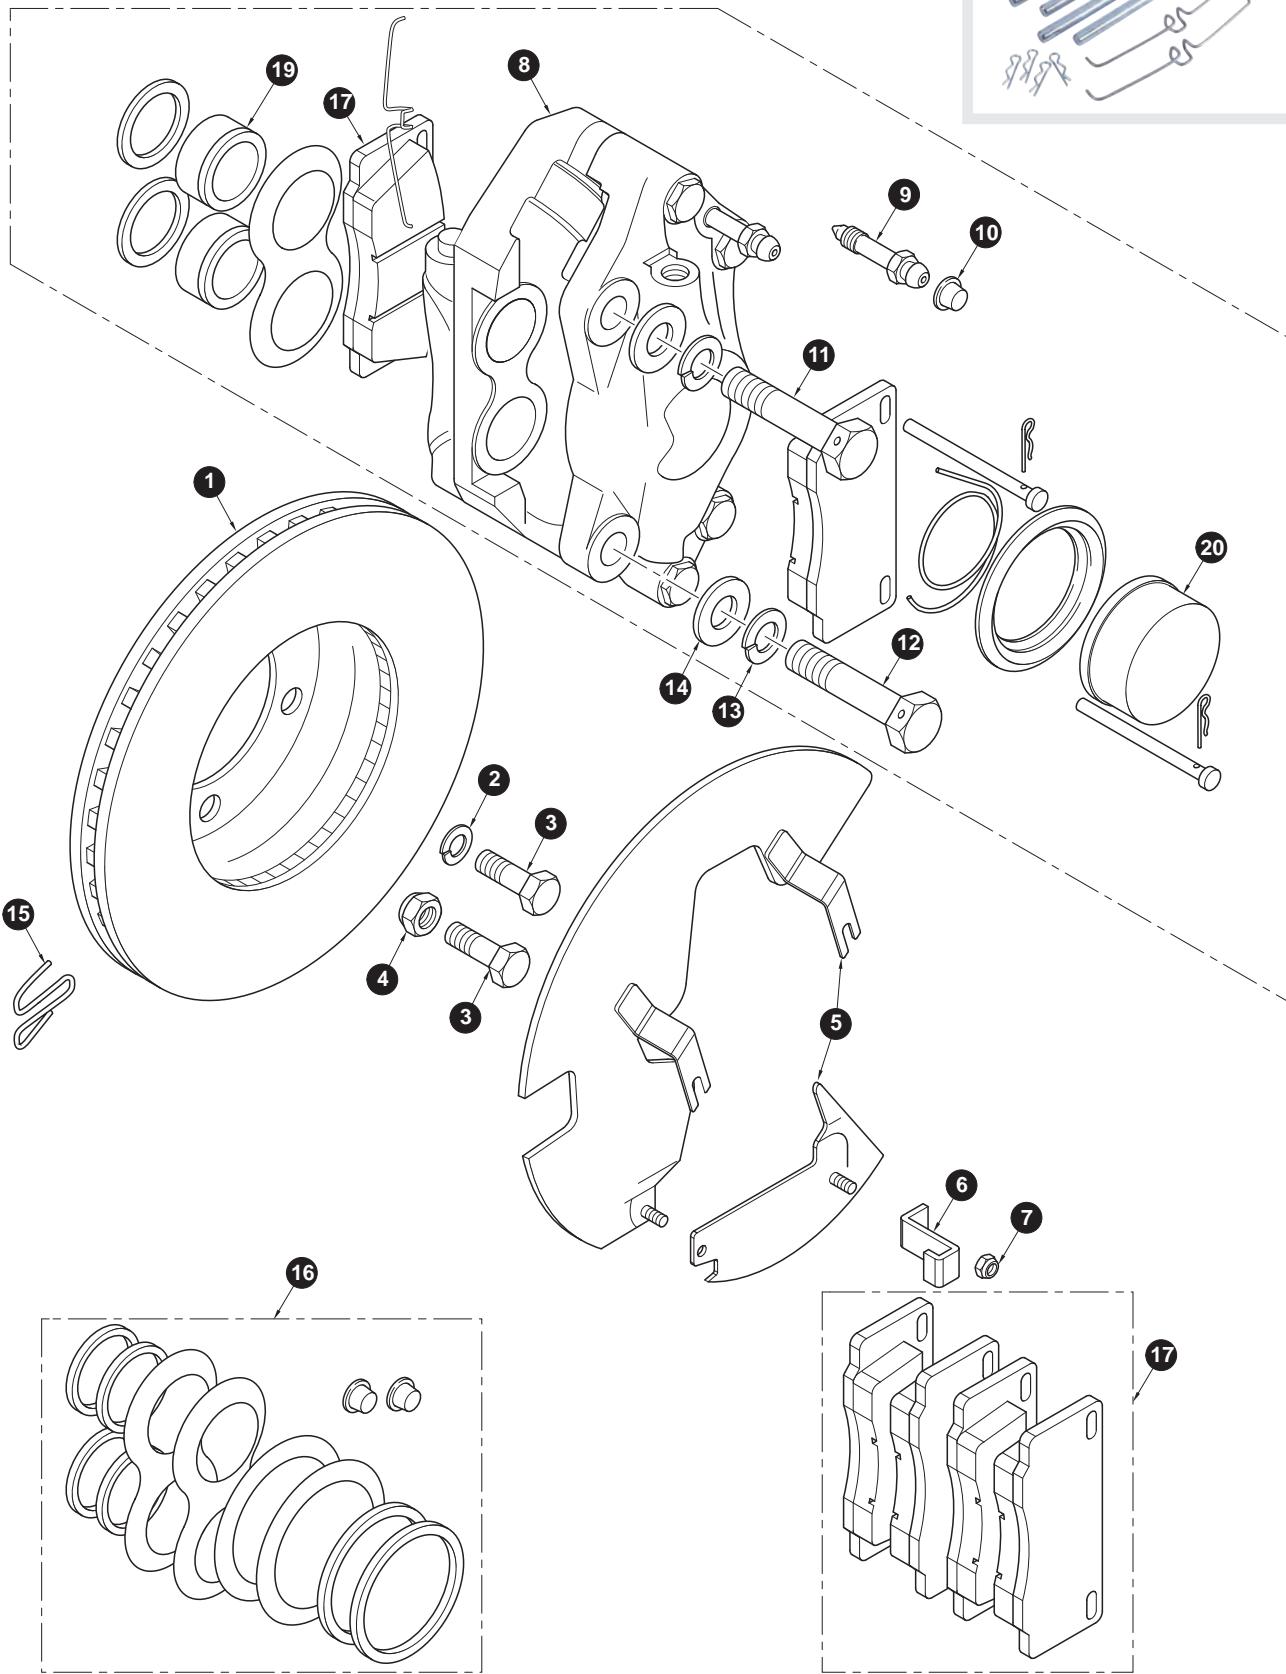

(for 44 mm use thin seal, for 45 mm use thick seal), 1 x 46 mm cap and seal for some Girling systems. Other caps are available should these not fit the vehicle's reservoir. An excellent way to take away the fuss and mess from bleeding hydraulic systems. Fed by air pressure from the spare wheel, it provides 1/4 Lb of pressure to the fluid container

Part no.21558

### New brake calipers

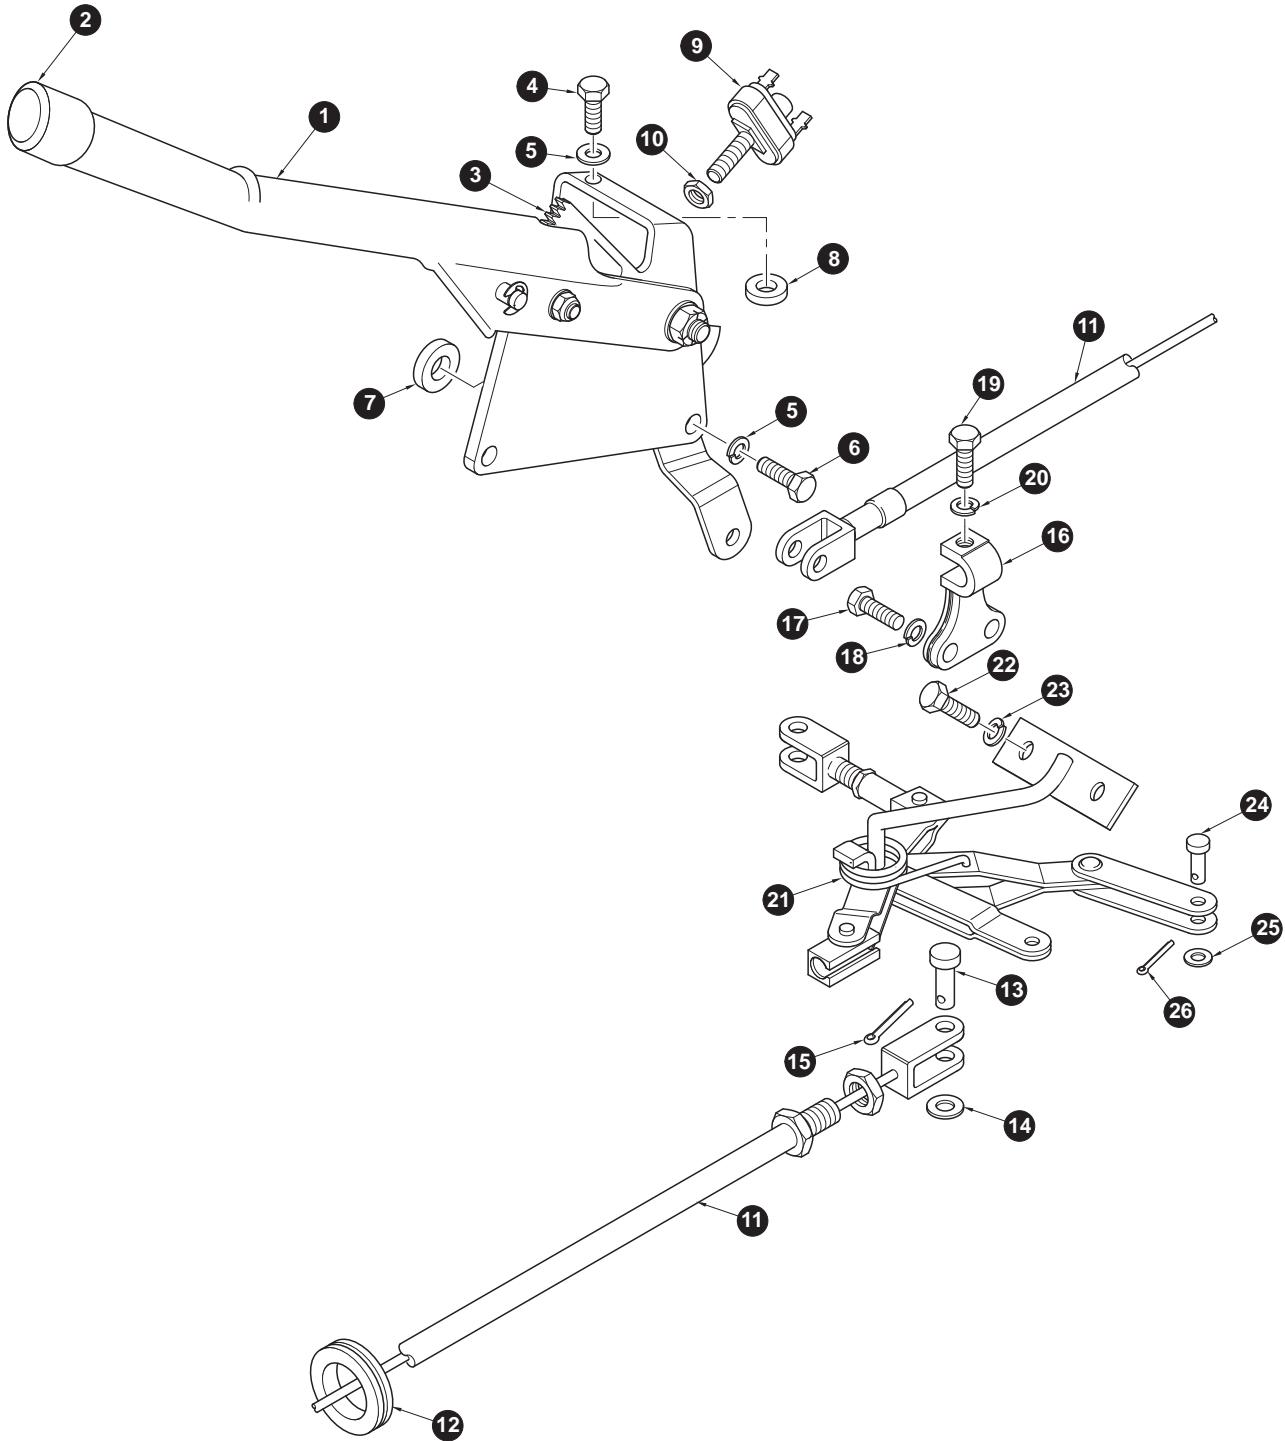

When working on the front or rear axle of your car, think of safety and replace worn parts. Calipers suffer from not being used regularly, remove rubber cover and check if the pistons are still corrosion free.

### EBC Brake discs

The latest in sport discs that feature wide aperture slots to draw cool air into the braking contact area and reduce temperatures preventing brake fade. Dimple drilling avoids stress cracks and the new gold anodized finish provides great looks whilst preventing corrosion. Another great feature of these dimpled and slotted EBC 3GD Turbo discs is the way they maintain flat and parallel pad wear and avoid the record grooves or galling common with non-slotted brake discs. This improves pad contact and braking throughout the life of the disc and pad set, front - vented 3GD Turbo series with curved grooves and spot drillings to maximize pad performance - supplied in pairs for standard 2 pot calipers

Part no. 482916

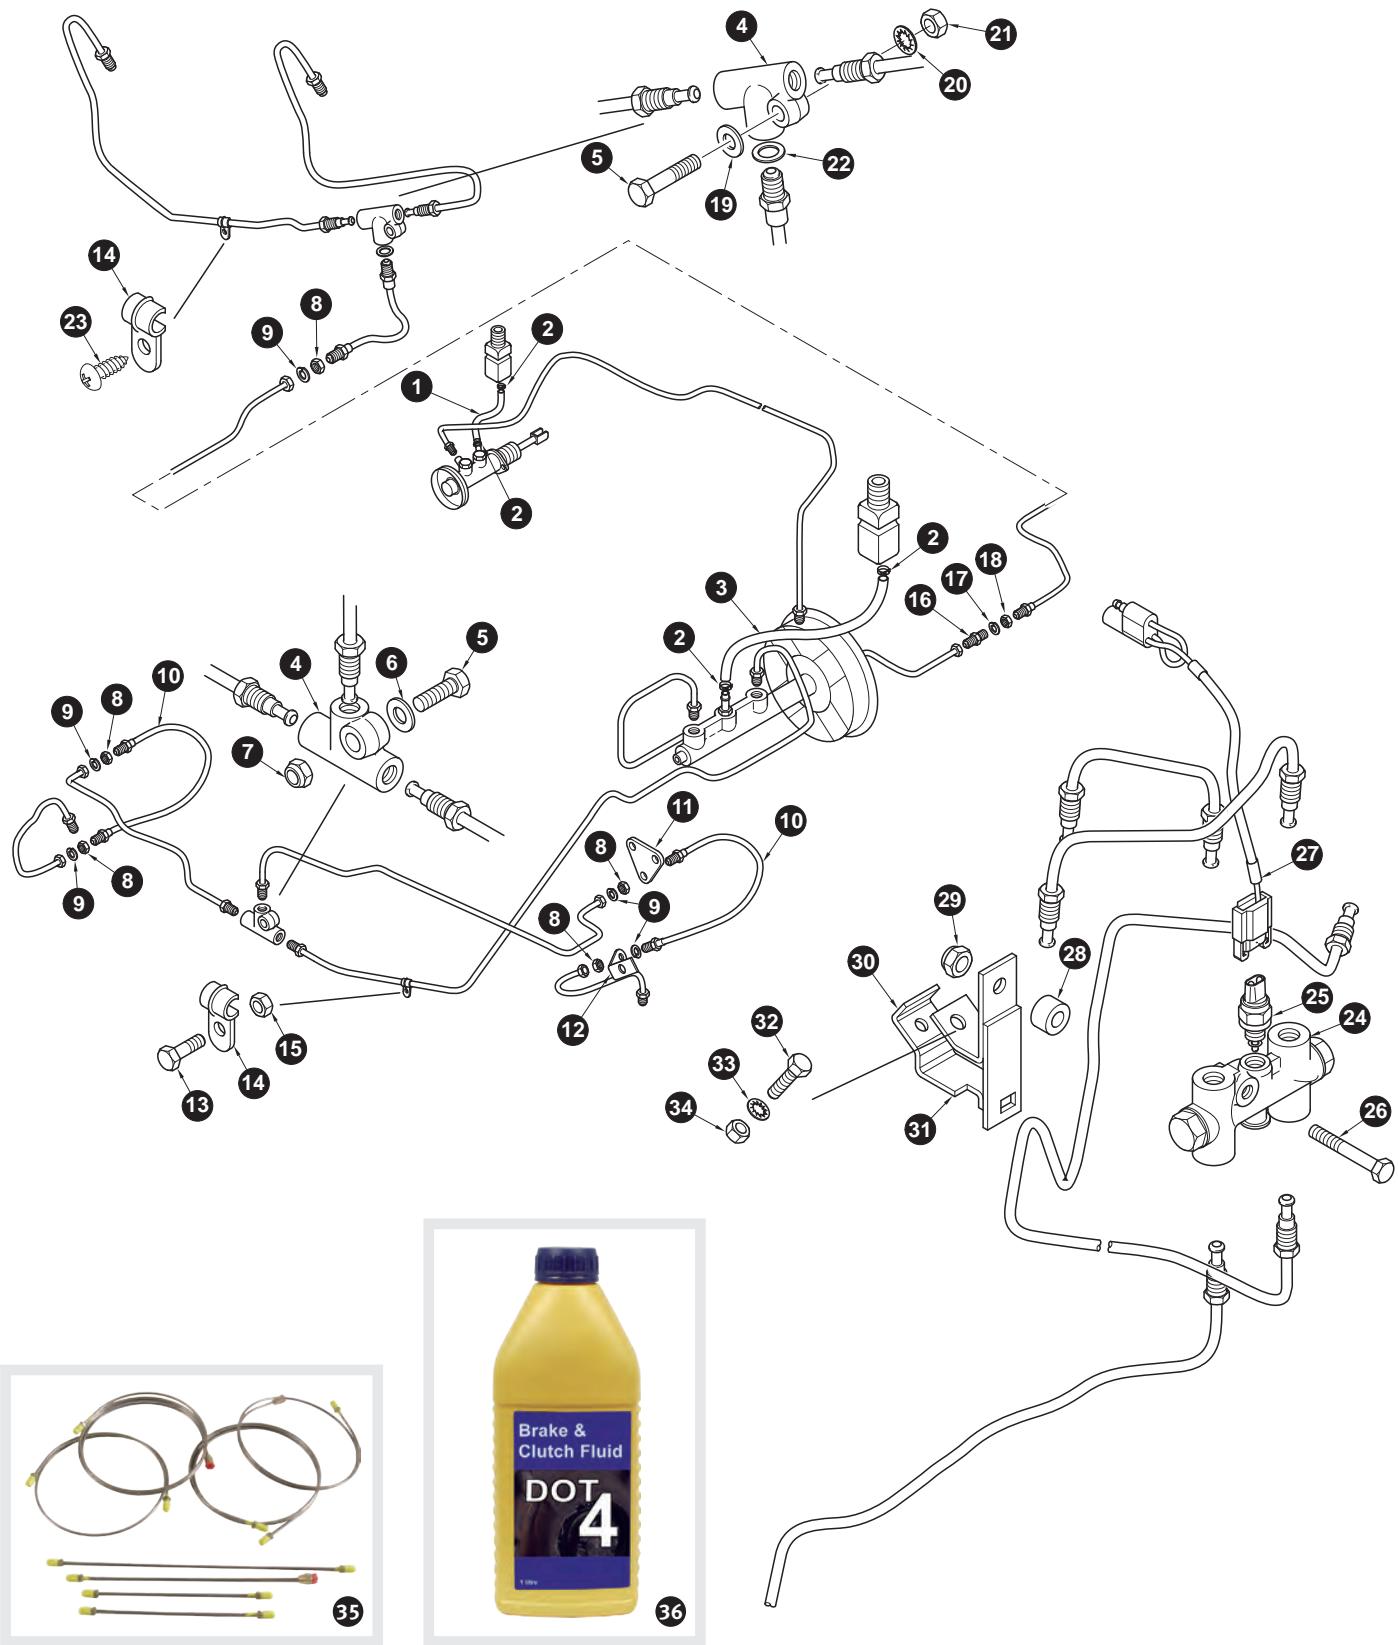

### EBC Brake pads

The material of ,green stuff' brake pads is Kevlar based. The brake pads give a strong progressive braking from low temperature up to 900°F. Most ,green stuff' pads are type approved ,E' marked and meet the Reg.90 certification, front - Kevlar ,Green Stuff' specification

#### „Black Series“

We have talked the manufacturer into doing us something special. An exclusive series in „Black“ only available from us. This is the well known MWS Dunlop Wire Wheel, made of high quality stainless steel, but instead of chrome plating, these Black Beauties are powder coated at the factory, and look simply stunning on all „Pale Primrose Yellow“, Torquise“, „Azure Blue“, or „Old English White“ cars.

### Alternator

This Denso type 80A alternator replaces the original heavy and unreliable Butec unit. With a built in regulator and twin cooling fans it offers a considerable weight saving with increased reliability. 12 volts and 80 amps. Mounting plates on RH side. Weight: 3.2 kg

### High performance starter motor

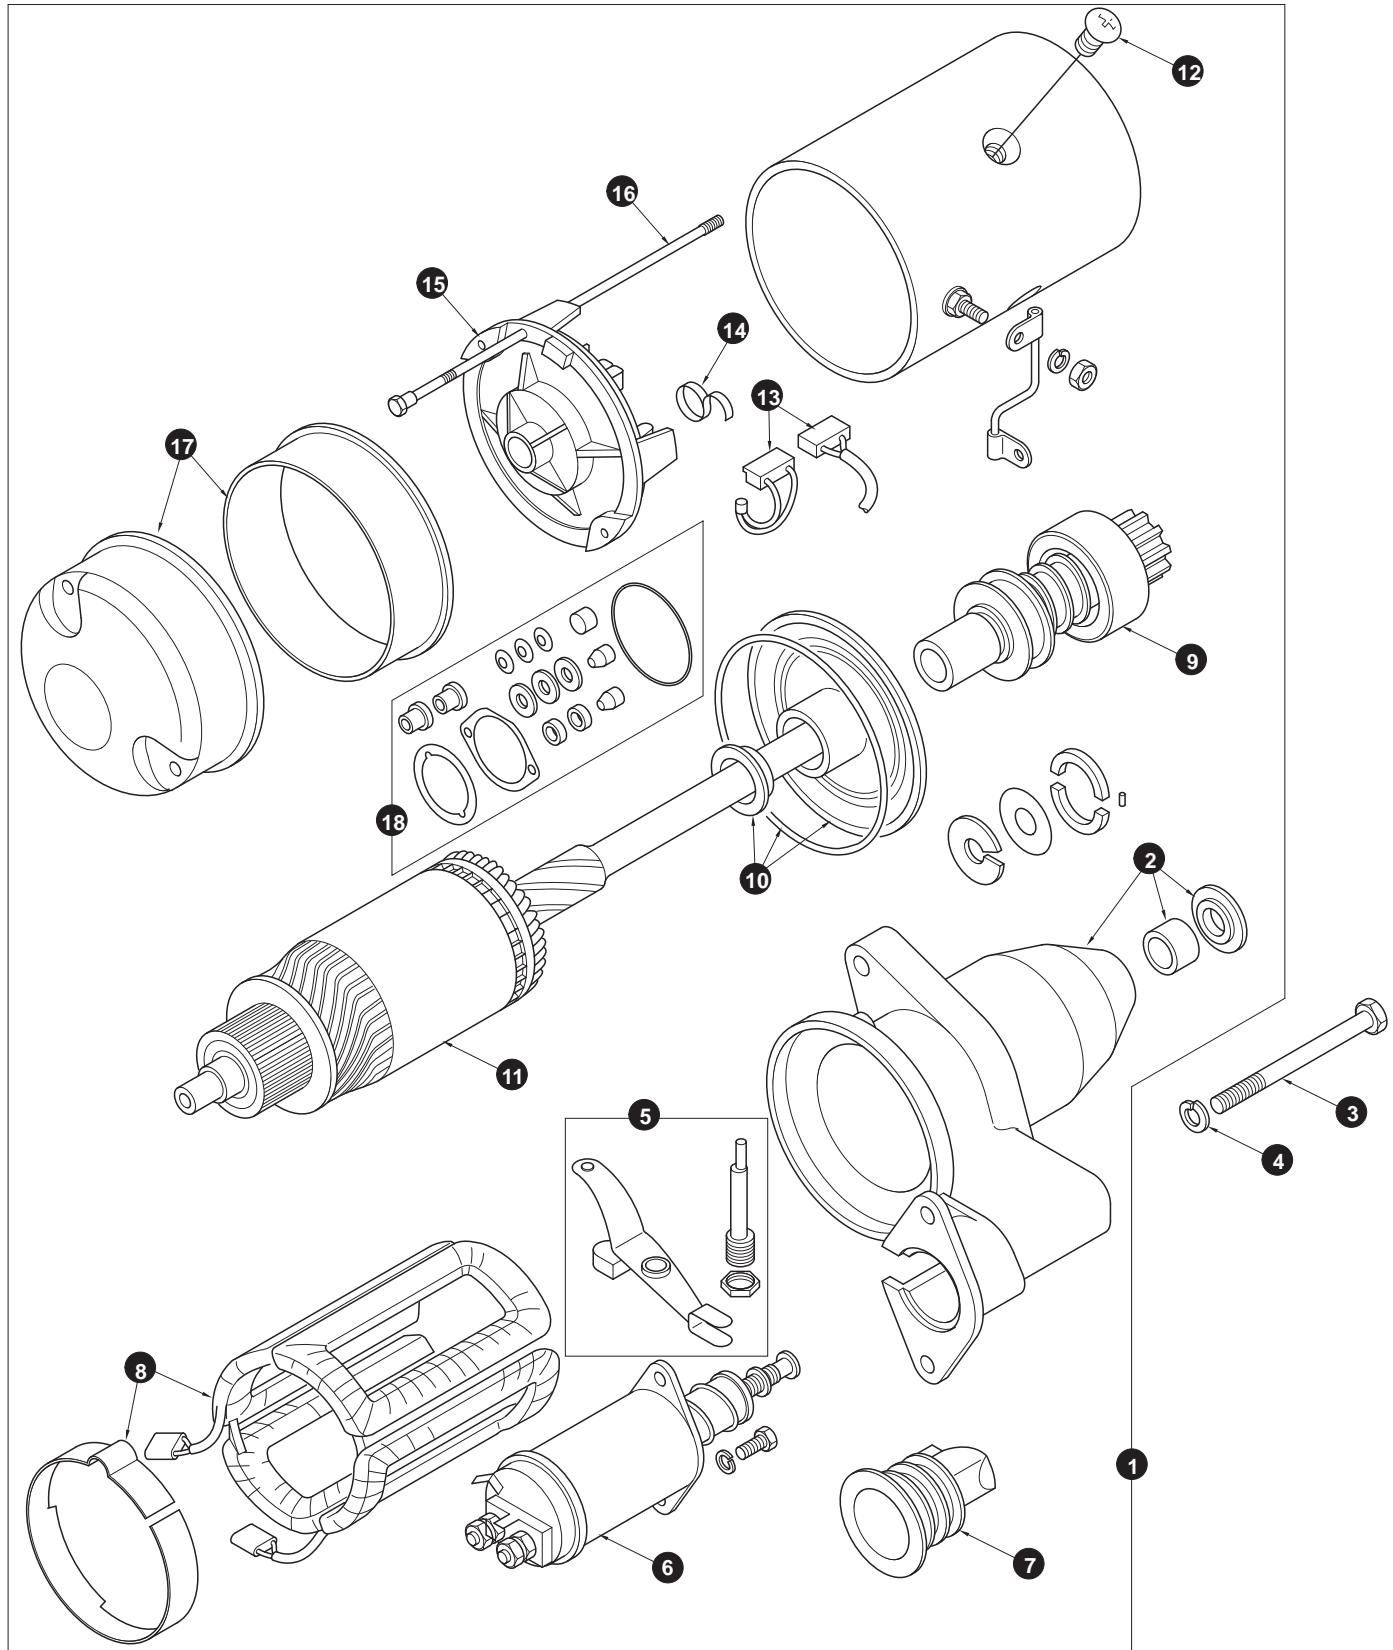

Our modern gear reduction, high torque starter motors are specially developed for classic cars. They use a powerful 1.5 kw motor running through a reduction gear box, turning the engine over faster, more powerfully and for longer. No more worries on the start line when the engine is hot. All starter motors are a replacement for the original unit.

12 volt, power: 1.4 kW

### Copper paste

100 g tube. Very good all round anti-seize and lubricant for high temperature applications. Avoids brake squeaking and sticking of the pads. Also protects exhaust and manifold screws and bolts against corrosion. Withstand extreme temperatures up to 1150°C.

Part no. 329423

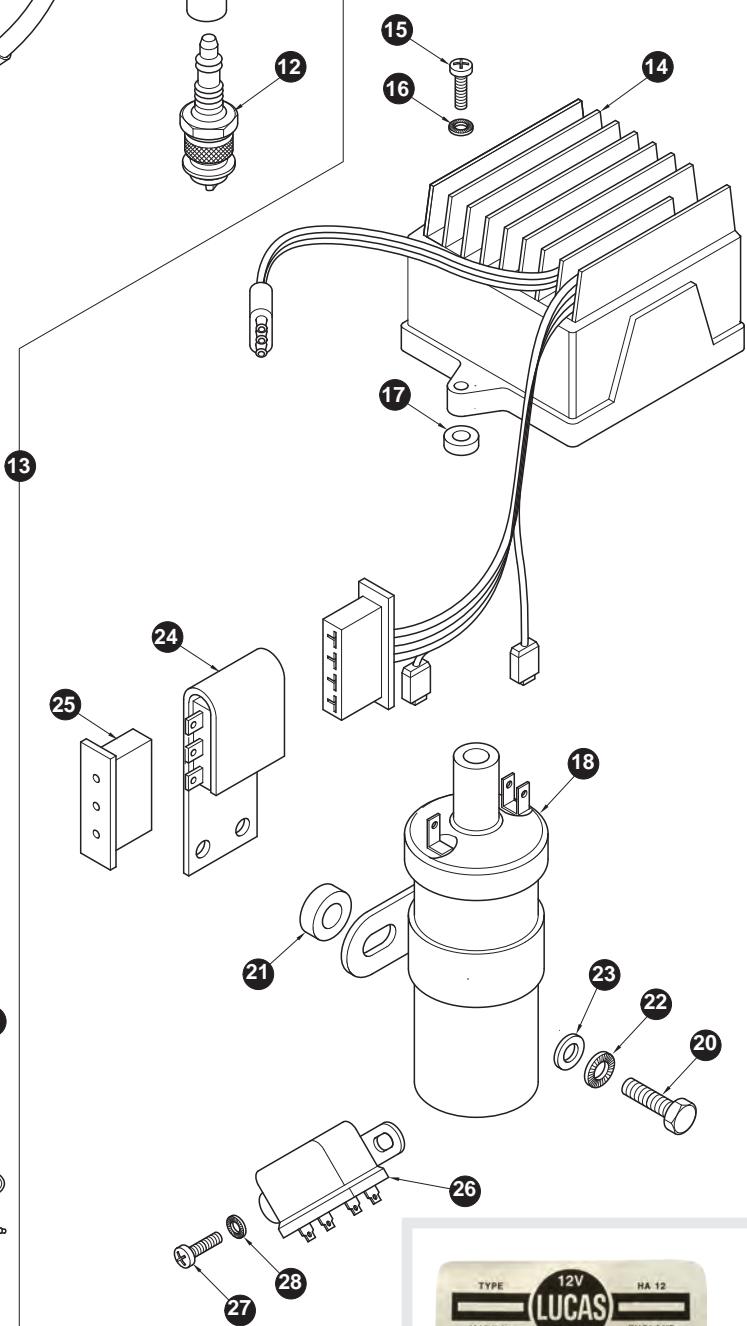

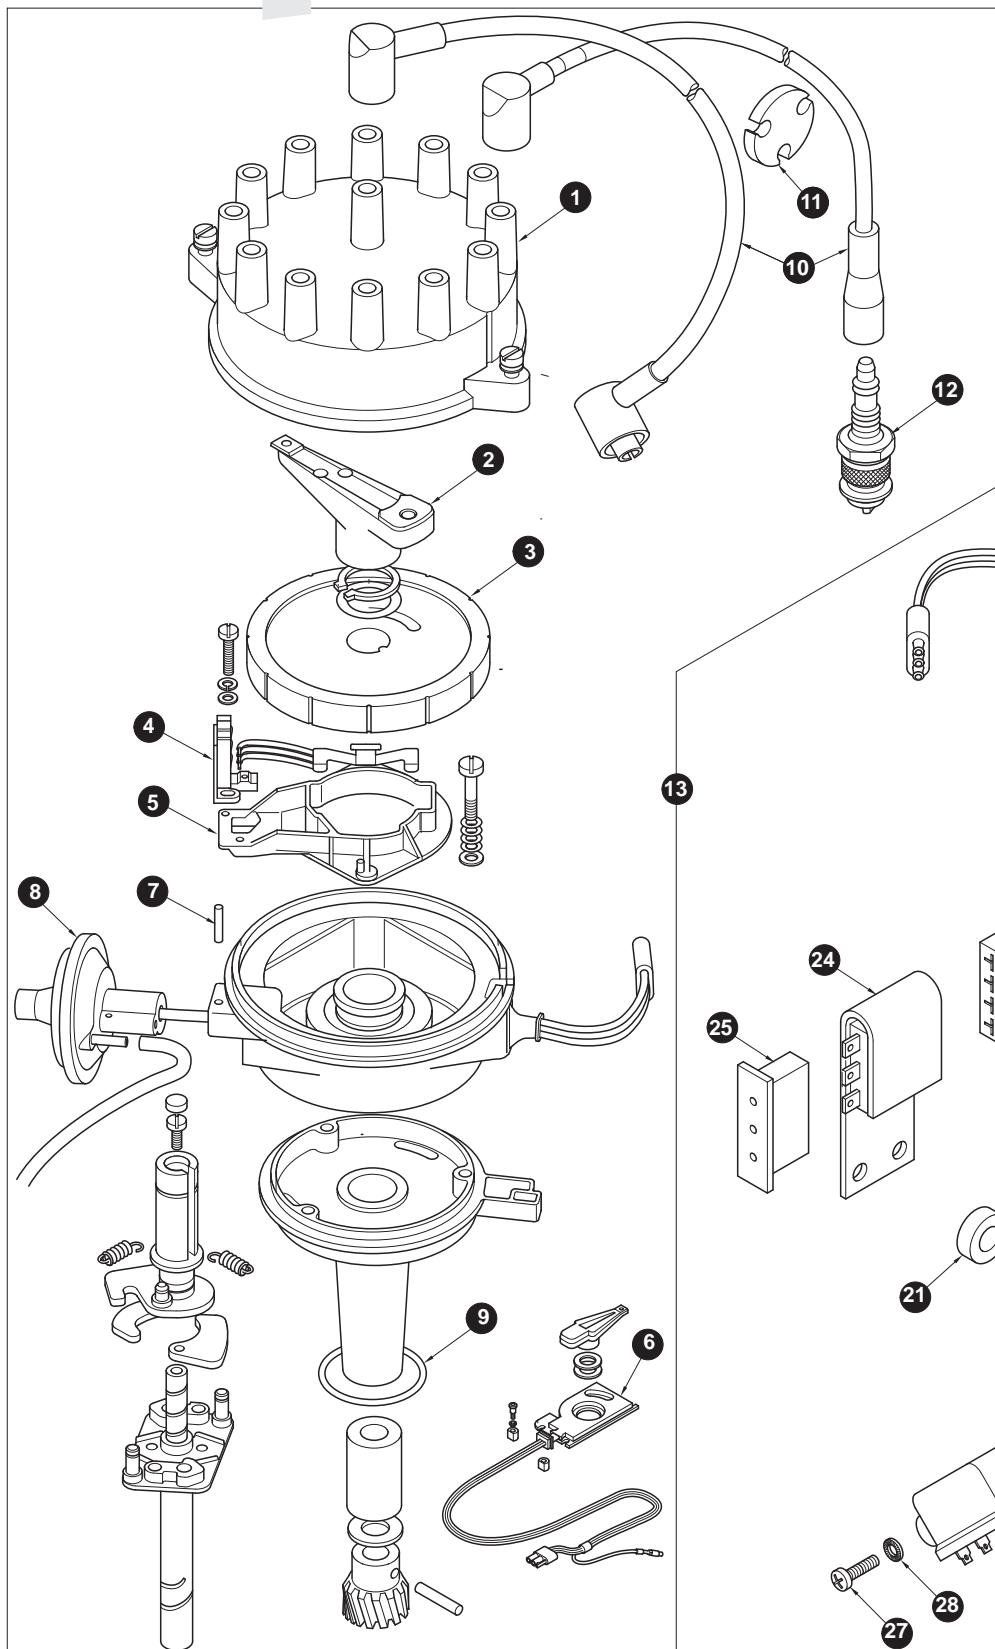

### Penrite Grease

500 g can. Lithium base high melt bearing grease, temperature range: -10°C to 170°C. Suitable for wheel bearings and general chassis greasing. Ideal for applications where water spray, high temperatures or high loads are encountered

### The toolman's choice

Powerfull jumpstart, high performance - little weight  
 Easy to use, easy to store, due to its small dimensions  
 2 bright LED as working place light, will start up every passenger car with petrol or diesel engine and 12 Volt electrics, for batteries from 4 up to 120 Ah, charging current 4.2 ampere  
 comes with automatic charging set

### Multimeter

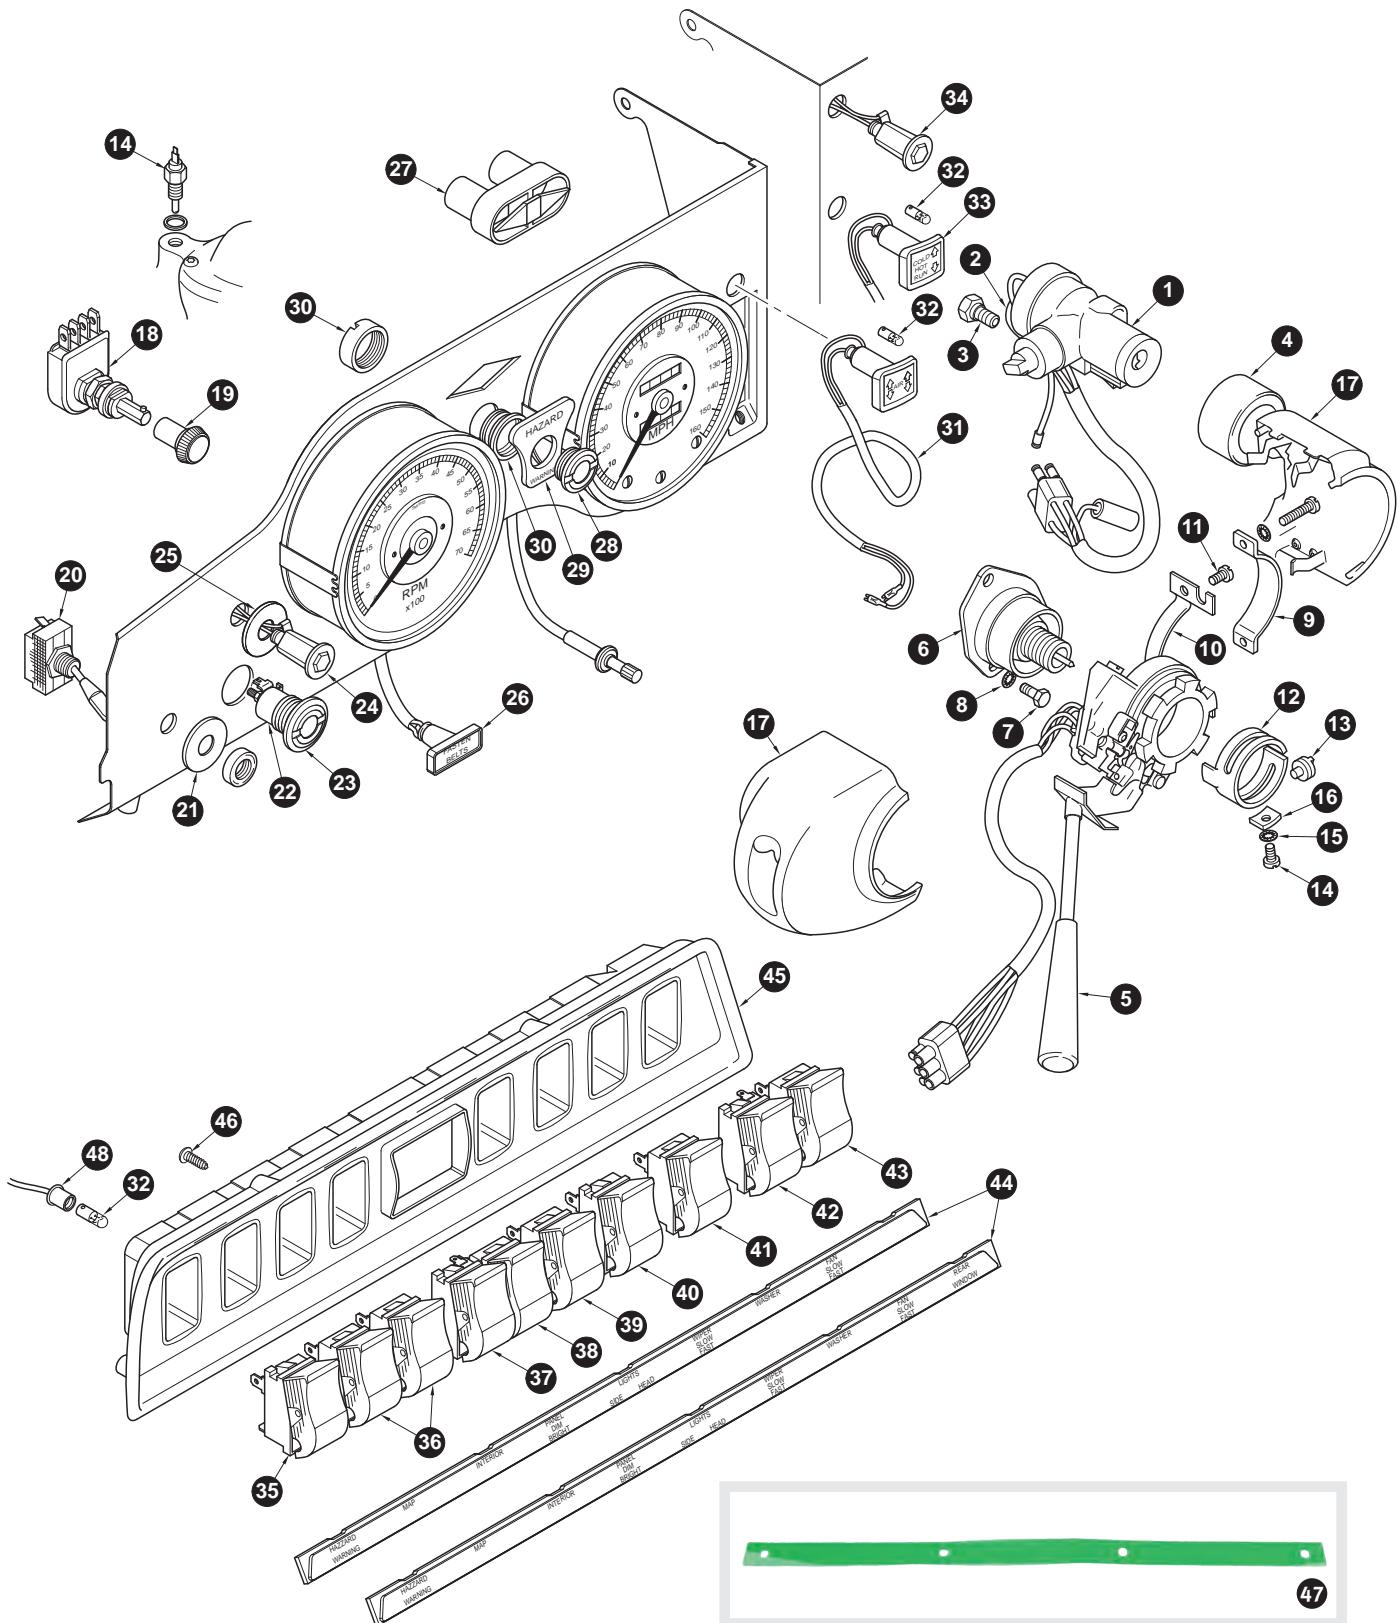

digital instrument with a rotary switch for selection of the 24 different functions and ranges. Suitable for the measurement of DC, AC, volts and amps, resistance, dwell, rpm on 4, 6, 8 and 12-cylinder engines. The testing of diodes is also supported. The shock resistant housing is made of rubber. Supplied with 2 sets of cables: one pair with crocodile clamps and one pair with probes. A 9 V block battery and vinyl storage bag is included Part no. 314833

### Battery-Booster

These battery boosters are the smallest most powerful jumpstart packs in its class with a 14AH high capacity. The boosters deliver instant cold crank power when you need it and have a fast rechargeable long life battery. They are easy to handle and they are extremely compact, making them easy to store in your car, camper van, boat, forklift, truck, bus or jet ski.

Battery booster features:

- The product adopts instant strong discharged battery. Only small storage space is needed. Easy for anyone to use.
- The product can instantly start the engine even with a dead battery without the assistance from another engine. Furthermore, saving your engine will not be limited with the length of cables when the battery of the engine has been exhausted or out of order. The powerful unit can directly and instantly start up to 12V Petrol or Diesel engines. If you connect 2 battery boosters together, it will become more powerful and you can start 24V Diesel engines.
- The product ensures the computer system will not be damaged or return the digital records to Zero when restarting the engine. Normally, using one battery to start another battery often causes the computer system to be damaged or return the original records to Zero because of the instant risk and fall of voltage.
- The automatic control circuit of the product will automatically power-off the fully charged battery booster, which will increase the life span of the product. The product can be charged at any time, and long time charging will not damage the product.
- The battery booster is equipped with plastic protectors and is short-circuit proof.
- The product is provided with two powerful LEDs to illuminate the dark.

12 volts, integrated wires with clamps, illumination with 2 bright LED, small dimensions, variants with Euro plug

220 CCA capacity

dimension: 22 x 10 x 19 cm

weight: only 4 kg!

Part no. 500586

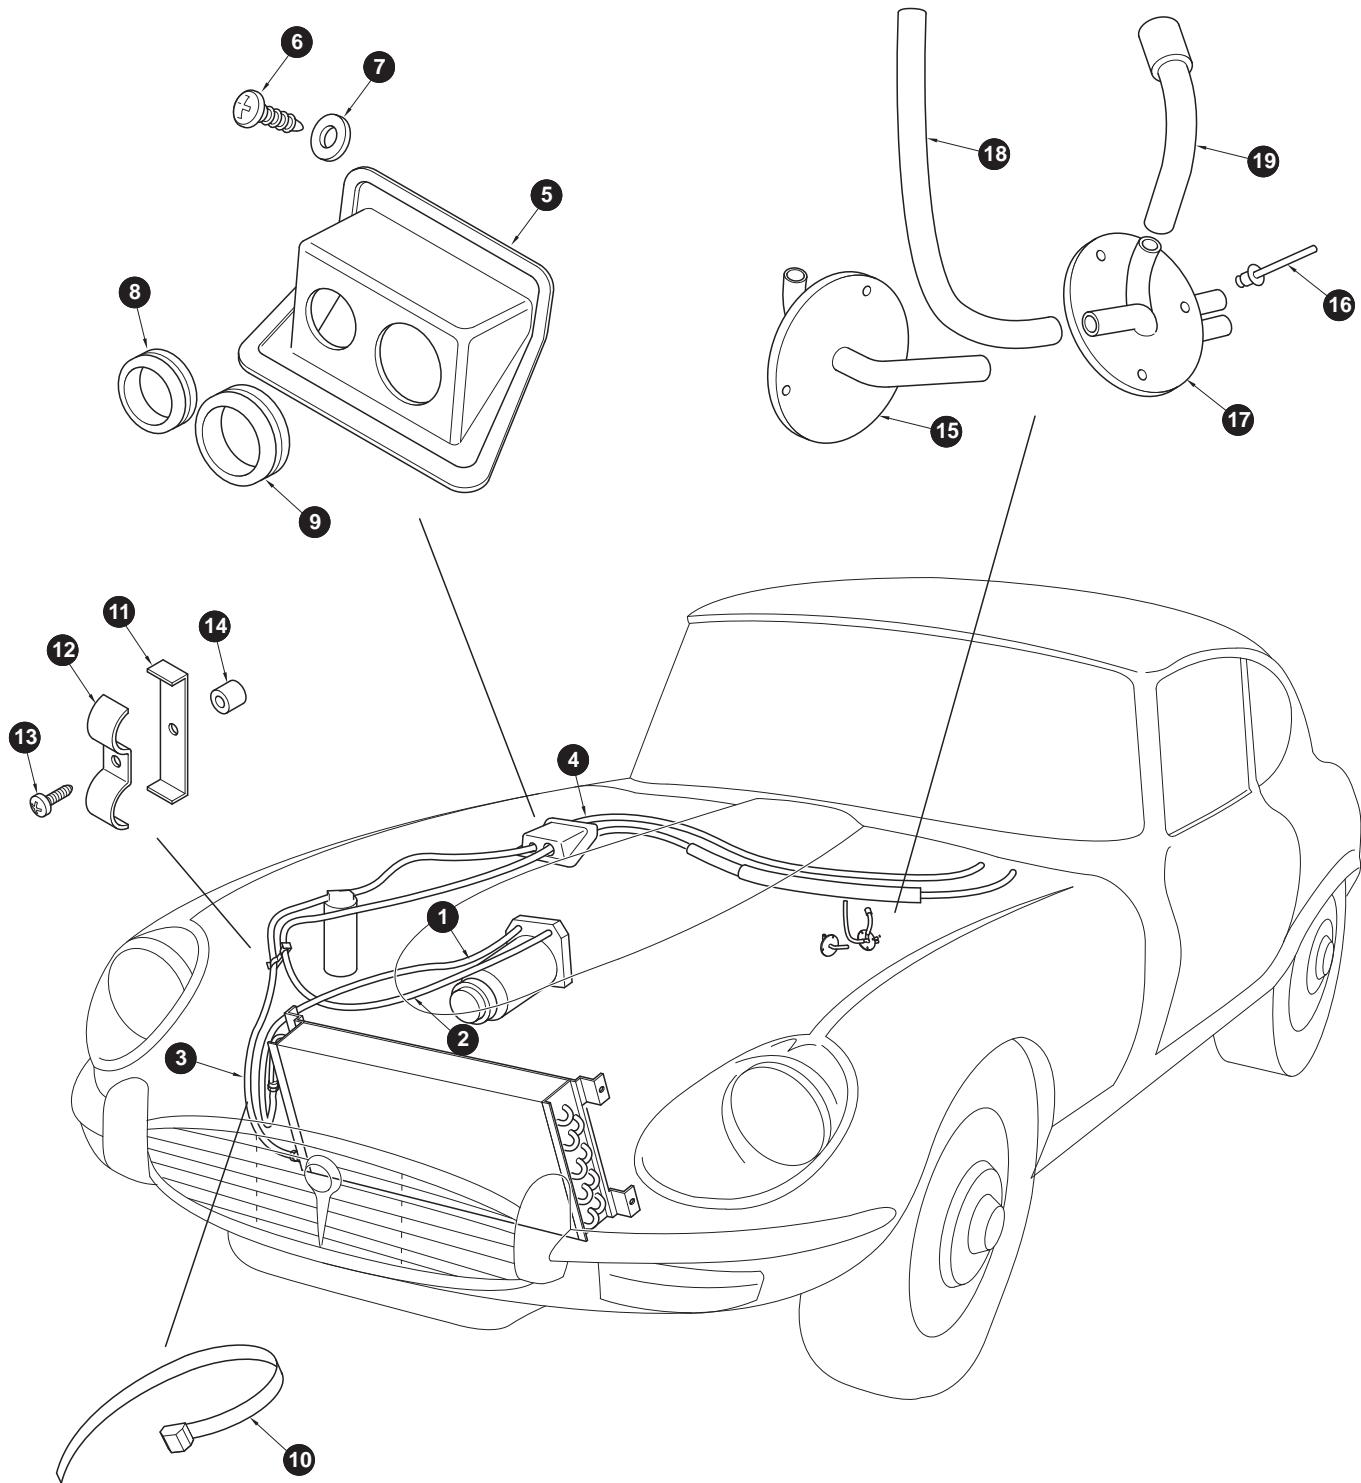

500 CCA capacity

dimension: 15 x 17 x 13 cm

weight: only 5,6 kg!

### Super lightweight aluminiumfire extinguisher!

System overheating..? After putting years of resources and effort in you don't want to suffer from a fire and find you have no extinguisher - invalidating your insurance. Extremely lightweight aluminium housing. Maybe you can help out someone else. This belongs in every classic car.

It has an easy to read pressure gauge and comes with mounting bracket.

1 kg, total height: 30 cm

Part no. 275432

2 kg, total height: 39 cm

Part no. 322326

### Fire extinguisher Zero 360

The latest generation of our hand held extinguisher uses the highly efficient gaseous Zero 360 extinguishant. Designed specifically for the rigours of motorsport and able to operate in any orientation. Supplied complete with a bracket and quick release strap for easy access.

It has an easy to read pressure gauge and comes with mounting bracket.

1 kg ABC gas, total height: 34 cm,  
diameter 9 cm ..... Part no. 494108

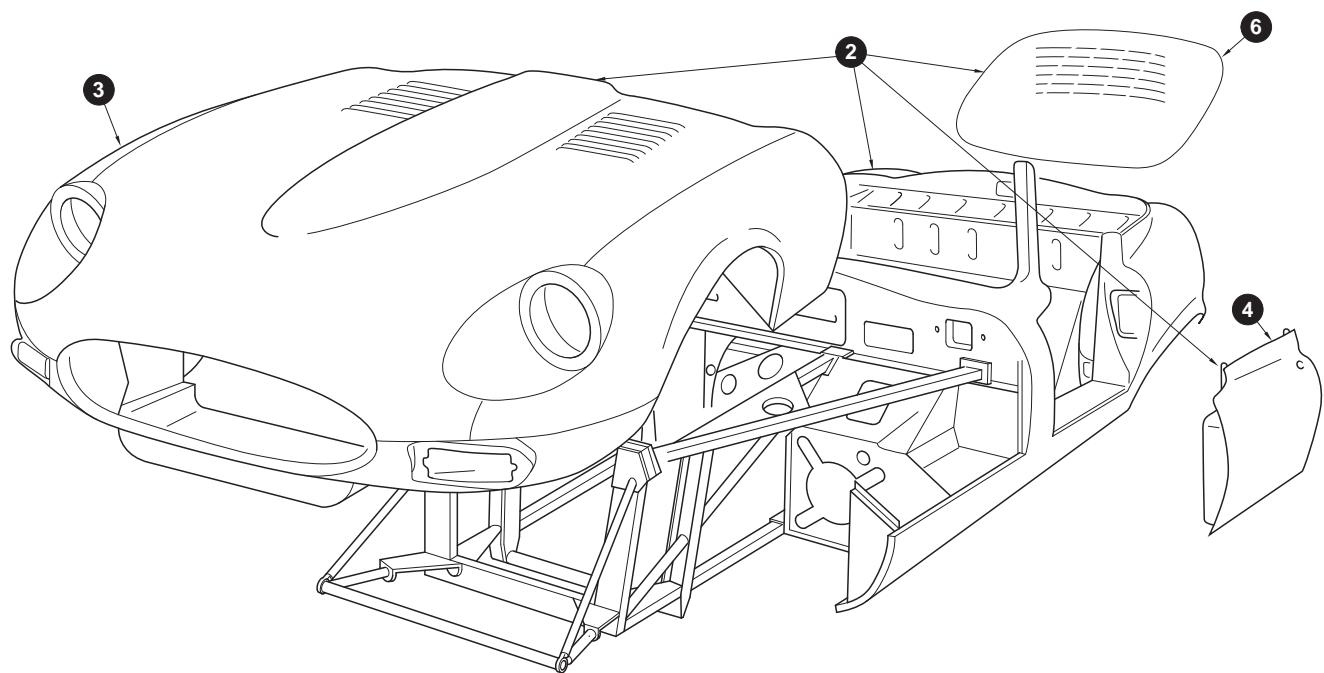

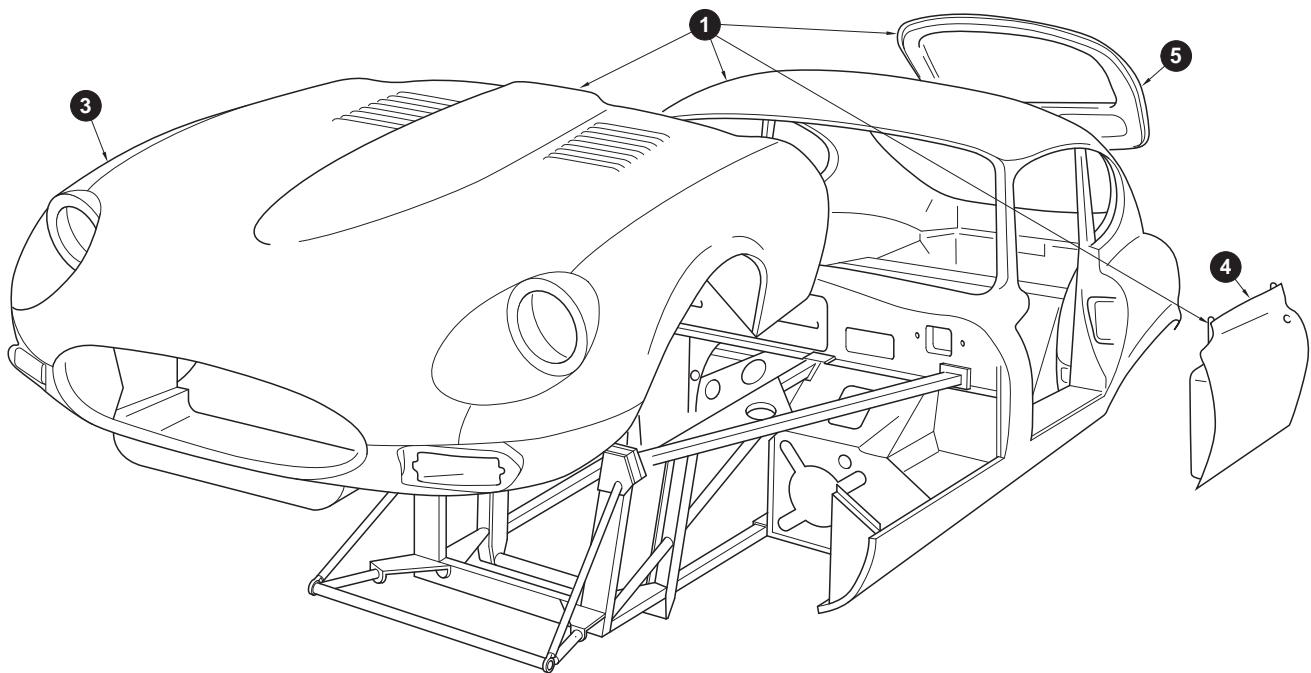

2 kg ABC gas, total height: 37.5 cm,  
diameter 10.8 cm ..... Part no. 494110

Luster Lace polish strips are designed to work on all round and tubular metal surfaces. The polish is in the cloth of the strips, no other utilities are needed to get the perfect finish. Luster Lace is fast and easy to use with 360° polishing power that can't be beat. So now you can save up to 70% of your work time. Luster Lace comes in three convenient sizes (narrow, medium, wide) for the care of parts of all sizes.

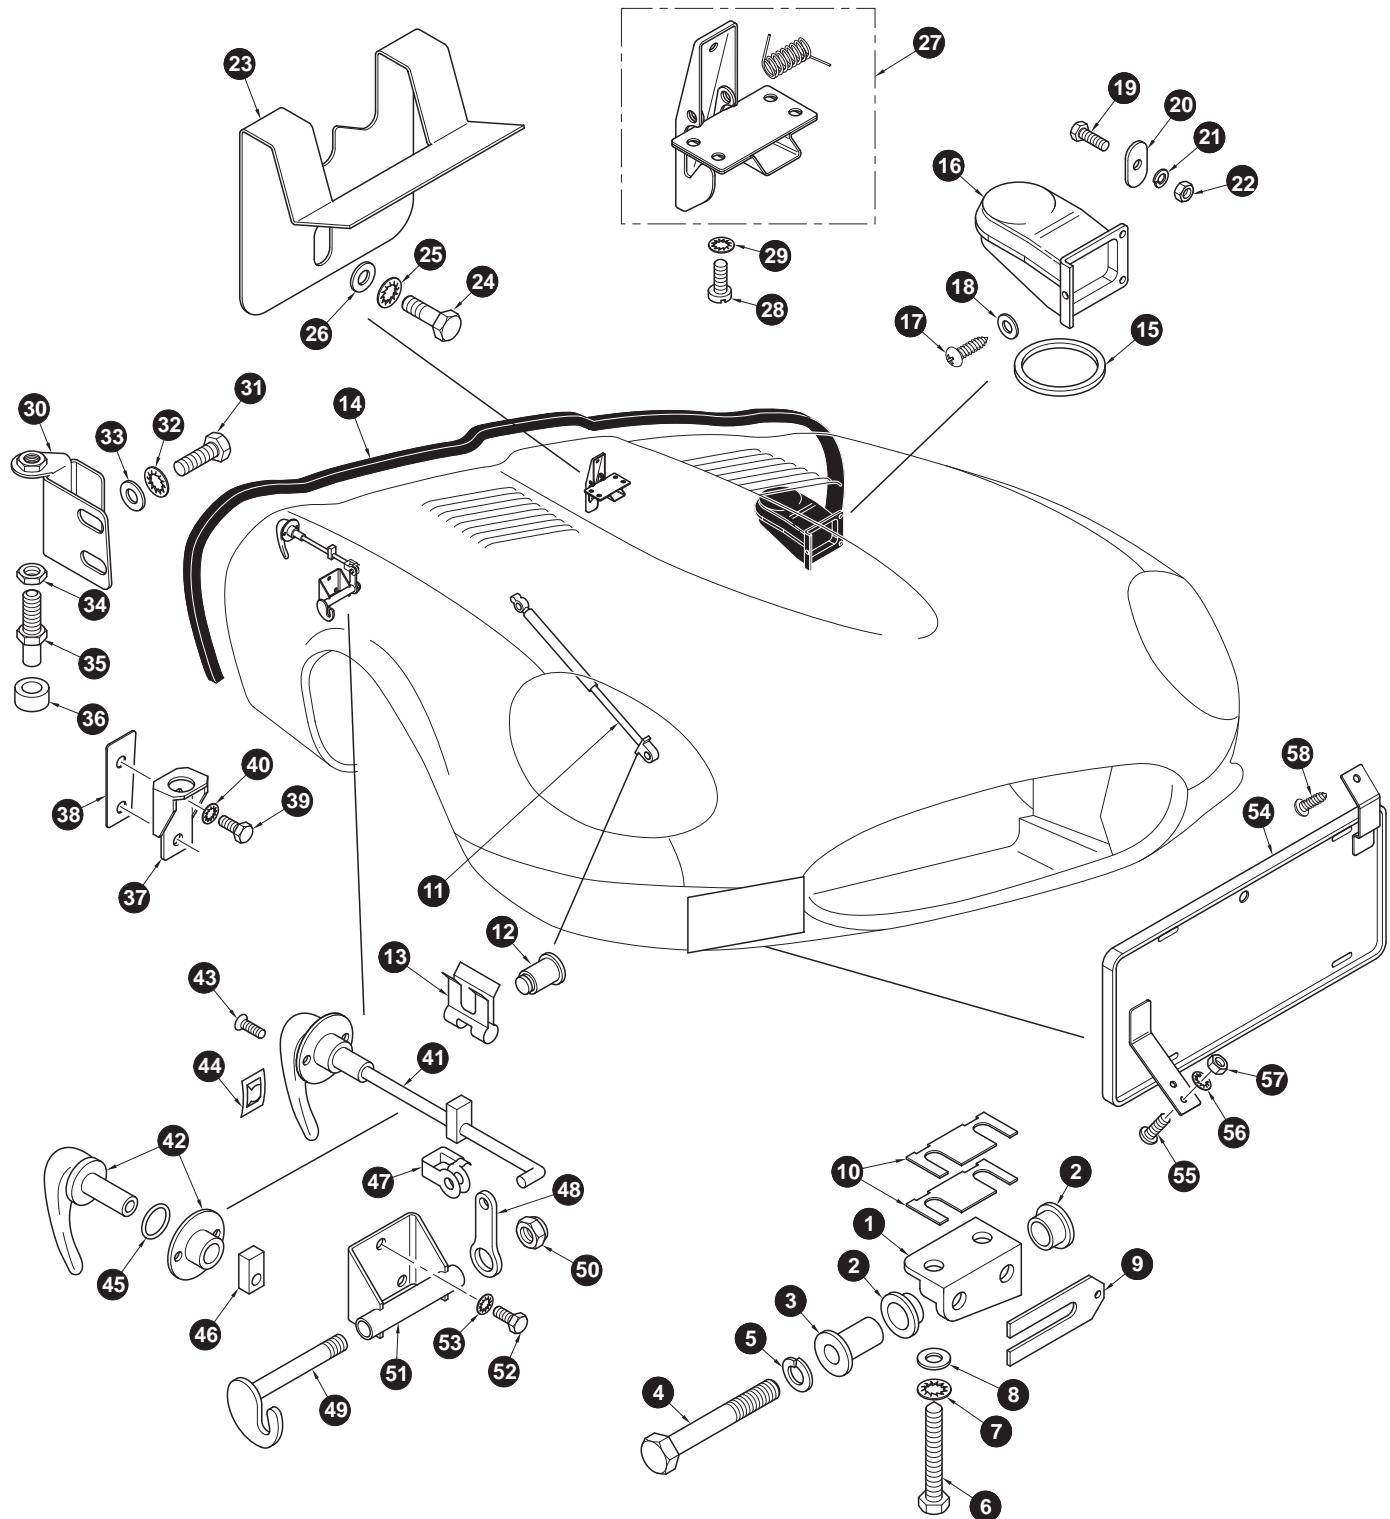

**,narrow**. Content: 14 strips 1/2" wide  
Part no. 485441

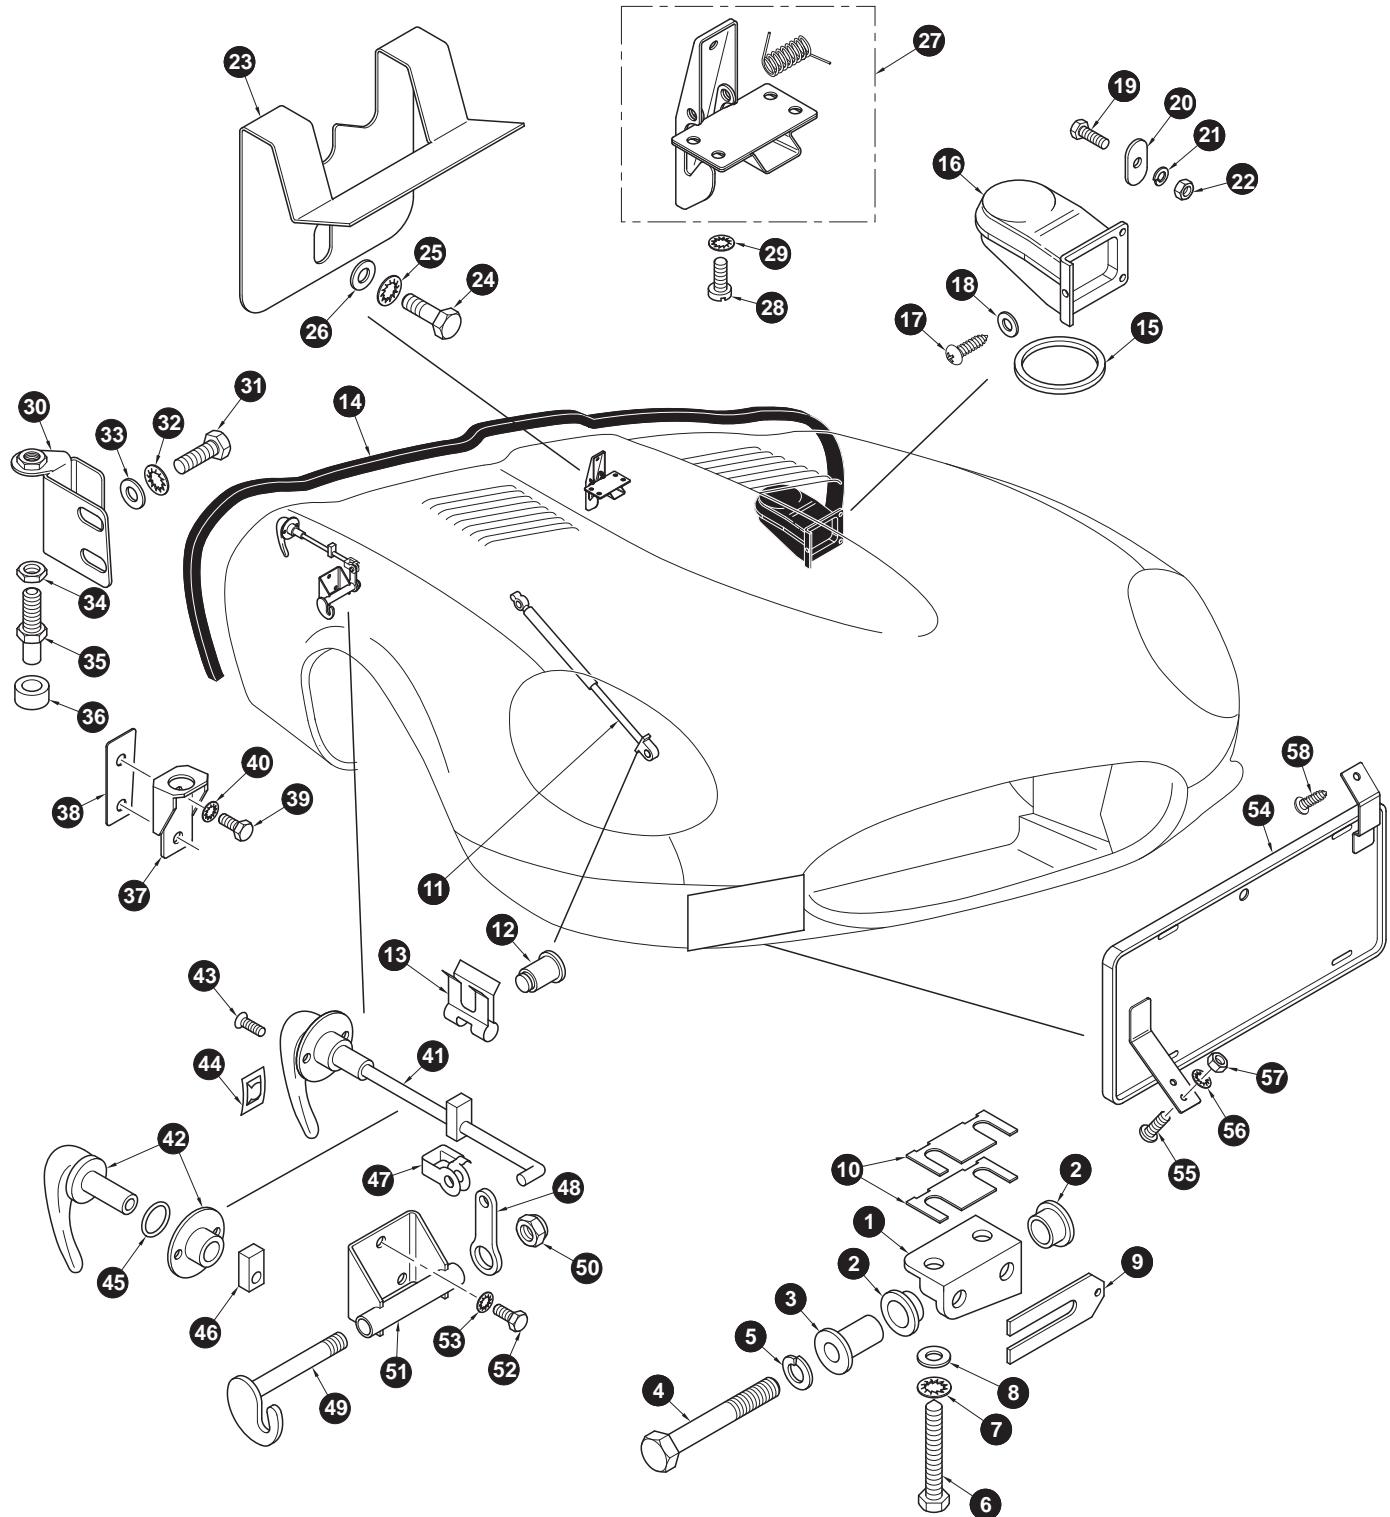

**,medium**. Contents: 9 strips 25/32" wide  
Part no. 227633

**,wide**. Contents: 6 strips 1.3/16" wide  
Part no. 378882

**,combo**. Content: 4 strips 1/2" wide,  
3 strips 3/4" wide and 2 strips 1.1/4" wide  
Part no. 485440
